Postharvest Biotechnology of Flowers and Ornamental Plants Dattajirao K. Salunkhe, Narayana R. Bhat, Babasaheb B. Desai, 2012-12-06 The floricultural industry has been undergoing an unprecedented revolution in terms of the type of commodity produced and the production and marketing technology in both developed and developing countries As a result of this revolution as we know today there is a flower for every purpose and

for every person in the world as is evident from the slogan of the Society for American Florists say it with flowers In recent years the Latin American and European countries have become sizeable competitors for the North American fresh flower markets and the trend continues growing Like any other crop production floricultural production can be divided into three basic factors 1 production costs 2 quality 3 transportation costs All these must be optimum for this area or industry to be safe from competition With increasing consumer awareness and the current recession the pressure from the artificial floral products in industry and also of neighbouring countries on the American fresh flower industry and continued competition even amongst the growers whole salers and retailers quality in floricultural industry is becoming increasingly important to all those concerned with handling these products The visual quality aspects of the product are the sole determiner of consumer acceptability in this industry and unlike fruits and vegetables flowers cannot be marketed by just discarding the damaged portion

Postharvest Technology of Horticultural Crops 4th Ed: Vegetable Crops, Herbs, and Flowers Diane M. Beckles,Adel Kader,Michael S. Reid,Cai-Zhong Jiang,Marita I. Cantwell,2025-01-24 Fresh fruit vegetables and ornamentals are composed of living tissues that experience continuous change after harvest Some of these changes are desirable e.g development of sugars and improved texture during fruit ripening while others are not e.g discoloration and loss of nutrients in fresh cut vegetables Senescence is the final stage in the development of plant organs culminating in a series of irreversible events leading to cellular breakdown and death These postharvest changes cannot be stopped but they

can be managed to maintain optimal quality longer Maintaining recommended temperature and relative humidity while minimizing wounding and microbial contamination constitute the foundation of effective postharvest handling The first chapter of this volume describes biological factors affecting these crops including respiration rates of ethylene production water loss physical damage and damage due to pathogens environmental factors such as temperature humidity ethylene and sunlight Subsequent chapters explore the use of biotechnology to improve postharvest results and postharvest handling operations for ornamentals and cut flowers for fresh herbs for fruit vegetables e g cucurbits tomatoes for leafy and stem vegetables and for underground vegetables roots tubers bulbs Handy easy to use tables and charts along with color photographs illustrate important points throughout A comprehensive table summarizes storage recommendations for produce a second table summarizes storage recommendations for cut flowers and greens This is Volume 7 in Postharvest Technology of Horticultural Crops 4th Edition

Crop Post-Harvest: Science and Technology, Volume 3 Debbie Rees, Graham Farrell, John Orchard, 2012-01-30 International trade in high value perishables has grown enormously in the past few decades In the developed world consumers now expect to be able to eat perishable produce from all parts of the world and in most cases throughout the year Perishable plant products are however susceptible to physical damage and often have a potential storage life of only a few days Given their key importance in the world economy Crop Post Harvest Science and Technology Perishables devotes itself to perishable produce providing current and comprehensive knowledge on all the key factors affecting post harvest quality of fruits and vegetables This volume focuses explicitly on the effects and causes of deterioration as well as the many techniques and practices implemented to maintain quality through correct handling and storage As highlighted throughout regular losses caused by post harvest spoilage of perishable products can be as much as 50% A complete understanding as provided by this excellent volume is therefore vital in helping to reduce these losses by a significant percentage Compiled by members of the world renowned Natural Resources Institute at the United Kingdom s University of Greenwich with contributions from experts around the world this volume is an essential reference for all those working in the area Researchers and upper level students in food science food technology post harvest science and technology crop protection applied biology and plant and agricultural sciences will benefit from this landmark publication Libraries in all research establishments and universities where these subjects are studied and taught should ensure that they have several copies for their shelves

New Advances in Postharvest Technology Ibrahim Kahramanoglu, 2023-09-27 Producers spend a great deal of money natural resources especially water and soil labor and time every year in order to feed the world s population However almost one third of the products produced as a result of all these efforts are lost before reaching consumers due to postharvest losses which threaten both the food supply and agricultural sustainability For this reason it is extremely important to prevent postharvest losses of fruits and vegetables In this context this book provides general and new information about the physiology of postharvest losses and the latest technological developments in

postharvest systems Each chapter provides up to date information about the postharvest physiology and technology of fruits and vegetables for students teachers professors scientists farmers food packers and sellers and entrepreneurs engaged in the fresh food preservation industry **Recent Advances in Postharvest Technologies, Volume 1** Nouredine
