Realism, Ethics and Secularism George Levine, 2008-10-09 George Levine is one of the world's leading scholars of Victorian literature and culture This collection of his essays develops the key themes of his work the intersection of nineteenth century British literature culture and science and the relation of knowledge and truth to ethics The essays offer perspectives on George Eliot Thackeray the Positivists and the Scientific Naturalists and reassess the complex relationship between Ruskin and Darwin In readings of Lawrence and Coetzee Levine addresses Victorian and modern efforts to push beyond the limits of realist art by testing its aesthetic and epistemological limits in engagement with the self and the other Some of Levine's most important contributions to the field are reprinted in revised and updated form alongside previously unpublished material Together these essays cohere into an exploration both of Victorian literature and culture and of ethical epistemological and aesthetic problems fundamental to our own times

Varieties of Scientific Experience Lewis S. Feuer, Lewis S Feuer shows that the gestation of the hypotheses of original minded scientists such as Darwin Einstein or Bohr is in large part a subconscious process Scientists try to project upon the world structural laws that beside fitting the given physical realities will also realize their own emotional longings among alternative worldviews Repeatedly too in examining the standpoints of philosophical figures ranging from Spinoza Descartes Kant and Mill to contemporary figures such as Einstein Lovejoy and Hook Feuer illumines how sociological antipathies project themselves into scientific divergences Feuer delves into the bearing of emotive beliefs such as pacifism socialism anti Semitism upon the formation of concurrent worldviews often fixations of scientific belief held with the same passion in science as in religion

Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn

Nietzsche's Naturalist Deconstruction of Truth Peter Bornedal, 2020-01-03 Nietzsche's Naturalist Deconstruction of Truth A World Fragmented in Late Nineteenth Century Epistemology offers a new interpretation of Nietzsche's discussions of truth and knowledge covering the period from his early essay On Truth and Lies in an Extra Moral Sense to his late notebooks It places these discussions in the context of the

neo Kantian Naturalist Positivist and Pragmatic schools influential in Nietzsche's late nineteenth century Europe Peter Bornedal argues for a view of Nietzsche's epistemological thought as an elaboration of this paradigm proposing ideas that are anti metaphysical and anti theological in their polemic orientation and in general promoting new scientific naturalist ideals in the discussions of knowledge Bornedal suggests that the rational pursuit of these new ideals to the unencumbered mind logically leads to Nihilism in its most profound epistemological sense Nietzsche's critique of metaphysics is thus seen as having sprung from sources different from and at times in patent opposition to more recent postmodern and deconstructionist critiques This book contextualizes Nietzsche in relation to a number of philosophical peers and juxtaposes him to contemporary thinkers in a way that resolves some of the difficulties that have plagued recent Nietzsche scholarship

A Critical Dictionary of Sociology Raymond Boudon, François Bourricaud, 1989 This distinguished reference work is much more than a lexicon or ordinary dictionary Each essay complete with bibliographical references presents a selective and critical discussion of some issue fundamental to sociology Synthesizing American British French and German taken together these contributions provide a coherent and sophisticated critique of the sociological tradition *The Socio-Ethical Dimension of Knowledge* Christian Damböck, Adam Tamas Tuboly, 2022-01-01 This book studies how the relationship between philosophy morality politics and science was conceived in the Vienna Circle and how this group of philosophers tried to position science as an antidote to totalitarianism and irrationalism This leads to investigation of the still understudied views of the Vienna Circle on moral philosophy meta ethics and the relationship between philosophy of science and politics Including papers from an international group of scholars *The Socio ethical Dimension of Knowledge The Mission of Logical Empiricism* addresses these topics and makes them available to scholars in the field of history of philosophy of science

Sociology , **Basic Modern Philosophy of Religion** Frederick Ferré, 2013-06-19 This book provides a reasoned comprehensive understanding of what religion is as well as a clear and critical assessment of whether in the light of modern developments in philosophy contemporary thinking people can responsibly maintain religious belief in God The book is divided into three major sections the first deals with what all religions may be said to have in common the second discusses theistic religion and the issue of intellectually responsible belief in God the third examines current developments within a particular theistic religion Christianity Originally published in 1968 the book is basic both in the nature of the issues it discusses and in the clarity and comprehensiveness of its presentation it is varied in the arguments and perspectives dealt with it provides an introduction to philosophical thinking through the problems of philosophy of religion and it deals seriously with controversial movements in theology Understanding and Evaluating Research Sue L. T. McGregor, 2017-10-25 *Understanding and Evaluating Research A Critical Guide* shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question the use of theory in the study the methods used and how the outcomes are reported The book starts with what it means to be a critical and uncritical reader of research followed

by a detailed chapter on methodology and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

Living Issues in Philosophy: Second Edition Harold H. Titus, 1953

Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11

The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add. It is therefore limited to two relevant but not intrinsically related points vis à vis research on marriage and the family in the interval since the first Handbook. Christensen 1964 appeared, namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook. In the late 1930s Willard Waller noted: Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it. Everything that concerned the life of men and women and their children was shrouded from the light. Today much of that has been changed. Gone is the concealment of the way in which life begins, gone the irrational sanctity of the home. The aura of sentiment which once protected the family from discussion clings to it no more. We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting. We are engaged in the process of reconstructing our family institutions through criticism and discussion. 1938 pp 3-4
