Human Rights Siobhán Mullally,2006-05-26 In recent years feminist theory has increasingly defined itself in opposition to universalism and to discourses of human rights Rejecting the troubled legacies of Enlightenment thinking feminists have questioned the very premises upon which the international human rights movement is based Rather than abandoning human rights discourse however this book argues that feminism should reclaim the universal and reconstruct the theory and practice of human rights Discourse ethics and its post metaphysical defence of universalism is offered as a key to this process of reconstruction The implications of discourse ethics and the possibility of reclaiming universalism are explored in the context of the reservations debate in international human rights law and further examined in debates on women s human rights arising in Ireland India and Pakistan Each of these states shares a common constitutional heritage and in each

religious cultural claims intertwined with processes of nation building have constrained the pursuit of gender equality Ultimately this book argues in favour of a dual track approach to cultural conflicts combining legal regulation with an ongoing moral political dialogue on the scope and content of human rights Global Justice, Human Rights and the Modernization of International Law Riccardo Pisillo Mazzeschi, Pasquale De Sena, 2018-07-27 This book is based on the observation that international law is undergoing a process of change and modernization driven by many factors among which the affirmation and consolidation of the role of the individual and of the theory of human rights stand out In the contemporary world international law has demonstrated an ability to evolve rapidly But it is still unclear whether its modernization process is also producing structural changes which affect the subjects the sources and even the very purpose of this law Is it truly possible to speak of a paradigmatic and ideological change in the international legal system one that also involves a transition from a state centred international order to a human centred one and from inter state justice to global justice The book addresses three fundamental aspects of the modernization process of international law the possible widening of the concept of international community and of the classic assumptions of statehood the possible diversification of the sources of general international law and the ability of international law to adapt to new challenges and to achieve the main goals for humanity set by the United Nations The overall objective of the book is to provide the tools for a deeper understanding of the transition phase of contemporary international law by examining the major problems that characterize this phase The book will also stimulate critical reflection on the future prospects of international law **How Lawyers Lose Their Way** Jean Stefancic, Richard Delgado, 2005-01-13 The caged panther Ezra Pound Pinstripes Archibald Macleish Formalism a new old disease Lawyers and their discontents Lawyers lives Other professions medicine High paid misery

Complex Equality and the Court of Justice of the European Union Richard Lang, 2018-07-17 The equality jurisprudence of the Court of Justice of the European Union has long drawn criticism for its almost total reliance on Aristotle's doctrine that likes should be treated like and unlikes unlike As has often been shown this is a blunt tool entrenching assumptions and promoting difference blindness the symptoms of simplicity In this book Richard Lang proposes that the EU's judges complement the Aristotelian test with a new one based on Michael Walzer's theory of Complex Equality and illustrates how analysing allegedly discriminatory acts not in terms of comparisons of the actors involved but rather in terms of distributions and meanings of goods would enable them to reach decisions with new dexterity and to resolve conflicts without sacrificing diversity **Methods and Legal Comparison** Roberto Scarciglia, 2023-08-14 This comprehensive book explores different methods and approaches to legal comparison considering how they are perceived and understood by the reader It examines how comparative discussion can be used effectively in both the classroom and courtroom The author builds on both analytical and methodological perspectives to provide an insight into the phenomenon of legal pluralism across global legal systems

The Implicit Relation of Psychology and Law Fiona Raitt, Suzanne Zeedyk, 2002-01-04 From a feminist

perspective the authors critically review the current use of psychology in law and identify a powerful collusion between the two fields which works actively against the interests of women They provide support for their argument in such areas as child abuse domestic violence rape and abortion This groundbreaking international text draws on both research findings and case material from various countries including Australia New Zealand Canada and South Africa as well as the USA and Great Britain The Implicit Relation of Psychology and Law brings an innovative feminist analysis to these affiliated fields Fiona E Raitt and M Suzanne Zeedyk explore the role of psychological syndromes i e Battered Woman s Syndrome Rape Trauma Syndrome Pre menstrual Syndrome and False Memory Syndrome within the courtrooms of the UK and the US In addition to the explicit relationship between the two fields they argue that there is an unrecognised implicit relation existing within the intersection of psychology and law which they find works to the disadvantage of women Both novel and controversial and written in an accessible style The Implicit Relation of Psychology and Law will engage readers from a wide range of disciplines including psychology law critical theory criminology and women s studies

juridical validity rule of law practices pluralism political and practical cultural challenges and divisive bio ethical issues This means considering the separation or separability theses between law and morality and the juridically relevant experience of person hood as a dialectic between autonomy and responsibility the orthodox and heterodox images of comparable concreteness and incomparable singularity the challenges of external points of view and interdisciplinary approaches

Boycott in America Gary Minda, 1999 Gary Minda s critical study of boycotts in American law and culture focuses on how the word boycott has developed as a metaphoric rather than as a rational or logical form of reasoning Minda first discusses the history interpretation and understanding of boycotts He then turns to the role of metaphor in the interpretation of boycotts and of boycott law Drawing on cognitive psychology and linguistic theory Minda

argues that the metaphors judges choose in describing boycotts determine how they view boycotts One of Minda's major contributions is to show how cognitive theory and the analysis of conceptual metaphors can help to explain the development of the law of boycott Equally important Minda provides a unique history of the boycotts in three separate legal fields labor antitrust and constitutional law
