Postsocial History An Introduction:

Postsocial History Miguel A. Cabrera, 2004-01-01 In *Postsocial History An Introduction* historian Miguel A. Cabrera points to the crisis of modernity as a locus for the collapse of social historical models. Previously established theories of social change and social relations are proving insufficient, calling for the emergence of a new social historical theory. By arguing convincingly for the inclusion of language in that model, Cabrera awakens a revolutionary new approach to historiography. The book will prove indispensable to historians and to social scientists in general who are dissatisfied with the old paradigms and seek new ways of addressing the challenges of social research. *A Genealogical History of Society* Miguel A.

Cabrera, 2017-10-27 This book provides a detailed reconstruction of the process of formation of the modern concept of society as an objective entity from the 1820s onwards, thus helping to better understand the shaping of the modern world and the nature of the current crisis of modernity. The concept has exerted considerable influence over the last two centuries during which time many people have conceived themselves and behave as members of a society and social scientists have explained human subjectivities and conducts as social effects. For both groups, society exists as a very real phenomenon. Historical inquiry shows, however, that the modern concept of society is no more than a historically contingent way of imagining and making sense of the human world.

The Future of History Alun Munslow, 2010-07-30 In this radical reassessment, Alun Munslow challenges conventional notions of history and offers a new vision of historical thinking and practice. Deploying a range of concepts such as scepticism, aesthetics, ethics, standpoint, irony, authorship, and a new understanding of truth, *The Future of History* examines history as a form of knowledge in itself, arguing that in the future the multiple forms of its expression will be as significant as its content. This thought-provoking, challenging, and unique book offers a way forward for history after postmodernism and is essential reading for anyone asking the question, what is history?

Practicing History Gabrielle M. Spiegel, 2005 This essential new collection of key articles from critical thinkers and practicing historians focuses on where history is now in terms of its theory and practice. For students, teachers, and historians alike, this is an indispensable reader.

Deconstructing History Alun Munslow, 2006-04-18 In *Deconstructing History*, Alun Munslow examines history in the postmodern age. He provides an introduction to the debates and issues of postmodernist history. He also surveys the latest research into the relationship between the past, history, and historical practice, as well as forwarding his own challenging theories. The book discusses issues of both empiricist and deconstruction positions and considers the arguments of major proponents of both stances and includes an examination of the character of historical evidence, exploration of the role of historians, discussion of the failure of traditional historical methods, chapters on Hayden White and Michel Foucault, an evaluation of the importance of historical narrative, an up-to-date comprehensive bibliography, an extensive and helpful glossary of difficult key terms. *Deconstructing History* maps the philosophical field, outlines the controversies involved, and assesses the merits of the deconstructionist position. He argues that instead of beginning with the

Mastery and Lost Illusions Włodzimierz Borodziej, Stanislav Holubec, Joachim Puttkamer, 2014-10-15 This volume highlights the specific experiences and challenges of modernity in twentieth century Eastern and Central Europe Contributors ask how spatial and temporal conditions shaped the region's transformation from a rural to an urban industrialized society in this period and investigate the state's role in the mastery of space particularly in the context of state socialism The volume also sheds light on the ruralization of cities and mutual perceptions of the rural and urban populations in this region

Minor Knowledge and Microhistory Sigurdur Gylfi Magnusson, David Olafsson, 2016-10-04 This book studies everyday writing practices among ordinary people in a poor rural society in the 19th and early 20th centuries Using the abundance of handwritten material produced disseminated and consumed some centuries after the advent of print as its research material the book's focus is on its day to day usage and on minor knowledge i.e. text matter originating and rooted primarily in the everyday life of the peasantry The focus is on the history of education and communication in a global perspective Rather than engaging in comparing different countries or regions the authors seek to view and study early modern and modern manuscript culture as a transnational or transregional practice giving agency to its ordinary participants and attention to hitherto overlooked source material Through a microhistorical lens the authors examine the strength of this aspect of popular culture and try to show it in a wider perspective as well as asking questions about the importance of this development for the continuity of the literary tradition The book is an attempt to explain the nature of the literary culture in general how new ideas were transported from one person to another from community to community and between regions essentially the role of minor knowledge in the development of modern men

The Workers' State Mark Pittaway, 2010-11-23 In 1956 Hungarian workers joined students on the streets to protest years of wage and benefit cuts enacted by the Communist regime Although quickly suppressed by Soviet forces the uprising led to changes in party leadership and conciliatory measures that would influence labor politics for the next thirty years In *The Workers' State* Mark Pittaway presents a groundbreaking study of the complexities of the Hungarian working class its relationship to the Communist Party and its major political role during the foundational period of socialism 1944-1958 Through case studies of three industrial centers Ujpest Tatabánya and Zala County Pittaway analyzes the dynamics of gender class generation skill level and rural versus urban location to reveal the embedded hierarchies within Hungarian labor He further demonstrates how industries themselves from oil and mining to armaments and textiles possessed their own unique labor subcultures From the outset the socialist state won favor with many workers as they had grown weary of the disparity and oppression of class systems under fascism By the early 1950s however a gap between the aspirations of labor and the goals of the state began to widen In the Stalinist drive toward industrialization stepped up production measures shortages of goods and housing wage and benefit cuts and suppression became widespread Many histories of this period have focused on Communist terror tactics and the brutal suppression of a

pliant population In contrast Pittaway's social chronicle sheds new light on working class structures and the determination of labor to pursue its own interests and affect change in the face of oppression It also offers new understandings of the role of labor and the importance of local histories in Eastern Europe under communism

New Directions in Social and Cultural History Sasha Handley, Rohan McWilliam, Lucy Noakes, 2018-02-22 What does it mean to be a social and cultural historian today In the wake of the cultural turn and in an age of digital and public history what challenges and opportunities await historians in the early 21st century In this exciting new text leading historians reflect on key developments in their fields and argue for a range of new directions in social and cultural history Focusing on emerging areas of historical research such as the history of the emotions and environmental history *New Directions in Social and Cultural History* is an invaluable guide to the current and future state of the field The book is divided into three clear sections each with an editorial introduction and covering key thematic areas histories of the human the material world and challenges and provocations Each chapter in the collection provides an introduction to the key and recent developments in its specialist field with their authors then moving on to argue for what they see as particularly important shifts and interventions in the theory and methodology and suggest future developments *New Directions in Social and Cultural History* provides a comprehensive and insightful overview of this burgeoning field which will be important reading for all students and scholars of social and cultural history and historiography

America's Forgotten Middle East Initiative Andrew Patrick, 2015-06-25 Sent to the Middle East by Woodrow Wilson to ascertain the viability of self determination in the disintegrating Ottoman Empire the King Crane Commission of 1919 was America's first foray into the region The commission's controversial recommendations included the rejection of the idea of a Jewish state in Syria US intervention in the Middle East and the end of French colonial aspirations The Commission's recommendations proved inflammatory even though its counsel on the question of the Palestinian mandate was eventually disregarded by Lloyd George and Georges Clemenceau in favour of their own national interests In the ensuing years the Commission's dismissal of claims by Zionist representatives like David Ben Gurion on their right to Palestine proved particularly divisive with some historians labeling it prophetic and accurate and others arguing that Commission members were biased and ill informed Here in the first book length analysis of the King Crane report in nearly 50 years Andrew Patrick chronicles the history of early US involvement in the region and challenges extant interpretations of the turbulent relationship between the United States and the Middle East

Contesting the Postwar City Eric Fure-Slocum, 2013-06-28 Focusing on midcentury Milwaukee Eric Fure Slocum charts the remaking of political culture in the industrial city Professor Fure Slocum shows how two contending visions of the 1940s city working class politics and growth politics fit together uneasily and were transformed amid a series of social and policy clashes Contests that pitted the principles of democratic access and distribution against efficiency and productivity included the hard fought politics of housing and redevelopment controversies over petty gambling questions about the role of organized labor in urban life and

battles over municipal fiscal policy and autonomy These episodes occurred during a time of rapid change in the city s working class as African American workers arrived to seek jobs women temporarily advanced in workplaces and labor unions grew At the same time businesses and property owners sought to reestablish legitimacy in the changing landscape This study examines these local conflicts showing how they forged the postwar city and laid a foundation for the neoliberal city

Indian Work Daniel H. Usner,2009-08-27 Representations of Indian economic life have played an integral role in discourses about poverty social policy and cultural difference but have received surprisingly little attention Daniel Usner dismantles ideological characterizations of Indian livelihood to reveal the intricacy of economic adaptations in American Indian history

War and the Cultural Turn Jeremy Black,2013-05-08 In this stimulating new text renowned military historian Jeremy Black unpacks the concept of culture as a descriptive and analytical approach to the history of warfare Black takes the reader through the limits and prospects of culture as a tool for analyzing war while also demonstrating the necessity of maintaining the context of alternative analytical matrices such as technology Black sets out his unique approach to culture and warfare without making his paradigm into a straightjacket He goes on to demonstrate the flexibility of his argument through a series of case studies which include the contexts of rationale Gloire strategy early modern Britain organizations the modern West and ideologies the Cold War These case studies drive home the point at the core of the book culture is not a bumper sticker it is a survival mechanism Culture is not immutable it is adaptable Wide ranging international and always provocative *War and the Cultural Turn* will be required reading for all students of military history and security studies
