Marxism, Neoliberalism, and Intelligent Capitalism Liz Jackson, Michael A. Peters, 2021-12-29 This book explores Marxism and related political economic theory and its implications for education around the world as seen in the history of the journal Educational Philosophy and Theory As such it illustrates the evolution of political economic changes across societies as they have been brought to bear within the academic field and in the journal through the exploration of typical and noteworthy articles examining political economic themes over time In the early decades of Educational Philosophy and Theory only a few works can be found focused on Marx's work Marxism and related themes However since the mid 1990s Educational Philosophy and Theory has published many articles focused on neoliberalism and educational responses to theories and policies based on political economic perspectives This collection serves to showcase this work exploring the way Marxist neoliberal and other related political economic theories have been applied to educational discussions among philosophers and theorists of education in the history of Educational Philosophy and Theory As a collection this book provides a glimpse of a dramatically changing world and changing scholarly responses to it during the late nineteenth and early twentieth centuries This collection can therefore be useful to scholars interested in better understanding how changes to the political economy have intersected with those in education over time as well as the diverse ways scholars have approached and reacted to a shifting landscape considering views ranging from Marxist to Post Marxist to neoliberal and beyond

Subjectivity & Truth Tina Besley, Michael A. Peters, 2007 This book focuses on Foucault's later work and his return to the hermeneutics of the subject exploring the implications of his thinking for education pedagogy and related disciplines What and who is the subject of education and what are the forms of self constitution Chapters investigate Foucault's notion of the culture of self in relation to questions concerning truth parrhesia or free speech and subjectivity especially with reference to the literary genres of confession and biography and the contemporary political forms of individualization governmentality Heidegger, Politics and Climate Change Ruth Irwin, 2011-10-27 The scale of some environmental problems such as climate change and human overpopulation exceed any one nation state and require either coordinated governance or a shift in the culture of modernity Heidegger Politics and Climate Change examines this crisis alongside Heidegger's ideas about technology and modernity Heidegger suggests that refocusing on the primary questions that make it meaningful to be human the question of Being could create the means for alternative discourses that both challenge and sidestep the attempt for total surveillance and total control He advocates recognising the problematic relationship humanity has with the environment and reinventing new trajectories of understanding ourselves and our planet This book aims to properly integrate environment into philosophy and political theory offering a constructive critique of modernity with some helpful suggestions for establishing a readiness for blue sky scenarios for the future The book lays out the practical

implications of Heidegger's ideas and engages with philosophy of technology considering the constraints and the potentials of technology on culture and environment

Key Issues in Sustainable Development and Learning William Scott, Stephen Gough, 2004 This book presents seminal readings from existing literature alongside specially commissioned critical vignettes from leading thinkers with interests in sustainable development and learning The book sets out to inform readers about the many perspectives that exist and to challenge assumptions they may have about both sustainable development and learning Through the readings and vignettes the book raises wide ranging issues of how we choose to act Following the format of its companion volume Sustainable Development and Learning framing the issues the book builds on existing work across a number of fields as well as on original international research Key Issues in Sustainable Development and Learning a critical review is a major resource for anyone studying for masters degrees focusing on environment and sustainable development It is also a valuable tool for professionals in both public and private sector who are dealing with these issues daily Bill and Steve's book for Routledge Sustainable Development and Learning framing the issues is one of the academic sources cited by the United Nations in its draft international implementation scheme for the Decade of Education for Sustainable Development which was launched by Kofi Annan last month

The Routledge Handbook of Food Ethics Mary Rawlinson, Caleb Ward, 2016-07-01 While the history of philosophy has traditionally given scant attention to food and the ethics of eating in the last few decades the subject of food ethics has emerged as a major topic encompassing a wide array of issues including labor justice public health social inequity animal rights and environmental ethics This handbook provides a much needed philosophical analysis of the ethical implications of the need to eat and the role that food plays in social cultural and political life Unlike other books on the topic this text integrates traditional approaches to the subject with cutting edge research in order to set a new agenda for philosophical discussions of food ethics The Routledge Handbook of Food Ethics is an outstanding reference source to the key topics problems and debates in this exciting subject and is the first collection of its kind Comprising over 35 chapters by a team of international contributors the Handbook is divided into 7 parts the phenomenology of food gender and food food and cultural diversity liberty choice and food policy food and the environment farming and eating other animals food justice Essential reading for students and researchers in food ethics it is also an invaluable resource for those in related disciplines such as environmental ethics and bioethics

CEO Society Peter Bloom, Carl Rhodes, 2018-04-15 Chief Executive Officers CEOs have become the cultural icons of the 21st century Figures like Steve Jobs and Mark Zuckerberg are held up as role models who epitomise the modern pursuit of innovation wealth and success We now live Bloom and Rhodes argue in a CEO society a society where corporate leadership has become the model for transforming not just business but all spheres of life where everyone from politicians to jobseekers to even those seeking love are expected to imitate the qualities of the lionized corporate executive But why in the wake of the failings exposed by the 2008 financial crisis does the corporate ideal continue to exert such a grip on popular attitudes In this insightful new

book Bloom and Rhodes examine the rise of the CEO society and how it has started to transform governments culture and the economy This influence they argue holds troubling implications for the future of democracy as evidenced by the disturbing political rise of Donald Trump in the US and for our society as a whole

Education and the Limits of Reason Peter Roberts,Herne Saeverot,2017-07-06 In recent decades a growing body of educational scholarship has called into question deeply embedded assumptions about the nature value and consequences of reason Education and the Limits of Reason extends this critical conversation arguing that in seeking to investigate the meaning and significance of reason in human lives sources other than non fiction educational or philosophical texts can be helpful Drawing on the work of Dostoevsky Tolstoy and Nabokov the authors demonstrate that literature can allow us to see how reason is understood and expressed contested and compromised by distinctive individuals under particular circumstances in complex and varied relations with others Novels plays and short stories can take us into the workings of a rational or irrational mind and show how the inner world of cognitive activity is shaped by external events Perhaps most importantly literature can prompt us to ask searching questions of ourselves it can unsettle and disturb and in so doing can make an important contribution to our educational formation An original and thought provoking work Education and the Limits of Reason offers a fresh perspective on classic texts by Dostoevsky Tolstoy and Nabokov and encourages readers to reconsider conventional views of teaching and learning This book will appeal to a wide range of academics researchers and postgraduate students in the fields of education literature and philosophy

The New Imperial Order Makere Stewart-Harawira, 2013-07-18 This important book discusses the political economy of world order and the basic ideological and ontological grounds upon which the emergent global order is based Starting from a Maori perspective it examines the development of international law and the world order of nation states In engaging with these issues across macro and micro levels the international arena the national state and forms of regionalism are identified as sites for the reshaping of the global politico economic order and the emergence of Empire Overarching these problematics is the emergence of a new form of global domination in which the connecting roles of militarism and the economy and the increase in technologies of surveillance and control have acquired overt significance

Transforming Learning in Schools and Communities Bob Lingard, Jon Nixon, Stewart Ranson, 2011-11-03 Many educators have been looking for a fundamentally different approach to engage young people and encourage progress in learning Supported by recent public policy developments a transformation is beginning to take place in the practice of many schools The focus of learning is shifting away from the child as an individual in a classroom detached from the surrounding neighbourhood to a learning community that embraces carers and families as well as young people and teachers This monograph analyses the organising principles of this cultural transformation and considers how it will shape learning in schools and communities throughout the world The book brings together key thinkers from the fields of new learning new communities of educational practice and new forms of educational governance Arguing for the necessary interconnectedness of pedagogy institutions and governance this ground breaking book will undoubtedly shape the policy agenda in this area for years to come

Radical Relevance Laura Gray-Rosendale, Steven Rosendale, 2012-02-01 In an effort to rethink the left this interdisciplinary collection weaves together some of today s most powerful voices in contemporary left critical thought as they examine the fragmentation of American movements for social change evaluate what critical scholarship might contribute to the task of renewing or creating a more unified and efficacious left and explore the left s possibly inadequate dealings with many marginalized groups Representing a diverse range of

theoretical perspectives within several textual disciplines the essays assess historical practical or speculative models for a whole left a left constituted by a broad range of complexly interwoven interests including issues of class environment gender sexuality disability race and ethnicity The book exemplifies the struggles of scholars to work toward a more shared agenda for social change

Race, Population Studies, and America's Public Schools Kenneth J. Fasching-Varner, Hayward Derrick Horton, Lori Latrice Martin, 2016-12-08 The roles of race and racism in explaining current controversies related to public schools in America is both understudied and misunderstood Part of the problem is the absence of a critical paradigm that facilitates the development and application of ideas theories and methods that do not fit within the confines of mainstream scholarship Race Population Studies and America's Public Schools A Critical Demography Perspective explores the paradigm of critical demography established in the late 1990s which articulates the manner in which the social structure differentiates dominant and subordinate populations Moreover critical demography necessitates explicit discussions and examinations of the nature of power and how it perpetuates the existing social order Hence in the case of race in education it is imperative that racism is central to the analysis Racism elucidates that which often goes ignored or unexplained by conventional scholars Consequently the critical demography paradigm fills an important void in the study of public education in American schools

Accounting and Business Ethics Ken McPhail, Diane Walters, 2009-06-02 Despite the enormous impact of various accounting scandals on the accounting profession the general malaise amongst the profession more broadly and the significant legislative and institutional reforms that have taken place as a result there are still surprisingly few textbooks on accounting ethics This concise introductory text takes a broad view of ethics and accounting taking into account contemporary social trends such as globalization and terrorism Rather than delineating codes of professional conduct this text pushes the reader towards an understanding of the nature of ethical dilemmas and the factors that influence the ways in which accountants frame ethical questions The book is divided into two parts The first part focuses on developing thinking about the different kinds of ethical questions that could be posed in relation to accounting The second part focuses more explicitly on accounting practice exploring the ethical function of accounting in relation to the market economy ethics in relation to the accounting profession and the ethics of the international accounting harmonization project Accounting and Business Ethics is a compact introduction aimed at both students and practitioners who want to understand more about the ethics of accounting

Decolonizing Global Citizenship Education Ali A Abdi, Lynette Shultz, Thashika Pillay, 2015-12-01 The ideas for this reader came out of a conference organized through the Centre for Global Citizenship Education and Research CGCER at the University of Alberta in 2013 With the high expansion of global citizenship education scholarship in the past 15 or so years and with most of this scholarship produced in the west and mostly focused on the citizenship lives of people in the so called developing world or selectively attempting to explain the contexts of marginalized populations in the west the need for multidirectional and decolonizing knowledge and research perspectives should be clear Indeed the

discursive as well as the practical constructions of current global citizenship education research cannot fulfill the general promise of learning and teaching programs as social development platforms unless the voices of all concerned are heard and validated. With these realities, this reader is topically comprehensive and timely and should constitute an important intervention in our efforts to create and sustain more inclusive and liberating platforms of knowledge and learning. This collection of cutting edge theoretical contributions examines citizenship and neo liberal globalization and their impacts on the nexus of the local and global learning production of knowledge and movements of people and their rights. Case studies in the collection also provide in depth analysis of lived experiences that challenge the constructed borders which derive from colonial and imperial re structuring of the contemporary world and nation states. The contributors articulate agency in terms of both resistance and proactive engagement toward the construction of an alternative world which acknowledges equality justice and common humanity of all in symbiosis with the social and natural environment. It is a valuable reader for students scholars practitioners and activists interested in the empowering possibilities of decolonized global citizenship education. N Dr

The Discourse of Neoliberalism Simon Springer, 2016-07-29 Why should we be worried about neoliberalism if we are not able to fully appreciate its deleterious effects? How can we fully appreciate its intricacies and power without attending to and seeking to potentially reconcile the various critical theorizations of how it actually operates? *The Discourse of Neoliberalism* offers a critical political economy meets poststructuralist perspective on the relationship between neoliberalism and power. By advancing a geographical approach to understanding the discursive formations and material consequences of neoliberalism, the book exposes how processes of neoliberalization are shot through with violence. It argues that reading neoliberalism as a discourse better equips us to understand the power of this variegated economic formation as an expansive process of social spatial transformation that is intimately bound up with the production of poverty inequality and violence across the globe. It illuminates the vital and ongoing power of neoliberalism in order to open up a critical space for thinking through how life beyond neoliberalism might be achieved. *The Body Problematic* Laura

Hengehold, 2010-09-30 Late in life Foucault identified with the critical tradition of Kant encouraging us to read both thinkers in new ways. Kant's Copernican strategy of grounding knowledge in the limits of human reason proved to stabilize political social scientific and medical expertise as well as philosophical discourse. These inevitable limits were made concrete in historical structures such as the asylum, the prison and the sexual or racial human body. Such institutions built upon and shaped the aesthetic judgment of those considered normal. Following Kant through all of Foucault's major works, this book shows how bodies functioned as problematic objects in which the limits of post Enlightenment European power and discourse were imaginatively figured and unified. It suggests ways that readers in a neoliberal political order can detach from the imaginative schemes vested in their bodies and experiment normatively with their own security needs. **Learning in the Age of Digital Reason** Petar Jandrić, 2017-07-17 *Learning in the Age of Digital Reason* contains 16 in depth dialogues

between Petar Jandri and leading scholars and practitioners in diverse fields of history philosophy media theory education practice activism and arts The book creates a postdisciplinary snapshot of our reality and the ways we experience that reality at the moment here and now It historicises our current views to human learning and experiments with collective knowledge making and the relationships between theory and practice It stands firmly at the side of the weak and the oppressed and aims at critical emancipation Learning in the Age of Digital Reason is playful and serious It addresses important issues of our times and avoids the omnipresent academic sin of pretentiousness thus making an important statement research and education can be sexy Interlocutors presented in the book in order of appearance Larry Cuban Andrew Feenberg Michael Adrian Peters Fred Turner Richard Barbrook McKenzie Wark Henry Giroux Peter McLaren Si n Bayne Howard Rheingold Astra Taylor Marcell Mars Tomislav Medak Ana Kuzmani Paul Levinson Kathy Rae Huffman Ana Peraica Dmitry Vilensky Chto Delat Christine Sinclair and Hamish Mcleod
