*Bowker's Complete Video Directory*, 2000      **Variety's Complete Home Video Directory**, 1989      The Problem of Democracy in Postwar Europe Pepijn Corduwener, 2016-08-25 The current perception of democratic crisis in Western Europe gives a renewed urgency to a new perspective on the way democracy was reconstructed after World War II and the principles that underpinned its postwar transformation This study accounts for the formation of the postwar democratic order in Western Europe by studying how the main political actors in France West Germany and Italy conceptualized democracy and strove over its meaning Based upon a wide range of librarian and archival sources from these countries it tracks changing conceptions of democracy among leading politicians political parties and leaders of social movements and unveils how they were deeply divided over key principles of postwar democracy such as the political party the free market economy representation and civic participation By comparing three national debates on the question what democracy meant and how it should be institutionalized and practiced this study argues that only in the 1970s conceptions of democracy converged and key political actors accepted each other as democrats with similar conceptions of democracy This study thereby deconstructs the myth of the quick emergence of one consensual Western European model of democracy after 1945 demonstrates that its formation was a long and contentious process in which national differences were often of crucial importance and contributes to an enhanced understanding of the historical roots of the current sentiment of democratic crisis      **Selected Executive Session Hearings of the Committee, 1943-50; Volume II: Problems of World War II and Its Aftermath** United States. Congress. House. Committee on Foreign Affairs. Congress. House. Special Committee on Post-War Economic Policy and Planning, 1944      **Post-War Business Planners in the United States, 1939-48** Charlie Whitham, 2016-10-20 During the Second World War several independent business organizations in the US devoted considerable energy to formulating and advocating social and economic policy options for the US government for implementation after the war This planning community of far sighted businessmen joined with academics and government officials in a nationwide endeavor to ensure that the colossal levels of productivity achieved by the US during wartime continued into the peace At its core this effort was part of a wider struggle between liberals moderates and conservatives over determining the economic and social responsibilities of government in the new post war order In this book Charlie Whitham draws on an abundance of unpublished primary material from private and public archives that includes the minutes memoranda policy statements and research studies of the major post war business planning organisations on a wide range of topics including monetary policy demobilization labor policy international trade and foreign affairs This is the untold story of how the post war business

planners of all hues helped shape the moderate consensus which prevailed after 1945 over a permanent but limited government responsibility for fiscal welfare and labor affairs advanced American interests overseas and established

Koster,Rivke Jaffe,Anouk de Koning,2018-04-19 In today s world citizenship is increasingly defined in normative terms Political belonging comes to be equated with specific norms values and appropriate behaviour with distinctions made between virtuous desirable citizens and deviant undesirable ones In this book we analyze the formulation implementation and contestation of such normative framings of citizenship which we term citizenship agendas Some of these agendas are part and parcel of the working of the nation state Other citizenship agendas however are produced beyond the nation state The chapters in this book study various sites where the meaning of the good citizen is framed and negotiated in different ways by state and non state actors We explore how multiple normative framings of citizenship may coexist in apparent harmony or merge or clash The different chapters in this book engage with citizenship agendas in a range of contexts from security policies and social housing in Dutch cities to state like but extralegal organizations in Jamaica and Guatemala and from the regulation of the Muslim call to prayer in the US Midwest to post conflict reconstruction in Lebanon This book was previously published as a special issue of Citizenship Studies      *Transboundary Environmental Problems and Cultural Theory* NA NA,2000-10-26 In this book Marco Verweij presents a new and challenging theoretical framework with which to understand international relations based on the cultural theory developed by Mary Douglas Michael Thompson Aaron Wildavsky and others By applying this framework in a detailed study of the environmental protection of the River Rhine in

Western Europe and the Great Lakes of North America he also contributes to a better understanding of how transboundary environmental problems have been and can be solved Children Born of War: Challenges and Opportunities at the Intersection of War Tension and Post-War Justice and Reconstruction Sabine Lee,Susan Bartels,Heide Glaesmer,2023-03-20

*East Central European Crisis Discourses in the Twentieth Century* Balázs Trencsényi, Lucija Balikić, Una Blagojević, Isidora Grubački, 2024-08-20 The term crisis with its complex history has emerged as one of the pivotal notions of political modernity As such reconstructing the ways the discourse of crisis functioned in various contexts and historical moments gives us a unique insight not only into a series of conceptual transformations but also into the underlying logic of key political and intellectual controversies of the last two centuries Studying the ways crisis was experienced conceptualized and negotiated can contribute to the understanding of how various visions of time and history shape political thinking and conversely how political and social reconfigurations frame our assumptions about temporality and spatiality A historical region wedged in between various competing imperial centers East Central Europe has been an area often associated with crisis phenomena by both internal and external observers Seeking to employ the regional gaze as a vantage point to reflect on issues which are relevant well beyond those countries between the Baltic and the Adriatic this project is also in dialogue with a number of recent transnational attempts to rethink political and intellectual history with regard to the recurrent epistemological frames that structure the political and cultural debate This book will thus be useful both for researchers from the field of intellectual history and numerous adjacent fields and graduate university students alike
