Potato Production And Consumption In Developing Countries:

Potato Production and Consumption in Developing Countries Winston B. Charles, Food and Agriculture Organization of the United Nations, 1991-01-01 Production potentials in developing countries Present restraints to improving productivity Research and development *Potatoes* Douglas E. Horton, 1987-04-23 This book summarizes the principles of potato production distribution and use and uses findings to propose planning for agricultural research and development for crop improvement programmes **Potatoes** Douglas Horton, 2019-06-25 Although the potato is usually thought of as a temperate zone crop potato growing in the tropics and subtropics is spreading rapidly In terms of the dollar value of the crop this edible root now ranks fourth in the developing world after rice wheat and maize Nevertheless policymakers often underrate the importance of the potato as a source of employment income and food or they underestimate the potential benefits from expanding potato production and use The payoff from applied research on potato cultivation in the tropics and subtropics is high due to the large body of scientific information from developed countries This book summarizes the principles of potato production distribution and use The essential facts about the potato as a crop a commodity and a food are discussed as well as the issues that scientists and policymakers should consider in setting priorities for implementing and assessing the impact of potato research and extension programs A major premise of the book is that programs aiming to increase food supplies and reduce poverty through crop improvement need to consider not only production technology but also marketing strategies and consumption patterns Adequate planning for agricultural research and development requires an understanding of how crops are grown marketed and used and of what potential benefits the new technologies can yield Hence effective crop improvement programs need both technical and socioeconomic expertise The administrators and others responsible for implementing these programs must concern themselves with the policies that impinge on the adoption and consequences of new production methods so that their countries may reap the full benefits of an increased and stable food supply The International Potato Industry Joseph Guenthner, 2001-11-01 This is the first book to provide a comprehensive overview of the world trade in one of the most important of our basic foodstuffs potatoes It covers everything from the history of the potato through to plant types and uses production consumption and demand and pricing It goes on to cover the trade in potatoes around the world Since the different potato products flow in separate channels fresh potatoes frozen potatoes seed potatoes and the snack and dehydrated trade each is described individually The international potato industry is a fascinating reference source which is essential reading not only for the growers processors retailers marketers and others involved in the production chain but also for agricultural economists fresh produce brokers and traders and national and international economic planning agencies The first book to provide a comprehensive overview of the world potato trade Covers everything from the history of the potato through to plant types and uses production consumption and demand to pricing Analyses the trade in fresh potatoes frozen potatoes seed potatoes and the fast food snack food and dehydrated potato industries

Potato production and innovative technologies Anton J. Haverkort, Boris V. Anisimov, 2023-08-28 This comprehensive book is the result of the Potato Russia international conference that took place in August 2007 in Moscow It begins with a series of papers that give an excellent overview of consumer behaviour and marketing with examples from various countries in the world The quality of processing and ware potato and methods of quantifying it is addressed by papers that highlight its need and reveal new approaches and techniques The newest developments in technology mechanization and storage are highlighted in papers from eastern and western Europe The importance and benefits of having adequately functioning seed potato systems with up to date rapid multiplication systems is shown in chapters from various countries with a special contribution on the commercial quality standards of the United Nations Economic Commission for Europe UNECE Developments of recent agronomic and crop management practices are illustrated with examples of countries in technological and market transition Innovations in crop protection put special emphasis on diagnostics and detection of resistance levels among others against wart The extensive Russian breeding programmes with value for the global potato community are highlighted in the breeding section with additional papers from Japan and the Netherlands The book ends with a series of papers on molecular aspects of innovative breeding This book is of wide and ongoing interest to stakeholders around the world who are interested in all aspects of the rapidly evolving potato supply chains such as potato producers breeding chemical and machinery companies and potato specialists of all disciplines

Potato Marketing in Developing Countries , **Program Report 1993-1994** International Potato Center , Potato Production Worldwide Mehmet Emin Caliskan, Allah Bakhsh, Khawar Jabran, 2022-10-22 Potato is a crop grown on all inhabited continents of the globe It is included in the top five crops of the world used as staple food in several countries and the number of people daily consuming the potato may surpass one billion Despite the high quantities of seed potato produced worldwide there are yield gaps due to challenges such as abiotic stresses pests climate change and poor production practices A region wide critical analysis of yield declining factors can help formulate management strategies that can improve potato yields Bridging yield gaps in potato will ultimately ensure the role of this crop in securing current and future food security Potato Production Worldwide presents information on this global crop from its history morphology and taxonomy to the growth and development of the potato crop including the latest strategies in addressing today's biotic and abiotic challenges This book identifies the reasons for yield gaps in various potato production regions of the world as well as presenting the best production practices pest management strategies and approaches to deal with climate change from the perspective of potato production Chapters provide important insights into potato production cultures and approaches in the major potato production countries Potato Production Worldwide will be a valuable resource for researchers scientists and students seeking a comprehensive view of successful potato production Provides comprehensive information on the origin history taxonomy morphology ecophysiology growth and development of the potato Addresses production practices including irrigation nutrient management harvesting and post

harvest techniques Explores the impact of Abiotic stresses drought chilling salinity etc and their management **Advances in Research on Potato Production** Shashank Shekhar Solankey, 2025-06-11 Potato *Solanum tuberosum* L is the world's third most important food crop and the fourth most important food crop in India Potatoes are nutritionally rich fat free gluten free and high in dietary fibre They are also a good source of vitamin C vitamin B6 phenols iron potassium phosphorus magnesium and protein as compared to cereals They are more energy packed than any other popular vegetables and have the ability to combat hidden hunger which is a major global health issue The potato is also considered the king of vegetables due to its versatile uses and is an important staple food worldwide According to the FAOSTAT database 2023 global potato production in 2022 was 375 million tonnes with the top producers being China 95.5 million tonnes and India 56 million tonnes The United Nations declared 2008 the International Year of the Potato IYP to increase awareness of the relationship that exists between poverty food security malnutrition and the potential contribution of the potato in defeating hunger Moreover this magical crop can generate a higher yield compared to the other crops hence it is one of the most notable crops to eliminate hunger and poverty Therefore sustainable potato production is important for food security and social welfare in future climate change scenarios It is important to inform that potatoes have a shallow root system and are highly sensitive to environmental conditions and climate change It is projected that potato yield may decrease up to 32 per cent by 2050 due to increasing temperatures and drought conditions Thus future potato breeding programmes should focus on enhancing abiotic and biotic stress tolerance through the utilization of the natural germplasm conserved in different gene banks along with climate friendly agronomical practices Moreover potato breeding should benefit from the effectiveness and ease of molecular techniques such as marker assisted selection genome wide association studies functional genomics and transgenics The development of new potato varieties can also be achieved via genetic engineering and genome editing Disease free potato seed production requires the integration of tissue culture methods followed by the production of mini tubers under an aeroponic system As it is a staple food for millions and demand for potatoes will increase in the future which makes this crop suitable for future research Hence the present book is formulated for professionals researchers and post graduate students who are working with advanced production breeding and post harvest technologies on potato crop specially in Indian perspective Een onderzoek naar een integraal magazijnbeheersingssysteem bij Curver Brunssum, Molecular Methods for Potato Improvement, 1991 Optimizing Potato Productivity in Developing Countries, Program Report 1995-96, 1997-12-22 Nothing provided **Publications of the International Agricultural Research and Development Centers**, 1989 **The Potato as a Food Crop for the Developing World** Douglas E. Horton, International Potato Center. Social Science Department, 1980 Potato Science and Technology G. Lisinska, W. Leszczynski, 1989-07-31 This book is an excellent starting point for students and should be read by all concerned with the industry researchers growers traders and processors *Journal of Agricultural Science* *Potato* Pinky Raigond, Brajesh Singh, Som Dutt, Swarup Kumar

Chakrabarti,2020-10-05 This informative book focuses on the nutritional value of potatoes and ways to improve it With the world reeling under the burden of an ever growing population there is a pressing need for affordable and nutritious staples to feed the billions Potatoes are grown in a broad range of countries around the world and can substantially contribute to future food security Given the increasing consumption of potatoes there is a need for a book that compiles information on and raises awareness of their nutritional value while also encouraging their consumption The respective chapters of this book cover the chemical composition structure and health benefits of potatoes as well as genetic modifications used to alter the concentration of relevant chemical compounds in them The book provides an overview of potatoes as a nutrient dense crop and discusses important aspects such as the role of potatoes in human diet how they can improve the overall health of individuals their role in addressing malnutrition etc Its chapters deal with topics such as carbohydrates and glycemic index dietary fibers vitamins proteins phenols carotenoids anthocyanins minerals lipids glycoalkaloids new health promoting compounds the composition and utilization of potato peel nutritional significance of potato products and potato probiotics Given its scope the book will be of interest to undergraduate students graduate students and researchers in plant physiology and biochemistry plant genetic engineering the food sciences and agriculture as well as industry partners in related fields

The Potato Crop P.M. Harris,2012-12-06 Research and publications on the potato crop have burgeoned since the first edition of this book was published in 1978 However the warm reception of the first edition suggested that it had a useful part to play in promoting the scientific basis for understanding and improving the yield and quality of the crop Since the first edition was out of print and a second reprint would not have taken into account the contributions made by research over the intervening years it became obvious that a complete revision was necessary There was in particular a need to take account of the rapid extension of interest in the crop into climates and farming systems with which it has not been traditionally associated Those involved with the crop will be sadly aware that a number of contributors to the first edition are no longer with us Their contribution to our knowledge of the crop will however be a permanent legacy of their achievement I would like to thank all those who have contributed to the book for their willingness to cooperate in the difficult task of bringing their particular subject up to date This is even more noteworthy for the pressure of time appears to be almost an order of magnitude higher than it was when the first edition was tackled
