Potential Function Methods For Approximately Solving Linear Programming Problems Theory And Practice:

Potential Function Methods for Approximately Solving Linear Programming Problems: Theory and Practice Daniel Bienstock,2013-03-26 Potential Function Methods For Approximately Solving Linear Programming Problems breaks new ground in linear programming theory The book draws on the research developments in three broad areas linear and integer programming numerical analysis and the computational architectures which enable speedy high level algorithm design During the last ten years a new body of research within the field of optimization research has emerged which seeks to develop good approximation algorithms for classes of linear programming problems This work both has roots in fundamental areas of mathematical programming and is also framed in the context of the modern theory of algorithms The result of this work in which Daniel Bienstock has been very much involved has been a family of algorithms with solid theoretical foundations and with growing experimental success This book will examine these algorithms starting with some of the very earliest examples and through the latest theoretical and computational developments **Potential Function Methods for Approximately Solving Linear Programming Problems: Theory and Practice** Daniel Bienstock,2006-04-11 Potential Function Methods For Approximately Solving Linear Programming Problems breaks new ground in linear programming theory The book draws on the research developments in three broad areas linear and integer programming numerical analysis and the computational architectures which enable speedy high level algorithm design During the last ten years a new body of research within the field of optimization research has emerged which seeks to develop good approximation algorithms for classes of linear programming problems This work both has roots in fundamental areas of mathematical programming and is also framed in the context of the modern theory of algorithms The result of this work in which Daniel Bienstock has been very much involved has been a family of algorithms with solid theoretical foundations and with growing experimental success This book will examine these algorithms starting with some of the very earliest examples and through the latest theoretical and computational developments *Integer Programming and Combinatorial Optimization* Friedrich Eisenbrand,Bruce Shepherd,2010-06-09 Theidea ofa refereedconferencefor the mathematicalprogrammingcommunity was proposed by Ravi Kannan and William Pulleyblank to the Mathematical Programming Society MPS in the late 1980s Thus IPCO was born and MPS has sponsored the conference as one of its main events since IPCO I at the University of Waterloo in 1990 The conference has become the main forum for recent results in Integer Programming and Combinatorial Optimization in the non Symposium years This volume compiles the papers presented at IPCO XIV held June 9 11 2010 at EPFL in Lausanne The scope of papers considered for IPCO XIV is likely broader than at IPCO I This is sometimes due to the wealth of new questions and directions brought from related areas It can also be due to the successful application of math programming techniques to models not tra tionally considered In any case the interest in IPCO is greater than ever and this is re ected in both the number 135 and quality of the submissions The ProgrammeCommittee with 13 memberswasalsoIPCO
