H. Duncan, Penny Hawkins, 2009-12-29 Animal welfare is attracting increasing interest worldwide especially in developed countries where the knowledge and resources are available to at least potentially provide better management systems for farm animals as well as companion zoo and laboratory animals The key requirements for adequate food water a suitable environment appropriate companionship and good health are important for animals kept for all of these purposes There has been increased attention given to farm animal welfare in many countries in recent years This derives largely from the fact that the relentless pursuit of financial reward and efficiency to satisfy market demands has led to the development of intensive animal production systems that challenge the conscience of many consumers in those countries In developing countries human survival is still a daily uncertainty so that provision for animal welfare has to be balanced against human needs Animal welfare is usually a priority only if it supports the output of the animal be it food work clothing sport or companionship In principle the welfare needs of both humans and animals can be provided for in both developing and developed countries if resources are properly husbanded In reality however the inequitable division of the world s riches creates physical and psychological poverty for humans and animals alike in many parts of the world **Instant Insights: Ensuring the welfare of broilers** Dr Ingrid De Jong, Dr Rick van Emous, Dr T. B. Rodenburg, Dr Gina Caplen, Prof Marian Dawkins, Dr Elizabeth Rowe, Dr Anja Brinch Riber, 2024-02-20 Addresses the detrimental impact of intensive poultry production systems on broiler health and welfare Reviews the application of technologies as a means of monitoring and automating welfare assessments of broilers Details the development of key health conditions in intensively reared broilers as a result of poor housing conditions and feed and water restrictions Domestic Animal Behaviour... Broom, D.M., Fraser, A.F., Behaviour is a significant indicator of health in animals and understanding behaviour is the key to good management Animal behaviour and animal welfare science are fast becoming core topics in the curricula of agriculture and veterinary students The eagerly awaited fourth edition of Farm Animal Behaviour and Welfare builds on the coverage of the previous edition fully updating it to take into account developments over the last 10 years This new edition covers companion animals as well as farm animal species including farmed fish It is an indispensable textbook covering the major and growing areas in agricultural and veterinary science and practice There is now a 5th Edition of this book for sale Achieving sustainable production of poultry meat Volume 3 Todd Applegate, 2017-08-31 To meet growing demand the FAO has estimated that world poultry production needs to grow by 2.3% per year to 2030 Much of the increase in output already achieved has been as a

result of improvements in commercial breeds combined with rearing in more intensive production systems. However, more intensive systems have increased the risk of transmission of animal diseases and zoonoses. Consumer expectations of sensory and nutritional quality have also never been higher. At the same time, consumers are more concerned about the environmental impact of poultry production as well as animal welfare. Drawing on an international range of expertise, this book reviews research on poultry health and welfare. Part 1 begins by reviewing the range of diseases and other health issues affecting poultry. It then goes on to discuss ways of preventing and managing disease such as breeding and means of attenuating the immune system. The second part of the book discusses welfare issues such as management of breeding flocks, housing, transport and humane slaughter techniques. *Achieving sustainable production of poultry meat Volume 3: Health and welfare* will be a standard reference for poultry and food scientists in universities, government and other research centres and companies involved in poultry production. It is accompanied by two further volumes which review safety, quality and sustainability as well as poultry breeding and nutrition. *The Ethology of Domestic Animals* Per Jensen, 2017-09-27

The Language of Law and Food Salvatore Mancuso, 2021-04-27 This book reconsiders the use of food metaphors and the relationship between law and food in an interdisciplinary perspective to examine how food related topics can be used to describe or identify rules norms or prescriptions of all kinds The links between law and food are as old as the concept of law Many authors have been using such links in creative ways to express specific features of law This is because the language of food and cooking offers legal thinkers and teachers mouth watering metaphors comparing rules to recipes and their combination to culinary processes This collection focuses on this relationship between law and food and takes us far beyond their mere interaction to explore different ways of using these two apparently so diverse elements to describe different phenomena of the legal reality The authors use the link between food and law to describe different aspects of the legal landscape in different areas and jurisdictions Bringing together metaphors and indirect correlations between law and food the book explores different models of approaching legal issues and considering different legal challenges from a completely new perspective in line with the multidisciplinary approach that leads comparative legal studies today and to a certain extent revisiting and enriching it With contributions in English and French the book will be of interest to academics and researchers working in the areas of law and food law and language and comparative legal studies
