Ending poverty

In **politics**, the fight against poverty is usually regarded as a social goal and many governments have institutions or departments dedicated to tackling poverty. One of the main debates in the field of poverty reduction is around the question of how actively the state should manage the economy and provide public services to tackle the problem of poverty. In the nineties, international development policies focused on a package of measures known and criticized as the "**Washington Consensus**" which involved reducing the scope of state activities, and reducing state intervention in the economy, reducing trade barriers and opening economies to foreign investment. Vigorous debate over these issues continues, and most poverty reduction programs attempt to increase both the competitiveness of the economy and the viability of the state.

Poverty And Development In The Nineteen Nineties:

Inequality, Poverty and Development in India Utpal Kumar De, Manoranjan Pal, Premananda Bharati, 2017-11-24 This book reviews the fulfillment of two Millennium Development Goals MDGs namely poverty and inequality in the Indian subcontinent. It examines the complex interplay among development, inequality and poverty in relation to corruption, environmental resource management, agricultural adjustment to climate change and institutional arrangements with a special focus on the Northeastern region of the country. The topics covered offer a blend of theoretical arguments and empirical data with regard to the three main themes of the book while also providing agricultural and environmental perspectives. The book also provides guidelines for policy initiatives for harnessing the region's potential in the areas of industry, trade, sustainable use of mineral, forest and other natural resources, nature based tourism through proper infrastructure development and resolving land issues to achieve inclusive development. In addition to introducing some new questions on the development-ethnic conflict interface, it uses sophisticated tools such as the Blinder-Oaxaca decomposition method in consumption expenditure to show the endowment and return to endowment effects and techniques like spatial correlation regression to analyze regional variation, cointegration, vector autoregression, the panel data technique and the adaptation index to climate change to understand socio-economic complexities and the effect of the concerned variables on entrepreneurship and human development. The book offers a timely contribution to our understanding of major MDGs and highlights their successes and failures. It also includes analytical frameworks that are key to future policy initiatives. Further, it disseminates approaches and methods that improve livelihoods and standards of living through poverty reduction and promoting inclusive development along with sustainable utilization of available natural resources. Putting forward various ideas for creating a more sustainable future, it inspires and encourages readers to pursue further studies to address the gaps that still remain. *Sustainable Human Development in the Twenty-First Century - Volume II* Ismail Sirageldin, 2008-12-31 Sustainable Human Development in the Twenty-First Century is a component of Encyclopedia of Human Resources Policy Development and Management in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty Encyclopedias. The volume of Human Development examines the state and nature of human development and identifies factors that determine its promotion for the twenty-first century. A general goal since the ultimate goal for human development is to enhance the quality of human life. However, the concept quality of human life is not well defined. It is determined by a set of interrelated factors that cut across many disciplines with varied perspectives and paradigms. These include the prevailing culture, health status, economic performance, technological development, political and social conditions, the building of human capacity and capabilities and institutional development on the local and global levels. For example, in an environment characterized by a better quality of human life, it is expected that people will be able to lead long and productive lives. They are also expected to enjoy good health, have access to knowledge and educational opportunities and be treated by all with respect in a socially

equitable and dignified manner In the sphere of political economy they are expected to have the opportunity to participate in governance decisions that affect their lives and the community in which they live and to have the potential to earn sufficient income to supply themselves with adequate nutrition shelter and other material and aesthetic needs Furthermore people are expected to maintain a sustainable environment and equitable social contracts across space and generations especially in the context of the evolving global governance The volume of Sustainable Human Development in the Twenty First Century is divided into five topics which are then expanded into multiple subtopics each as a chapter presented in two volumes The first is Major issues in Human Development and provides an over view of the Topic with emphasis on the sociological foundation of human development The second Topic Diversity and Historical Processes reviews the historical and technological processes which have led to the present state of human diversity and differentiation The third Topic Causes of Global Change focuses on whether it is possible in the present global environment to enlarge people s capabilities so that economic progress may be translated into a multidimensional human happiness The fourth Topic Consequences of Global Change examines global change not in the narrow sense of short term economic change but rather as historical waves of long term development The fifth Topic on Planning Strategies reviews current practice and projects challenges in the next century These two volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs

India's Perception, Society, and Development Arup Maharatna,2013-05-09 There has been of late a growing realisation that the pace and pattern of economic development of a country can hardly be understood and explained comprehensively in terms of the straitjacket of economics discipline alone India is a prime example of the importance of the part played by a country s history culture sociology and socio cultural religious norms values and institutions in its development process This book with its assorted essays of varying depths of scholarship and insightful reflections attempts to drive home this point more forcefully than ever before In its search for the non economic roots of India s overall sloth and murky progress in its broad based economic and human development the book illuminates major oddities deep inside a unique mental make up full of perceptual and ideational dilemmas many of which are arguably shaped by the long lasting and dominant influence of what could be called the Brahminical lines of thinking and discourse With India s hazy and dodgy world of perceptions as a backdrop the book also addresses through its intelligent essays the deep and sometimes dire ramifications of the historic advent and the dramatic advance of neoliberal market ideology today

Poverty Alleviation through Self-Help Groups in Anantapur District of Andhra Pradesh R. Neelaiah, 2017-06-27 In developing economies and particularly in rural areas many activities that would be classified in the developed world as financial are not monetized That is there is no money used to carry them out This is often the case when people need the services money can provide but do not have dispensable funds required for those services forcing them to revert to other means of acquiring them People find creative and often collaborative ways to meet the needs primarily through creating and exchanging different forms of non cash value Common substitutes for cash vary from country to country but typically include livestock grains jewelry and precious metals In the 2000s the micro finance industry s objective is to satisfy the unmet demand on a much larger scale and to play a role in reducing poverty While much progress has been made in developing a viable commercial micro finance sector in the last few decades several issues remain that need to be addressed before the industry will be able to satisfy massive worldwide demand
