## **Poverty And Deviance In Early Modern Europe:**

**Poverty and Deviance in Early Modern Europe** Robert Jütte, 1994-03-31 This study provides an accessible and authoritative account of poverty and deviance during the early modern period informed by those perspectives on the role of the poor themselves in the provision of welfare services characteristic of much recent social history Robert Jütte shows how the notions of poverty and social deviance that preoccupied much contemporary thought saw their ultimate fruition in the systematic programmes for social welfare that emerged during the nineteenth century Contrary to the once traditional historical emphasis on the ameliorative role of individual reformers Professor Jütte's account looks much more closely at the poor themselves and the complex network of social and communal relationships they inhabited He examines the lives not only of poor relief recipients but of the vast number of destitute individuals who had to find other means to stay alive and how these people shaped their own patterns of survival within given communities

**Others and Outcasts in Early Modern Europe** Tom Nichols, 2017-07-12 Others and Outcasts in Early Modern Europe is the first book to focus directly on the visual representation of marginal and outcast people in early modern Europe The volume offers a comprehensive and groundbreaking analysis of a wide range of images featuring Jews and Turks roguish beggars syphilitics and plague victims the deserving poor toothpullers beggar philosophers black slaves itinerant actors and street hawkers Its broad geographical and chronological scope allows the reader to build a wider picture of visual strategies and conventions for the depiction of the poor and the marginal as they developed in countries such as Germany the Netherlands Italy Spain Britain and Ireland While such types had often been depicted in earlier centuries the essays show that they came to play a newly significant and formative role in European art between 1500 and 1750 Marking a clear departure from much previous scholarship on the subject which has tended to view representations of poverty as passive by products of non visual forces these essays place the image itself at the centre of the investigation The studies show that many depictions of socially marginal people operated in essentially hegemonic fashion as a way of controlling or fixing the social and moral identity of those living on the edge At the same time they also reveal the inventiveness and originality of many early modern artists in dealing with this subject matter showing how the sophisticated visuality of their representations could render meaning ambiguous in relation to such controlling discourses

Humanism and the Culture of Renaissance Europe Charles G. Nauert,2006-05-04 In this updated edition of his classic account Charles Nauert charts the rise of humanism as the distinctive culture of the social political and intellectual elites in

**Biographies of a Reformation** Martin

Christ, 2021-05-07 *Biographies of a Reformation Religious Change and Confessional Coexistence in Upper Lusatia c 1520-1635* investigates how religious coexistence functioned in six towns in the multiconfessional region of Upper Lusatia in Western Bohemia. Lutherans and Catholics found a feasible *modus vivendi* through written agreements and regular negotiations. This meant that the Habsburg kings of Bohemia ruled over a Lutheran region. Lutherans and Catholics in Upper Lusatia shared spaces, objects, and rituals. Catholics adopted elements previously seen as a firm part of a Lutheran confessional culture. Lutherans too were willing to incorporate Catholic elements into their religiosity. Some of these overlaps were subconscious while others were a conscious choice. This book provides a new narrative of the Reformation and shows that the concept of the urban Reformation, where towns are seen as centres of Lutheranism, has to be reassessed, particularly in towns in former East Germany where much work remains to be done. It shows that in a region like Upper Lusatia, which did not have a political centre and underwent a complex Reformation with many different actors, there was no clear confessionalization. By approaching the Upper Lusatian Reformation through important individuals, Martin Christ shows how they had to negotiate their religiosity, resulting in cross-confessional exchange and syncretism.
