Poverty And Incentives The Economics Of Social Security:

Poverty and Incentives Richard Hemming, 1984 An account of the Social Security system in Britain and how it influences the lifestyle of the poorest within our society **The Oxford Handbook of the Economics of Poverty** Philip N. Jefferson, 2012-11-29 This Handbook examines poverty measurement anti poverty policy and programs and poverty theory from the perspective of economics It is written in a highly accessible style that encourages critical thinking about poverty What s known about the sources of poverty and its alleviation are summarized and conventional thinking about poverty is challenged **International Analysis Poverty** Peter Townsend, 2014-06-06 First published in 1993 The scientific and political debate about poverty has been changing fast with dramatic implications for intellectual interpretation and action by governments and the intention in publishing this volume is to contribute to that debate Scientists concerned to analyse poverty have been thrust by events into greater international service But there are sinister forces at work which are seeking to divert them into petty issues to blame the victims of poverty or to cut them off from the resources or opportunities to investigate and report freely This book is born of that frustration and represents the changing debate during the late 1980s and early 1990s *Incomes and the Welfare State* Anthony Barnes Atkinson, 1995 The Welfare State is a key policy issue of the 1990s The essays in this book depart from much of the recent economic debate in emphasising the positive contributions of the Welfare State and in assessing its efficiency in relation to the objectives which it is intended to achieve These objectives are not just the alleviation of poverty but more broadly the provision of security and the redistribution of income Part A of the book sets the current debate in the context of the current evidence about income inequality and poverty in Europe Part B analyses the existing role of the Welfare State with particular reference to retirement pensions and unemployment benefit Part C investigates proposals for reform and security What is the case for greater targeting How can we design a social safety net What is the future of European social protection policy **The Economics of Poverty** Martin Ravallion, 2016 An overview of the economic development of and policies intended to combat poverty around the world Provided by publisher **Why We Need a Citizen's Basic Income** Malcolm Torry, 2018-05-09 In the five years since Money for Everyone was published the idea of a Citizen s Basic Income has rocketed in interest to an idea whose time has come In moving the debate on from the desirability of a basic income this fully updated and revised edition now includes comprehensive discussions on feasibility and implementation Using the consultation undertaken by the Institute of Chartered Accountants in England and Wales as a basis Torry examines a number of implementation methods for Citizen s Basic Income and considers the cost implications Including real life examples from the UK and data from case studies and pilots in Alaska Namibia India Iran and elsewhere this is the essential research based introduction to the Citizen s Basic Income **Economics** James D Gwartney, Richard Stroup, 2014-05-10 Economics Private and Public Choice Second Edition deals with modern Keynesian theory monetarist theory collective decision making and the traditional demand side of macroeconomics

The book explains economic principles such as taxation government expenditure public choice theory rate of employment aggregate supply fiscal policy low productivity inflation and adaptive expectation hypothesis The text also covers microeconomics particularly capital interest profits energy market and the indifference curve analysis The book discusses inequality income mobility and the battle against poverty where a market system can encourage the careful use of resources high productivity and freedom of choice for individuals to bear the costs and reap the benefits The text points out that income redistribution can result in some conflicts As an example the book analyzes income inequality in the United States income inequality in other countries as well as its causes The book also describes the characteristics of less developed countries as having low per capita income dominance of agriculture household sector rapid population growth income that is more unequally distributed including inadequate health care and education The book is suitable for economists sociologists and policy makers involved in national economic development

Optimal Redistributive Taxation Matti Tuomala, 2016-01-21

Tax systems raise large amounts of revenue for funding public sector activities and tax transfer policy together with public provision of education health care and social services play a crucial role in treating the symptoms and the causes of poverty The normative analysis is crucial for tax transfer design because it makes it possible to assess separately how changes in the redistributive criterion of the government and changes in the size of the behavioural responses to taxes and transfers affect the optimal tax transfer system Optimal tax theory provides a way of thinking rigorously about these trade offs Written primarily for graduate students and researchers this volume is intended as a textbook and research monograph connecting optimal tax theory to tax policy It comments on some policy recommendations of the Mirrlees Review and builds on the authors work on public economics optimal tax theory behavioural public economics and income inequality The book explains in depth the Mirrlees model and presents various extensions of it The first set of extensions considers changing the preferences for consumption and work behavioural economic modifications such as positional externalities prospect theory paternalism myopic behaviour and habit formation but also heterogeneous work preferences besides differences in earnings ability The second set of modifications concerns the objective of the government The book explains the differences in optimal redistributive tax systems when governments instead of maximising social welfare minimise poverty or maximise social welfare based on rank order or charitable conservatism social welfare functions The third set of extensions considers extending the Mirrlees income tax framework to allow for differential commodity taxes capital income taxation public goods provision public provision of private goods and taxation commodities that generate externalities The fourth set of extensions considers incorporating a number of important real word extensions such as tagging of tax schedules to certain groups of tax payers In all extensions the book illustrates the main mechanisms using advanced numerical simulations

Social Assistance in Developing Countries Armando Barrientos, 2013-08-15 The rapid spread of large scale and innovative social transfers in the developing world has made a key contribution to the significant reduction in global poverty over the last

decade Explaining how flagship anti poverty programmes emerged this book provides the first comprehensive account of the global growth of social assistance transfers in developing countries Armando Barrientos begins by focusing on the ethical and conceptual foundations of social assistance and he discusses the justifications for assisting those in poverty He provides a primer on poverty analysis and introduces readers to the theory of optimal transfers He then shifts the focus to practice and introduces a classification of social assistance programmes to help readers understand the diversity in approaches and design in developing countries The book concludes with an analysis of the financing and politics of the emerging institutions and of their potential to address global poverty The Conservatives' Economic Policy (Routledge Revivals) Grahame

Thompson,2014-11-13 What happened to economic policy during the first five years of Mrs Thatcher's government Most commentators have emphasised the radical changes wrought in economic theory and policy over the period from 1979 The left saw this as heralding the introduction of the social market economy and authoritarian populism the right saw it as evangelical monetarism and a new beginning This book first published in 1986 challenges the notion that there was a revolution in economic policy making It emphasises the constraints on economic policy formation and the ironies that these have thrown up with respect to the Conservatives attempts at changing the course of the economy The book argues that the Thatcher government had not been able to implement a great deal of its rhetoric This book is ideal for students of economics and politics Econometrics and Income Inequality Martin Biewen,Emmanuel Flachaire,2018-11-26 This book is a printed

edition of the Special Issue Econometrics and Income Inequality that was published in Econometrics **Intrahousehold Inequality and the Theory of Targeting** Lawrence James Haddad,S. M. Ravi Kanbur,1991 Here is a start at linking the literatures on targeting and on intrahousehold inequality which have developed rapidly but largely independent of each other

The Transformation of Citizenship, Volume 1 Juergen Mackert, Bryan S. Turner, 2017-03-16 The Transformation of Citizenship addresses the basic question of how we can make sense of citizenship in the twenty first century These volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an ongoing erosion of citizenship rights Arguing from different scientific perspectives rather than offering new conceptions of citizenship as supposedly more adequate models of rights membership and belonging they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions This volume Political Economy discusses manifold consequences of a decades long enforcement of neo liberalism for the rights of citizens As neo liberalism not only means a new form of economic system it has to be conceived of as an entirely new form of global regional and national governance that radically transforms economic political and social relations in society Its consequences for citizenship as a social institution are no less than dramatic Against the background of both manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades or if the institution itself is in a process of being fundamentally transformed and restructured thereby changing its meaning and the significance of citizens rights This book will appeal to academics working in the field of political theory political sociology and European studies
