The Politics of Differentiation in Schools Martin Mills, Amanda Keddie, Peter Renshaw, Sue Monk, 2016-10-26 In many English speaking countries teachers are encouraged to differentiate their classrooms and in some cases through various policy mechanisms This encouragement is often accompanied by threats and sanctions for not making the grade By exploring the ways in which one education system in Australia has mandated differentiation through an audit of teacher practices this book provides a timely engagement with the relationship between differentiated classrooms and social justice It covers tensions for instance between providing culturally appropriate classrooms including constructing engaging and relevant curricula and lowering expectations for students who have traditionally been marginalised by schooling The data for this book has been collected from the same group of teachers over a period of three years and offers detailed insights into how a particular politics of differentiation has played itself out in the context of a global reform movement that has focused on improving student outcomes

Numerous real-life examples, reflections, articles, and case studies assist students to understand a variety of educational theories, philosophies, and frameworks. Risk Management and Public Service Reform Iniobong Enang, 2023-04-28

School education reform is a dynamic process. It takes place in the context of changing institutional structures, including society, economy, politics, legislation, and technology. Yet, there can be poor awareness of risk, particularly social risk, and its management during this process, and more widely during public service reform (PSR). This book aims to promote new PSR understanding about social risk management. It utilizes, in depth, case studies comprising two anonymous Scottish councils responsible for providing and reforming school education services. Drawing mainly on risk management and structuration theories, with elements of complexity, leadership, and institutional theories, the book explains contextual issues around the reform of Scottish school education services (SSes). It illustrates that social risks associated with reform can be used to explain emerging threats. Furthermore, it demonstrates that agent-structure duality may be instrumental to the production and management of social risks. The book also shows how the concept of social risk can be used to improve policy making and implementation. Targeted at practitioners, researchers, policymakers, and students, this book will be of interest to those in the fields of public administration, public service management, and risk management more generally.

Educational Leadership and Nancy Fraser Jill Blackmore, 2016-06-10

Drawing on the work of Nancy Fraser, this book offers a critical view of contemporary educational leadership and reform discourses, exploring how her key concepts of redistribution, recognition, and representation may apply to social and therefore educational justice. Fraser offers a political and pragmatic reconciliation between feminist, neo-Marxist, critical, and post-structuralist theories. This book outlines how Fraser has worked on and worked over theories of social justice and how this can inform how we can understand educational theory, policy, and practice generally. In particular, the book focuses on the field of educational administration and leadership (ELMA) as it relates to equity issues such as school choice and inequality, gender, and inclusive leadership, and alternative schooling. Fraser's argument

about scaling up social justice theory is shown to be highly salient given the emergence of the field of transnational education policy and its role in the context of intensified nation state and edu business competition Overall through the lens of Nancy Fraser s unitary framework this book considers epistemological questions about the nature of knowledge examines the relationship between the state the individual education and social movements addresses the difficulties and dilemmas which arise due to the intersections of gender class race sexuality and culture in a globalized context and illustrates how the principles of social justice can be mobilized by leaders in everyday practice Educational Leadership and Nancy Fraser is an illuminating read for those policymakers researchers and practitioners engaged in the field of educational administration leadership and social justice

Economic Reforms, Growth and Inequality in Latin America Gustavo Indart, 2019-06-04 Originally published in 2004 Growth income distribution and labour markets are issues of pivotal importance in the Latin American context Examining unique theoretical issues and the empirical evidence this book provides a critical analysis of the key elements of income distribution determinants labour market functions trade policies and their interrelations As the advance of globalization becomes seemingly unstoppable this book provides an important reappraisal of the impact of this new phenomenon and in particular the pernicious impact it may have on income growth and distribution The key objective of the volume is to integrate more
