Poverty Reduction And The Role O:

Business, Entrepreneurship and Innovation Toward Poverty Reduction Steven Si, David Ahlstrom, Wei Jiang, John Cullen, 2021-07-26 Ways in which poverty can be reduced in both countries and regions through business entrepreneurship and government has been a hot issue for researchers and policymakers in recent years Governments can play an important role in helping the poor people by non profit organizations and others that help to seed business among the poor Businesses increasingly also see the large number of people in severe poverty not only as an issue for social concern but also as a potentially large untapped market of consumers for goods and services Some scholars have called for poverty reduction through entrepreneurship owing to the fact that it can be an efficient path to also change the poor s attitudes and behaviours from a passive mode to a more active mode towards poverty reduction economically and socially In addition the sharing economy brings opportunities where everyone is a micro entrepreneur There is a recognition that these types of entrepreneurship above could offer the greatest single potential means to move individuals out of poverty in the nations and regions in the next 5 10 years This book provides new and valuable analyses of poverty and business entrepreneurship and innovation in current nations and regions including developing and developed countries As business entrepreneurship and innovation can help to generate greater business activity in settings of severe poverty they will help to solve poverty as individuals in severe poverty are able to both generate greater incomes and accumulate greater assets as they participate with large firms in those activities The chapters in this book were originally published as a special issue of the Entrepreneurship Regional Development

Four Decades of Poverty Reduction in China World Bank; Development Research Center of the State Council, the People's Republic of China, 2022-09-22 Regardless of the poverty line used the speed and scale of China s poverty reduction is historically unprecedented Over the past 40 years the number of people in China with incomes below US 1.90 per day the international poverty line as defined by the World Bank to track global extreme poverty has fallen by close to 800 million accounting for almost three quarters of the global reduction in extreme poverty In 2021 China declared that it had eradicated extreme poverty according to its national poverty threshold and that it had built a moderately prosperous society in all respects However a significant number of people remain vulnerable with incomes below a threshold more typically used to define poverty in upper middle income countries China has set a new goal of approaching common prosperity by 2035 which can help keep the policy focus on the vulnerable population *Four Decades of Poverty Reduction in China Drivers Insights for the World and the Way Ahead* explores the key drivers of China s poverty alleviation achievements and considers the lessons of China s experience for other developing countries The report also makes suggestions for China s future policies China s approach to poverty reduction was based on two pillars The first aimed for broad based economic transformation to open new economic opportunities and raise average incomes The second was the recognition that targeted support was needed to alleviate persistent poverty this support was initially provided to

disadvantaged areas and later to individual households The success of China's economic development and the associated reduction of poverty also benefited from effective governance which helped coordinate multiple government agencies and induce cooperation from nongovernment stakeholders To illustrate the role of broad based economic transformation for poverty alleviation separate sections of the report analyze growing agricultural productivity incremental industrialization managed urbanization and rural to urban migration and the role of infrastructure

Development and Poverty Reduction Yongnian Zheng, Jiwei Qian, 2019-10-28 Although the absolute number of poor people in the world has declined significantly in recent decades poverty reduction continues to be a very important issue There still are very large numbers of poor people relative poverty is an increasingly concerning problem and progress on poverty reduction varies enormously from one part of the world to another Factors contributing to poverty reduction include economic growth economic integration and specific poverty reduction programs which are often initiated by Western countries This book considers poverty reduction from a global perspective Development and Poverty Reduction looks at a wide range of specific subjects across all continents It highlights in particular how the issues are perceived from a non Western perspective and especially how the rise of China is both having a profound impact on poverty reduction globally and also changing the overall way in which development and poverty reduction are approached
