Poverty Reduction What Role For The State In Today's Globalized Economy:

Poverty Reduction Francis Wilson, Nazneen Kanji, Einar Braathen, 2001-05 In this compilation local and international scholars turn the spotlight on the state's role in tackling poverty and social exclusion. They explore the difficult questions around how much can be expected of the state in poverty reduction. What political and cultural dimensions need to be taken into account when considering how it should help shape activity in society? How is the role of power best analysed when considering strategies to reduce poverty? What is the meaning of pro-poor governance? What can be expected of specific interventions by government? How is the concept of citizenship incorporated in poverty reduction programmes? The book provides an up-to-date information on poverty in Southern and Central Africa and the strategies and programmes by governments, aids and international institutions to tackle it.

Complex Systems Theory and Development Practice Samir Rihani, 2002 Ranging over a wide terrain of social, political and economic thinking and specific country experiences, the author explains the key concepts in complex systems theory and their possible applications in development practice. He examines various development issues and institutions in the light of what he sees as the limitations of rigid linear thinking in an essentially fluid, non-linear world. Little wonder he concludes that the results of half a century of development effort have been so disappointing.

BOOK JACKET The Social and Political Thought of Archie Mafeje Bongani Nyoka, 2020-08-01 This comprehensive treatment of Archie Mafeje as a thinker and researcher analyses his overall scholarship and his role as a theoretician of liberation and revolutionary theory. Social scientist Archie Mafeje, who was born in the Eastern Cape but lived most of his scholarly life in exile, was one of Africa's most prominent intellectuals. This ground-breaking work is the first of its kind to consider the entire body of Mafeje's oeuvre and offers a much-needed engagement with his ideas. The most inclusive and critical treatment to date of Mafeje as a thinker and researcher, the book analyses his overall scholarship and his role as a theoretician of liberation and revolution. Author Bongani Nyoka's main argument is that Mafeje's superb scholarship developed out of his experience as an oppressed black person and his early political education which merged with his university training to turn him into a formidable cutting-edge intellectual force. There are three main parts to the book: Part I evaluates Mafeje's critique of the social sciences; part II focuses on his work on land and agrarian issues in sub-Saharan Africa; and part III deals with his work on revolutionary theory and politics. The book engages in the act of knowledge decolonisation, making a unique contribution to South Africa's sociological, historical and political studies.

Tang, 2008-04-30 This book explores the complex relationship between social security and economic development arguing that social security contributes positively to economic development by promoting social investments that not only foster economic growth but enhance social welfare for all The contributors analyse the various forms of social security and through comprehensive analysis of country experiences demonstrates that the relationship between social security and economic development defies the simplistic interpretations currently popular in literature on the subject A variety of country case studies are explored including Britain Chile China India Korea Norway Singapore South Africa and the United States This topical volume is a vital companion for all interested in the dynamics of the relationship between social security and the economy Why Some Development Works Meera Tiwari, 2021-08-12 Why do some development projects succeed where others fail This book looks at some macro and some less known micro success stories and considers what enabled them to bring change in some of the world's most deprived communities Using case studies from ten countries across Latin America Africa and Asia Tiwari's innovative approach offers a multi-layered understanding of poverty which provides insights into causal enabling and impeding factors While a macro level analysis of development is a common feature of the current literature there has been little attempt to develop a micro level understanding of development at the grassroots Tiwari's work fills this important gap while drawing attention to the importance of engaging local actors at an individual collective and state level demonstrating how achieving a convergence of goals among all actors is a crucial component to a development project's success Looking beyond the case studies to consider how this unique convergence framework might be usefully applied to other contexts the book has profound implications for how we view fragile states and conflict zones and the ability of the international agencies to take effective action A unique study based on extensive empirical research *Why Some Development Works* will make essential reading for students and researchers studying international development across the social sciences as well as humanitarian and development practitioners and policy makers *Marx and Public Services* Tony Kinder, 2025-04-10 By evaluating previous public management research through Marxist concepts this textbook offers innovative solutions to public service problems It updates Marx's framework to reflect the growth of public services transitioning from abstract state notions to concrete service analysis Addressing two critical gaps the book highlights the benefits of a Marxist approach to public services and presents Marxist ideas to examine these services at a micro level It demonstrates the relevance of Marxist frameworks for public service professionals critically reviews current public management knowledge and sheds light on the dynamic nature of public services against the background of neoliberalism While doing so the book goes beyond a Eurocentric perspective providing cases and practical examples from developed and developing countries with an additional focus on Asian practices Written by an award winning author with years of practical experience and designed for graduate and advanced undergraduate students each chapter sets
