Handbook on Measuring Poverty and Deprivation Jacques Silber, 2023-03-02 Encompassing chapters that address both unidimensional and multidimensional poverty this timely Research Handbook explores all aspects of poverty and deprivation measurement not only detailing broad issues but also scrutinising specific domains and aspects of poverty such as health energy and housing Its succinct and highly focussed chapters written by a diverse range of authors employ a combination of theoretical and empirical methodologies to offer well rounded explorations of complex topics Measurement of Poverty,

Undernutrition and Child Mortality Mark Misselhorn, 2008 Although the world has seen a strong increase in global incomes in the last two decades and consequently a decline in global poverty rates the number of persons living in absolute poverty remains on unacceptably high levels Besides rising incomes can not distract from the fact that resources to fight global problems remain scarce These resources have to be devoted to the fight against different global problems like the fight against communicable and non communicable diseases especially HIV AIDS and Malaria or the fight against global warming The main precondition to achieve the best results with these limited resources is a good knowledge about the determinants and the best policies to fight each problem But before being able to analyze the determinants of the different global problems and especially of poverty it is of fundamental importance to find the right indicators for each phenomenon This book contributes to the discussion of appropriate poverty indicators for the different dimensions of poverty like income poverty undernutrition and child mortality and proposes a multidimensional poverty indicator that takes the income distribution into

consideration **A Sustainability Challenge** National Research Council, Policy and Global Affairs, Science and Technology for Sustainability Program, Committee on Food Security for All as a Sustainability Challenge, 2012-03-28 The National Research Council's Science and Technology for Sustainability Program hosted two workshops in 2011 addressing the sustainability challenges associated with food security for all. The first workshop, Measuring Food Insecurity and Assessing the Sustainability of Global Food Systems, explored the availability and quality of commonly used indicators for food security and malnutrition, poverty and natural resources and agricultural productivity. It was organized around the three broad dimensions of sustainable food security: 1. availability, 2. access and 3. utilization. The workshop reviewed the existing data to encourage action and identify knowledge gaps. The second workshop, Exploring Sustainable Solutions for Increasing Global Food Supplies, focused specifically on assuring the availability of adequate food supplies. How can food production be increased to meet the needs of a population expected to reach over 9 billion by 2050? Workshop objectives included identifying the major challenges and opportunities associated with achieving sustainable food security and identifying needed policy, science and governance interventions. Workshop participants discussed long-term natural resource constraints, specifically water, land and forests, soils, biodiversity and fisheries. They also examined the role of knowledge, technology, modern production practices and infrastructure in supporting expanded agricultural production and the significant risks to future productivity posed by climate change. This is a report of two workshops.

Caste and Gender in Contemporary India Supurna Banerjee, Nandini Ghosh, 2018-09-17 This book explores the intersectional aspects of caste and gender in India that contribute to the multiple marginalities and oppressions of lower castes with particular reference to Dalits, Muslims and women. It moves beyond the conventional accounts of experiences of women in unequal social and political relationships to examine how caste as a system and ideology shapes hegemonic masculinity and feminization of work and thus contributes to the violence against women. The volume looks at their everyday lived realities within and across diverse social and political contexts, families, education systems, labour communities, political parties, power, social organisations, the politics of representation and the writing of the subaltern women. With a range of empirical work, it brings forth the complexities of identity politics and further analyses its limits in regional and historical frameworks. This book will be of interest to students, scholars and specialists in caste and gender studies, exclusion and discrimination studies, sociology and social anthropology, history and political science. It will also be useful to Dalit writers and people working in the development sector in India.

Food, Energy and the Creation of Industriousness Craig Muldrew, 2011-02-03 Until the widespread harnessing of machine energy, food was the energy which fuelled the economy. In this groundbreaking 2011 study of agricultural labourers' diet and material standard of living, Craig Muldrew uses empirical research to present a much fuller account of the interrelationship between consumption, living standards and work in the early modern English economy than has previously existed. The book integrates labourers into a study of the wider economy and engages with the history of food

as an energy source and its importance to working life the social complexity of family earnings and the concept of the industrious revolution It argues that industriousness was as much the result of ideology and labour markets as labourers household consumption Linking this with ideas about the social order of early modern England the author demonstrates that bread beer and meat were the petrol of this world and a springboard for economic change *WORLD INSECURITY* Miguel Vilombo,2014 The world is increasingly becoming interdependent and this interdependency has raised the number of unmistakable vulnerabilities threats and risks The institutions of governance in weak and failing states are driving forces that often lead to environmental damage mismanagement of natural resources to the expansion of international terrorism inter religious violence transnational organized crime and to piracy activities that affect energy security in the Gulf of Guinea and Aden All this creates open security spaces whose impacts are national sub regional regional and threatens the international security order The UN and other intergovernmental bodies are often drawn in to mitigate conflicts and political crisis and to provide emergency humanitarian responses at very high costs The cost of post conflict society s recovery processes such as rebuilding institutions of governance is enormous due to financial and human resources commitment efforts Therefore to resolve insecurity problems a firefighter strategy is not good enough unless efforts are redirected towards information management and analysis of global trends to enable a more adequate response to the crisis The main issue is therefore to provide now and for future generations a response that has to be effective and adequate to both manmade and natural crisis

Fertile Bonds Suzanne E. Joseph,2017-01-10 A portrait of a group of Bedouins in the Bekaa Valley of Lebanon a population with the highest fertility rate in the world **Inside Poverty and Development in Africa** Marcel Rutten,André Leliveld,Dick Foeken,2008-10-15 When discussing development issues in Africa it is not sufficient to simply stress the ubiquity of failure malnutrition disease predatory states and war one also has to recognize that important aspects in the lives of millions of ordinary people have been transformed over the last five decades The contributions in this book are rooted in extensive empirical research at local regional and or national level in different African countries Chad Ethiopia Kenya Lesotho South Africa and Uganda while some take a pan African view All however offer insight from different analytical perspectives into the heterogeneity of poverty and development processes in Sub Saharan Africa and confront the ideas concepts and assumptions that lie behind pro poor policies The volume also encourages policy makers to choose realistic policy prescriptions in an attempt to move people out of poverty *The Feeding of Nations* Mark Gibson,2016-04-19 In the last decade the world has grown richer and produced more food than ever before Yet in that same period hunger has increased and 925 million remain underfed and malnourished Exploring this troubling paradox *The Feeding of Nations Re Defining Food Security for the 21st Century* offers a glimpse into how the simple aspiration of global food *Food Insecurity in Sub-Saharan Africa* Lisa C. Smith,Harold Alderman,Dede Aduayom,2006 In addressing the pervasive problem of hunger in the developing world reliable information on food insecurity is essential for effectively targeting assistance developing

interventions and evaluating progress Yet arriving at an accurate and comparable measure of food insecurity remains a challenge This report introduces new estimates of food insecurity based on food acquisition data collected as part of national household expenditure surveys HESs The report explores the extent and location of food insecurity the scientific merit of estimates derived from HES food data the differences between HES based estimates and those reported by the Food and Agriculture Organization of the United Nations FAO and ultimately how HES data can be used to improve the accuracy of the FAO estimates currently used to monitor progress toward reducing hunger

Perspectives on Inclusive Policies for Development in India Saiyed Raza Hashim, Rahul Mukherji, Brajaraja Mishra, 2022-06-06 This book presents perspectives by eminent economists social scientists and policy makers exploring in depth the post reform developments in India including issues pertaining to growth and equity issues which have been at the core of life time work of Prof R Radhakrishna The book brings out how some public policy instruments created to promote growth have turned out to be regressive promoting inequalities and creating a highly asymmetric federalism in India It examines the efficacy of fiscal and monetary reforms and also emphasises the need for strengthening the institutions of governance particularly judiciary and police in order to boost investors confidence It presents exercises in econometric modelling for explaining factors in growth and vetting policies and explores the issue of governance and institutions The book provides insights into the working of an emerging economy and a large democracy which has to strive for public acceptability of the tensions of its negotiations between equity and growth With its depth of academic excellence and breadth of topics covered it is a must read for researchers policy makers industry watchers think tanks and NGOs

Hungry Nation Benjamin Robert Siegel, 2018-04-26 This ambitious and engaging new account of independent India s struggle to overcome famine and malnutrition in the twentieth century traces Indian nation building through the voices of politicians planners and citizens Siegel explains the historical origins of contemporary India s hunger and malnutrition epidemic showing how food and sustenance moved to the center of nationalist thought in the final years of colonial rule Independent India s politicians made promises of sustenance and then qualified them by asking citizens to share the burden of feeding a new and hungry state Foregrounding debates over land markets and new technologies Hungry Nation interrogates how citizens and politicians contested the meanings of nation building and citizenship through food and how these contestations receded in the wake of the Green Revolution Drawing upon meticulous archival research this is the story of how Indians challenged meanings of welfare and citizenship across class caste region and gender in a new nation state

The Argumentative Indian Amartya Sen, 2013-10-15 A Nobel Laureate offers a dazzling new book about his native country India is a country with many distinct traditions widely divergent customs vastly different convictions and a veritable feast of viewpoints In *The Argumentative Indian* Amartya Sen draws on a lifetime study of his country s history and culture to suggest the ways we must understand India today in the light of its rich long argumentative tradition The millenia old texts and interpretations of Hindu Buddhist Jain Muslim agnostic and atheistic Indian thought demonstrate Sen reminds

us ancient and well respected rules for conducting debates and disputations and for appreciating not only the richness of India's diversity but its need for toleration. Though Westerners have often perceived India as a place of endless spirituality and unreasoning mysticism, he underlines its long tradition of skepticism and reasoning, not to mention its secular contributions to mathematics, astronomy, linguistics, medicine, and political economy. Sen discusses many aspects of India's rich intellectual and political heritage, including philosophies of governance from Kautilya's and Ashoka's in the fourth and third centuries BCE to Akbar's in the 1590s, the history and continuing relevance of India's relations with China more than a millennium ago, its old and well organized calendars, the films of Satyajit Ray, and the debates between Gandhi and the visionary poet Tagore about India's past, present, and future. The success of India's democracy and defense of its secular politics, Sen argues, depend on understanding and using this rich argumentative tradition. It is also essential to removing the inequalities, whether of caste, gender, class, or community, that mar Indian life, to stabilizing the now precarious conditions of a nuclear armed subcontinent, and to correcting what Sen calls the politics of deprivation. His invaluable book concludes with his meditations on pluralism, on dialogue and dialectics in the pursuit of social justice, and on the nature of the Indian identity.

Global Food Security and Development Aid Ivica Petrikova, 2016-11-03. At the global level, international actors have repeatedly expressed their desire to end hunger and food insecurity. However, food insecurity has persisted. More analysis is hence needed on the link between continuously high levels of global food insecurity and the ever increasing flow of development aid. *Global Food Security and Development Aid* investigates the impact that development aid has had on food security in developing countries and includes international case studies on Peru, Ethiopia, India, and Vietnam. It examines the effect of development aid in general and the impact of aid divided into different categories based on donor mechanism and sector to which it is provided. In each examined relationship between aid and food security, particular attention is paid to the potentially intervening role played by the quality of national and/or local governance. The book makes policy recommendations, most importantly that donors should take greater care in considering which types of aid are suitable to which specific countries, localities, and development goals, and account for expected developments in the complex relationship between aid, food security, and governance. This book will be of considerable interest to students, researchers, and policy makers in the areas of development aid and food security.

A Human Rights Based Approach to Development in India Moshe Hirsch, Ashok Kotwal, Bharat Ramaswami, 2019-08-15. Over the last twenty years, India has enacted legislation to turn crucial goals such as food security, primary education, and employment into legal rights for its citizens. But enacting laws is one thing, and implementing them through an imperfect institutional structure is another. *A Human Rights Based Approach to Development in India* examines a diverse range of human development issues over a period of rapid economic growth in India. Demonstrating why institutional and economic development are synonymous, the essays in this volume detail the many obstacles that may hinder development. In addition, they show how the domestic policies required to implement laws may

undermine India's treaty obligations at the World Trade Organization or under the Agreement on Trade Related Aspects of Intellectual Property Rights. The contributors ultimately ask whether development can be achieved by making it a legal right and whether India's right to develop is truly at odds with its international commitments.
