Poverty Trans Market Econ Mongolia:

Poverty and the Transition to a Market Economy in Mongolia Keith Griffin, 1995-07-13 This book contains an analysis of the economic problems encountered in Mongolia during the transition from a centrally planned to a market economy when poverty increased dramatically unemployment rose sharply health and education indicators deteriorated and the economic and social position of women declined Yet there is considerable potential in Mongolia for a broadly based acceleration of output particularly if priority is given to the nomadic livestock sector and to grass roots development at the provincial level The book contains many policy suggestions intended to promote growth and employment and to reduce poverty

The SAGE Encyclopedia of World Poverty Mehmet Odekon, 2015-06-15 The SAGE Encyclopedia of World Poverty Second Edition addresses the persistence of poverty across the globe while updating and expanding the landmark work Encyclopedia of World Poverty originally published in 2006 prior to the economic calamities of 2008 For instance while continued high rates of income inequality might be unsurprising in developing countries such as Mexico the Organization of Economic Co operation and Development OECD reported in May 2013 even countries with historically low levels of income inequality have experienced significant increases over the past decade including Denmark Sweden and Germany The U N and the World Bank also emphasize the persistent nature of the problem It is not all bad news In March 2013 the Guardian newspaper reported Some of the poorest people in the world are becoming significantly less poor according to a groundbreaking academic study which has taken a new approach to measuring deprivation The report by Oxford University s poverty and human development initiative predicts that countries among the most impoverished in the world could see acute poverty eradicated within 20 years if they continue at present rates On the other hand the U N says environmental threats from climate change could push billions more into extreme poverty in coming decades All of these points lead to the need for a revised updated and expanded edition of the Encyclopedia of World Poverty

Modern Mongolia Morris Rossabi,2005-04-25 Land locked between its giant neighbors Russia and China Mongolia was the first Asian country to adopt communism and the first to abandon it When the Soviet Union collapsed in the early 1990s Mongolia turned to international financial agencies including the International Monetary Fund the World Bank and the Asian Development Bank for help in compensating for the economic changes caused by disruptions in the communist world Modern Mongolia is the best informed and most thorough account to date of the political economy of Mongolia during the past decade In it Morris Rossabi explores the effects of the withdrawal of Soviet assistance the role of international financial agencies in supporting a pure market economy and the ways that new policies have led to greater political freedom but also to unemployment poverty increasingly inequitable distribution of income and deterioration in the education health and well being of Mongolian society Rossabi demonstrates that the agencies providing grants and loans insisted on Mongolia s adherence to a set of policies that did not generally take into account the country s unique heritage and society Though the sale of state assets minimalist government liberalization of trade and prices a balanced budget and austerity were supposed to yield marked economic growth Mongolia the world s fifth largest per capita recipient of foreign aid did not recover as expected As he details this painful transition from a collective to a capitalist economy Rossabi also analyzes the cultural effects of the sudden opening of Mongolia to democracy He looks at the broader implications of Mongolia s international situation and considers its future particularly in relation to China **Change in Democratic Mongolia** Julian

Poverty Reduction and Sustainable Development in Rural China Yisheng Zheng,2011-01-07 Poverty Reduction and Sustainable Development in Rural China is translated from the original Chinese to provide a look into how scholars in China have been assessing perceptions of poverty and reforms to improve conditions This volume and the others in the SSRC series provides Western scholars with an accessible English language look at the state of current scholarship in China and as such does not simply provide information for the direct study of socio political issues but also for meta level analysis of how the

domestic scholarship in China is developing and assessing the interplay of the country's political and economic reforms with the society and daily life of its people

From Yuan to Modern China and Mongolia Morris Rossabi, 2015-01-27 This wide ranging work consisting of selected essays of Morris Rossabi reflects the diverse interests of a leading scholar of China and Inner Asia. It encompasses the eras from the thirteenth century to the present, territories stretching from China to Mongolia to Central Asia and to the Middle East, and religions from Islam to Nestorian Christianity to Judaism and Confucianism in East Central and West Asia. Rossabi first challenged the conventional wisdom concerning traditional Chinese foreign relations by showing the pragmatism of Chinese officials who were not bound by Confucian strictures and stereotypes about foreigners and were actually knowledgeable about neighboring regions. His studies of the territories surrounding China led to the discovery of a major omission in historical writing: the lack of a biography of Khubilai Khan, one of the most renowned rulers in Eurasian history. His biography of Khubilai resulted in further studies of the Mongolian legacy on global history and of the significant role of women in the Mongolian empire. His repeated travels in Mongolia in turn stimulated an interest in modern Mongolia, especially the turbulence following the collapse of socialism in 1990, a subject he writes about in this book. The need for greater public knowledge and awareness of China, Mongolia, Central Asia, the Silk Roads, and Islam in Asia prompted Rossabi to write general, occasionally pedagogical, articles about these topics for a wider audience.

Who's who in Economics Mark Blaug, 1999 This standard reference text is a guide to economists both past and present who have made a substantial contribution to the subject. It provides biographical, bibliographical, and critical information on over 1000 living economists and approximately 500 deceased economists.

Conserving Biodiversity in Arid Regions J. Lemons, Reginald Victor, Daniel Schaffer, 2012-12-06 On the eve of the World Summit for Sustainable Development (WSSD) held in autumn 2002 in Johannesburg, South Africa, United Nations Secretary General Kofi Annan recommended five specific areas as focal points of discussion for the global forum: Water, energy, health, agriculture, and biodiversity. In his address *Towards a Sustainable Future*, delivered just four months before the WSSD, Secretary General Annan contended that concrete progress in each of these areas, often referred to by their acronym WEHAB, would be key to improving the quality of life not only in the developing world but across the globe. For most people, I think it is fair to say that the inclusion of biodiversity in a list that focuses on basic human needs may not be self-evident. Water, energy, health, and agriculture, yes. But why biodiversity? The truth is that biodiversity is just as critical to global well-being as water, energy, agriculture, and health. This is because biodiversity both drives and shapes nature's intricate and dynamic structure in an enduring form and force that enables both current and future generations to enjoy its bounty.

Tragic Spirits Manduhai Buyandelger, 2013-11-01 A highly readable ethnographic study of the resurgence of shamanism among nomadic Mongolians in a time of radical political and economic change. The Journal of Asian Studies Winner, Francis Hsu Book Prize from the Society for East Asian Anthropology. Shortlisted ICAS International Convention of Asia Scholars Book Prize. The collapse of socialism at the end of

the twentieth century brought devastating changes to Mongolia Economic shock therapy an immediate liberalization of trade and privatization of publicly owned assets quickly led to impoverishment especially in rural parts of the country where Tragic Spirits takes place Following the travels of the nomadic Buryats Manduhai Buyandelger tells a story not only of economic devastation but also a remarkable Buryat response to it the revival of shamanic practices after decades of socialist suppression Attributing their current misfortunes to returning ancestral spirits who are vengeful over being abandoned under socialism the Buryats are now at once trying to appease their ancestors and recover the history of their people through shamanic practice Thoroughly documenting this process Buyandelger situates it as part of a global phenomenon comparing the rise of shamanism in liberalized Mongolia to its similar rise in Africa and Indonesia In doing so she offers a sophisticated analysis of the way economics politics gender and other factors influence the spirit world and the crucial workings of cultural memory An excellent addition to studies in the area emotive accessible and well researched London School of Economics

Review of Books **Inner Asia and the Spatial Politics of Empire** William Honeychurch, 2014-11-05 This monograph uses the latest archaeological results from Mongolia and the surrounding areas of Inner Asia to propose a novel understanding of nomadic statehood political economy and the nature of interaction with ancient China In contrast to the common view of the Eurasian steppe as a dependent periphery of Old World centers this work views Inner Asia as a locus of enormous influence on neighboring civilizations primarily through the development and transmission of diverse organizational models technologies and socio political traditions This work explores the spatial management of political relationships within the pastoral nomadic setting during the first millennium BCE and argues that a culture of mobility horse based transport and long distance networking promoted a unique variant of statehood Although states of the eastern steppe were geographically large and hierarchical these polities also relied on techniques of distributed authority multiple centers flexible structures and ceremonialism to accommodate a largely mobile and dispersed populace This expertise in spatial politics set the stage early on for the expansionistic success of later Asian empires under the Mongols and Manchus Inner Asia and the Spatial Politics of Empire brings a distinctly anthropological treatment to the prehistory of Mongolia and is the first major work to explore key issues in the archaeology of eastern Eurasia using a comparative framework The monograph adds significantly to anthropological theory on interaction between states and outlying regions the emergence of secondary complexity and the growth of imperial traditions Based on this approach the window of Inner Asian prehistory offers a novel opportunity to investigate the varied ways that complex societies grow and the processes articulating adjacent societies in networks of mutual transformation

Poverty in Transition and Transition in Poverty Yogesh Atal, 1999-03 Poverty is an issue facing countries around the globe yet it is a multi dimensional phenomenon caused by a variety of factors differing from context with no linear chain of cause and effect The occurrence and persistence of poverty is influenced by an interrelated web of economic social psychological cultural and political factors Focusing on countries in transition belonging

to the former Soviet bloc where the existence of poverty was officially denied until the collapse of the Soviet Union this volume examines the ways in which each country is dealing with its newly acknowledged and rapidly increasing poverty The transition from socialism to democracy and market economies has proved more difficult and costly than anyone imagined Scholars from the six countries examined here profile and evaluate current social policies and programs on poverty eradication and provide a comparative perspective that ensures that culturally specific solutions can be found in place of borrowed solutions from abroad solutions which have thus far ignored the cultural factor and have thus failed to deliver
