PIPELINE GENERATION (MW) by province

AGGREGATED NATIONAL PROCUREMENT PIPELINE 10 November 2023

Committed generation figures include operating IPPs, and possible IPPs, which are part of established procurement programmes. African Energy Live Data (AELD) results differ from those in the GCCA 2022 report which uses Eskom's supply areas.

Name-scanred includes projects registered or licensed by Name-scanred (non-Normal) or embedded projects not listed by Name-scanred which have different commercial outcomes, other captive power projects may exist that have not yet been captured by the pipeline.

AELD's historical pipeline includes all other proposed projects excluding those that have been announced and have some potential for development.

GCCA generation connection capacity refers to the amount of free capacity available using the existing grid. Development refers to power plants that just add power output to the grid on demand, typically coal, natural gas, liquid fuels, nuclear, battery and some hydro. GCCA results incorporate all of the preferred bidders for the two windows up to REPPPP 2nd Round and all the budget applications that have been issued or are pending for private off-takers who wish to connect to the grid on a wheeling agreement.
