Williams,2018-03-08 The Harvard philosopher Donald C Williams 1899 1983 was a key figure in the history of

analytic philosophy He played a crucial role in reviving metaphysics at a time when other philosophers ridiculed criticized and committed it to the flames He constructed an explanatorily powerful and parsimonious ontology and cosmology founded on logic science and common sense His most influential articles were on the metaphysics of properties The Elements of Being and the metaphysics of time The Sea Fight Tomorrow The Myth of Passage His ontology of abstract particulars or tropes and his four dimensional manifold theory of time remain leading hypotheses in metaphysics Because of his novel contributions and his defense of metaphysics he made a lasting impact on philosophers of the next generation who in turn believed in the substance of metaphysical inquiry A R J Fisher brings together Williams s seminal articles in metaphysics along with previously unpublished essays that shed new light on his philosophical outlook and complete his metaphysical vision This volume with its comprehensive Introduction is set to be the definitive source for Williams s work both for historians of analytic philosophy and for contemporary metaphysicians Ontological Investigations Ingvar Johansson,2013-05-02 This volume is devoted to problems within analytic metaphysics It defends an ontology and theory of categories inspired by Aristotle but revised in such a way as to be compatible with modern science The ontology of both natural and social reality is addressed starting out from the view that universals exist but only in the spatiotemporal world immanent realism In attempting to bring Aristotle s ontology up to date the author relies very much on the thinking of Edmund Husserl conceiving the cement of the universe as Husserlian relations of existential dependence and regarding intentionality as a non reducible category in the ontology of mind The work is thoroughly realistic in spirit but large parts of it should nonetheless be of interest to conceptualists and nominalists too **Dynamic Being** Aljoscha Berve,Adam C. Scarfe,2015-09-10 One of the most important characteristics of present day ontological research is the growing interest in and emphasis on the dynamic aspects of being and the process relational character of being itself However many important questions still await detailed answers For example what is the meaning of the concepts of dynamics dynamicity and dynamic ontology among others Are they identical to or similar with respectively processes process ontology process relational ontology Is process ontology a type of dynamic ontology Dynamic Being Essays in Process Relational Ontology examines these and many other questions and suggests fruitful approaches in dealing with such questions The book carries out two main tasks first investigating developments in the theory of dynamic and process relational ontologies and second exploring developments in the application of these ontologies The second task is multidisciplinary in character The authors of the chapters in this volume are specialists not only in philosophy but also in other fields of science including psychology biology mathematics logic and computer science their work providing a seed bed of novel possibilities for cooperative interdisciplinary research Phenomenology and Historical Thought Mark E. Blum,2022-08-22 The volume begins with what is in common to contemporary phenomenological historians and historiographers That is the understandings that temporality is the core of human judgment conditioning in its forms how we consciously attend and judge phenomena For every phenomenological

historian or historiographer all history is an event a span of time This time span is not external to the individual rather forms the content and structure of every judgment of the person It is the logic used by the individual to structure the phenomenon attended Rather than the phenomenon being seen as something solely external it is understood by phenomenologists as also of our immediate awareness and thought Thus the phenomenological method discerns all judgment as based upon one's span of attention of inner or outer phenomena There is an intentionality to attention One intends one's own foci Attention is the temporal duration of that intending The volume offers a text that enables contemporary historians graduate students and even undergraduates who are well taught to understand both the history of phenomenology as a method of inquiry and the contemporary practice of phenomenological historical and historiographical thought *The Conflict Helix* R. J. Rummel, This is a book on conflict and consensus aimed at the general reader In active plain and direct language it makes the seemingly abstract and complex issues simple Its view of peace is well rounded tough minded one that well understands the difficult world of social and personal violence and conflict At its heart is a simple finding to wage peace we need to foster freedom The human race can best achieve that simple aim by leaving people alone to form their own communities The Conflict Helix avoids the ambiguous in favor of the categorical the hedged qualified statement for the direct Rummel presents a series of basic principles each concerning an aspect of conflict and peace psychological interpersonal societal international and each aspect having its own master principle These principles are not mere organizational props but are deeply theoretical and empirically fundamental The volume expresses the core ideas results and conclusions of Rummel's major five volume work on Understanding Conflict and War In discarding technical material and focusing on principles and meaning The Conflict Helix presents an executive summary of a lifetime of work in a digestible form In light of recent events in Europe Asia and Latin American this work takes on a special poignancy for the developing no less than the industrialized worlds Hence this book should be of value to the general reader as well as professionals and advanced students of international politics **Understanding Conflict and War: The dynamic psychological field** Rudolph J. Rummel, 1975

**Catalog of Copyright Entries. Third Series** Library of Congress. Copyright Office, 1976 **Knowledge, Thought, and the Case for Dualism** Richard Fumerton, 2013-10-17 The relationship between mind and matter mental states and physical states has occupied the attention of philosophers for thousands of years Richard Fumerton's primary concern is the knowledge argument for dualism an argument that proceeds from the idea that we can know truths about our existence and our mental states without knowing any truths about the physical world This view has come under relentless criticism but here Fumerton makes a powerful case for its rehabilitation demonstrating clearly the importance of its interconnections with a wide range of other controversies within philosophy Fumerton analyzes philosophical views about the nature of thought and the relation of those views to arguments for dualism and investigates the connection between a traditional form of foundationalism about knowledge and a foundationalist view about thought that underlies traditional arguments for dualism
