Power Light Political Strategies For The Solar Transition:

Power & Light David Talbot, Richard Morgan, 1981 We are not running out of energy Our nation contains vast amounts of untapped energy resources which are available at a relatively low cost These resources are not concentrated in Texas or Alaska rather they are dispersed throughout the country in the communities where we live The energy sources I speak of are solar and conservation These two energy supplies are both bountiful and inexhaustible yet they are largely ignored by our policy makers Solar development and efficiency improvements can do much more than provide us with less costly energy They can help us escape from the economic suicide of continued dependence on conventional energy resources Foreword

Energy Abstracts for Policy Analysis ,1984-07 **Energizing Neoliberalism** Caleb Wellum, 2023-10-17 How the 1970s energy crisis facilitated a neoliberal shift in US political culture In *Energizing Neoliberalism* Caleb Wellum offers a provocative account of how the 1970s energy crisis helped to recreate postwar America Rather than think of the crisis as the obvious outcome of the decade s oil shocks Wellum unpacks the cultural construction of a crisis of energy across different sectors of society from presidents policy experts and environmentalists to filmmakers economists and oil futures traders He shows how the dominant meanings ascribed to the 1970s energy crisis helped to energize neoliberal visions of renewed abundance and power through free market values and approaches to energy Deeply researched in federal archives expert discourse and popular culture *Energizing Neoliberalism* demonstrates the central role that energy crisis narratives played in America s neoliberal turn Wellum traces the roots of the crisis to the consumption practices and cultural narratives spawned by the petrocultural politics of Cold War capitalism In a series of illuminating case studies including 1970s energy conservation debates popular car films and the creation of oil futures trading Wellum chronicles the consolidation of a neoliberal capitalist order in the United States through an energy politics marked by anxious futurity petro populist sentiment and financialized energy markets He shows how experiences of energy shortages and fears of future energy crises unsettled American national identity and power yet also informed Reagan era confidence in free markets and US global leadership In taking a cultural approach to the 1970s energy crisis Wellum offers a challenging meditation on the status of crisis in modern history contemporary life and critical thought and how we rely on crises to make sense of the world

Solar Energy Update ,1984 [Powering Civilization](#) James Ridgeway, 1982 **Geographies of Solar Energy Transitions** Siddharth Sareen, Abigail Martin, 2024-09-10 Solar energy is emerging as the world s largest growing source of power In recent years its rollout and growth have produced effects far beyond electricity generation including a series of cognate challenges and conflicts in diverse geographies of energy transition *Geographies of Solar Energy Transitions* focuses on how solar energy governance both state based regulations and more market driven modes of governance is evolving to address these conflicts in diverse empirical settings Chapters and case studies by leading energy scholars explore various issues such as formulating new place specific solar energy visions and strategies financing specific deployment scales

expanding or replacing electricity infrastructure accessing land resolving conflicts surrounding competing land uses incorporating charging technologies for transport and storage adopting flexible energy production consumption relationships displacing fossil fuel energy production with renewables enabling new energy ownership models and addressing the many environmental and social injustices across the value chain of solar expansion including upstream extractivism and downstream waste

Scholarship typically frames these challenges as tangential to the governance of solar energy transitions By placing them front and centre the book draws necessary attention to the many wider changes in society that are continuously developing due to the worldwide adoption of solar power

Praise for Geographies of Solar Energy Transitions

This excellent book vividly demonstrates that whilst a PV panel is a standard thing pretty much everything else about solar energy can be different Ask how why and for whom and geography in many dimensions really does matter to solar energy transitions

Gordon Walker Lancaster University This volume offers a unique and pioneering knowledge resource underpinned by comprehensive and nuanced insights into the emergent spatial and socio economic features of the unfolding solar energy revolution A must read for researchers and practitioners interested in understanding the diverse forms of solar power governance and development across the world

Just Transitions Seema Arora-Jonsson,Kavya Michael,Manish Kumar Shrivastava,2023-10-04 This book turns critical feminist scrutiny on national climate policies in India and examines what transition might really mean for marginalized groups in the country A vision of just transitions is increasingly being used by activists and groups to ensure that pathways towards sustainable futures are equitable and inclusive Exploring this concept this volume provides a feminist study of what it would take to ensure just transitions in India where gender in relation to its interesting dimensions of power is at the centre of analysis With case studies on climate mitigation and adaptation from different parts of India the book brings together academics practitioners and policymakers who provide commentary on sectors including agriculture forestry and renewables Overall the book has relevance far beyond India s borders as India s attempt to deal with its diverse population makes it a key litmus test for countries seeking to transition against a backdrop of inequality both in the Global North and South This volume will be of great interest to students and scholars of climate policy gender studies sustainable development and development studies more broadly

The Routledge Handbook of the Political Economy of Science David Tyfield,Rebecca Lave,Samuel Randalls,Charles Thorpe,2017-04-28 The political economy of research and innovation R I is one of the central issues of the early twenty first century Science and innovation are increasingly tasked with driving and reshaping a troubled global economy while also tackling multiple overlapping global challenges such as climate change or food security global pandemics or energy security But responding to these demands is made more complicated because R I themselves are changing Today new global patterns of R I are transforming the very structures institutions and processes of science and innovation and with it their claims about desirable futures Our understanding of R I needs to change accordingly Responding to this new urgency and uncertainty this handbook presents a pioneering selection of the growing body of literature that has emerged in recent years at the intersection of science and technology studies and political economy The central task for this research has been to expose important but consequential misconceptions about the political economy of R I and to build more insightful approaches This volume therefore explores the complex interrelations between R I both in general and in specific fields and political economies across a number of key dimensions from health to environment and universities to the military The Routledge Handbook of the Political Economy of Science offers a unique collection of texts across a range of issues in this burgeoning and important field from a global selection of top scholars The handbook is essential reading for students interested in the political economy of science technology and innovation It also presents succinct and insightful summaries of the state of the art for more advanced scholars

Scientific and Technical Books and Serials in Print ,1989 *Sunworld* ,1986 *Architecture Series: Bibliography* ,1982 *Comparative Renewables Policy* Elin Lerum Boasson,Merethe Dotterud Leiren,Jørgen Wettstad,2020-10-29 Challenging one eyed technology focused

accounts of renewables policy this book provides a ground breaking deep diving and genre crossing longitudinal study of policy development The book develops a multi field explanatory approach capturing inter relationships between actors often analyzed in isolation It provides empirically rich and systematically conducted comparative case studies on the political dynamics of the ongoing energy transition in six European countries While France Germany Poland and the United Kingdom opted for technology specific renewables support mixes Norway and Sweden embarked on technology neutral support mixes Differences between the two groups result from variations in domestic political and organizational fields but developments over time in the European environment also spurred variation These findings challenge more simplistic and static accounts of Europeanization This volume will be of key interest to scholars and students of energy transitions comparative climate politics policy theory Europeanization European integration and comparative European politics more broadly as well practitioners with an interest in renewable energy and climate transition The Open Access version of this book available at <https://www.taylorfrancis.com/books/e/9780429198144> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Environmental Action, 1981 **The Political Economy of Clean Energy Transitions** Douglas Arent, Channing Arndt, Mackay Miller, Finn Tarp, Owen Zinaman, 2017 A volume on the political economy of clean energy transition in developed and developing regions with a focus on the issues that different countries face as they transition from fossil fuels to lower carbon technologies News Grantsmanship Center, 1982 **A Green and Global Europe** Nathalie Tocci, 2022-10-14 After years of existential crisis Europe has found a new raison d'être the European Green Deal and the energy transition that lies at its core This green Europe represents a normative vision an economic growth strategy as well as a route to a political Union that would enhance EU integration and legitimacy But it can only be realized if it addresses head on the social economic political and geopolitical ramifications of this epochal change In A Green and Global Europe Nathalie Tocci explains how the unprecedented nature of the current energy transition represents both a unique opportunity and a huge challenge to Europe's future prosperity The EU she argues must not act in isolation or ignore the adverse effects of the transition on Member States and neighbours It must also address the global cleavages that may arise with China the transatlantic relationship and the Global South as a result of the EU's green agenda By adopting a truly global approach to the energy transition Europe can deliver on its responsibilities to people and planet alike and avoid unleashing social economic and security problems that could come biting back at the Union
