City Making and Urban Governance in the Americas Clara Irazábal, 2017-03-02 Cities in both North and South America are confronting tremendous challenges in urban growth and management as they enter the new century Curitiba in Brazil and Portland in Oregon US are cities that have achieved recognition for exemplary urban planning programmes over the past three decades As such they provide particularly useful illustrations of the intense development pressures that many urban areas currently face This book explores the dynamics of their urban governance arguing that in general there has been a unique synergy derived from the combination of visionary leadership innovative urban plans and effective citizen involvement The book argues that while urban design and architecture are key to the success in making cities livable and in augmenting the global reputations such sensitive innovative urban planning and design projects first need to be governed effectively and grounded within the specifics of their local cultures and existing built environments

Private Sector-Led Urban Development Projects Erwin Heurkens, 2012-09-04 Central to Private Sector led Urban Development Projects lays the concept of private sector led urban development projects Such projects involve project developers taking a leading role and local authorities adopting a

facilitating role in managing the development of an urban area based on a clear public private role division Such a development strategy is quite common in Anglo Saxon urban development practices but is less known in Continental European practices Nonetheless since the beginning of the millennium such a development strategy also occurred in the Netherlands in the form of concessions However remarkably little empirical knowledge is available about how public and private actors collaborate on and manage private sector led urban development projects Moreover it remains unclear what the effects of such projects are This dissertation provides an understanding of the various characteristics of private sector led urban development projects by conducting empirical case study research in the institutional contexts of the Netherlands and the UK The book provides an answer to the following question What can we learn from private sector led urban development projects in the Netherlands and UK in terms of the collaborative and managerial roles of public and private actors and the effects of their inter actions

Selling the Lower East Side Christopher Mele, 2000 The Lower East Side of Manhattan is rich in stories of poor immigrants who flocked there in the late nineteenth and early twentieth centuries of beatniks hippies and artists who peopled it mid century and of the real estate developers and politicians who have always shaped what is now termed the East Village Today the musical Rent plays on Broadway to a mostly white and suburban audience MTV exploits the neighborhood's newly trendy squalor in a film promotion and on the Internet a cyber soap opera and travel related Web pages lure members of the middle class to enjoy a commodified and sanitized version of the neighborhood In this sweeping account Christopher Mele analyzes the political and cultural forces that have influenced the development of this distinctive community He describes late nineteenth century notions of the Lower East Side as a place of entrenched poverty ethnic plurality political activism and low culture that elicited feelings of revulsion and fear among the city's elite and middle classes The resulting and ongoing struggle between government and residents over affordable and decent housing has in turn affected real estate practices and urban development policies Selling the Lower East Side recounts the resistance tactics used by community residents as well as the impulse on the part of some to perpetuate the image of the neighborhood as dangerous romantic and bohemian clinging to the marginality that has been central to the identity of the East Village and subverting attempts to portray it as new and improved Ironically this very image of urban grittiness has been appropriated by

a cultural marketplace hungry for new fodder Mele explores the ways that developers media executives and others have coopted the area s characteristics analyzing the East Village as a style provider where what is being marketed is difference The result is a visionary look at how political and economic actions transform neighborhoods and at what happens when a neighborhood is what is being consumed

Cities, Politics & Power Simon Parker,2010-11-02 Traditionally the study of power in the city was confined to the institutions of urban government and the actors involved in contesting and making political decisions in and for metropolitan societies Increasingly however attention has turned to the function of the city not only as a centre of urban governance but as a major economic social cultural and strategic force in its own right Cities Politics and Power combines this traditional concern with how the cities in which we live are organized and run with a broader focus on cities and urban regions as multiple sites and agents of power This book is divided into five sections with a short introduction outlining the argument and organisation of the text Part two charts the development of the urban polity and considers the ways in which coercion and force continue to be used to segregate oppress and annihilate urban populations Part three critically examines the key collective actors and processes that compete for and organise political power within cities and how urban governance operates and interacts with lesser and greater scales of government and networks of power Part four then explores the ways in which the political is constituted by urban inhabitants and how social identity information and communication networks and the natural and built environment all comprise intersecting fields of urban power The conclusion calls for a broader theoretical and thematic approach to the study of urban politics This book makes extensive use of comparative and historical case studies providing broad coverage of politics and urban movements in both the Global North and the Global South with a particular focus on the UK USA Canada Latin America and China It is written in an accessible and lucid style and provides suggestions for further reading at the end each chapter

A World of Gangs John Hagedorn,2008 On the street with gangs in three world cities Chicago Rio de Janeiro and Capetown Hagedorn discovers that many of them have institutionalized as a strategy to confront a hopeless cycle of poverty racism and oppression The nihilistic appeal of gangsta rap and its ethic of survival by any means necessary he argues provides vital insights into the ideology and persistence of gangs around the world Proposing how gangs can be encouraged to overcome their violent tendencies Hagedorn appeals to community leaders to use the urgency outrage and resistance common to both gang life and hip hop to bring gangs into broader movements for social justice

Latino Metropolis Victor M. Valle,Rodolfo D. Torres,2000 Los Angeles scratch the surface of the city s image as a rich mosaic of multinational cultures and a grittier truth emerges its huge shimmering economy was built on the backs of largely Latino immigrants and still depends on them This book exposes the underside of the development and restructuring that have turned Los Angeles into a global city and in doing so it reveals the ways in which ideas about ethnicity Latino identity itself are implicated and elaborated in the process A penetrating analysis of the social economic

cultural and political consequences of the growth of the Latino working class populations in Los Angeles Latino Metropolis is also a nuanced account of the complex links between political economy and the social construction of ethnicity Lifting examples from recent news stories political encounters and cultural events the authors demonstrate how narratives about Latinos are used to maintain the status quo particularly the existing power grid in the city In media representations of riots in the recasting and whitening of Mexican food as Spanish American cuisine in the community displacement that occurred as part of the development of the Staples Center in telling instances large and small we see how Los Angeles and its Latino population are mutually transforming And we see how an old Latino politics of racial identity is inevitably giving way to a new politics of class Combining political and economic insight with trenchant social and cultural analysis this work offers the clearest statement to date of how ethnicity and class intersect in defining racialized social relations in the contemporary metropolis Globalization and Community Series volume 7 Translation Inquiries University of Minnesota Press *Justice and the American Metropolis* Clarissa Rile Hayward, Todd Swanstrom, Returning social justice to the center of urban policy debates
