Pragmatic Theory Of Rhetoric:

A Pragmatic Theory of Rhetoric Walter H. Beale, 1977

A Pragmatic Theory of Rhetoric Walter H. Beale, 1987

Walter H Beale offers the most coherent treatment of the aims and modes of discourse to be presented in more than a decade. His development of a semiotic grammar of motives that relates the problems of meaning in discourse both to linguistic structure and ways of constructing reality stands as a provocative new theory of rhetoric sharply focused on writing. He includes a comprehensive treatment of rhetoric its classes and varieties, modes and strategies. In addition, he demonstrates the importance of the purpose, substance, and social context of discourse at a time when scholarly attention has become preoccupied with process. He fortifies and extends the Aristotelian approach to rhetoric and discourse at a time when much theory and pedagogy have yielded to modernist assumptions and methods. And finally, he develops a theoretical framework that illuminates the relationship between rhetoric, the language arts, and the human sciences in general.

Rhetoric and Philosophy Richard A. Cherwitz, Henry W. Johnstone Jr., 2014-06-03. This important volume explores alternative ways in which those involved in the field of speech communication have attempted to find a philosophical grounding for rhetoric. Recognizing that rhetoric can be supported in a wide variety of ways, this text examines eight different philosophies of rhetoric: realism, relativism, rationalism, idealism, materialism, existentialism, deconstructionism, and pragmatism. The value of this book lies in its pluralistic and comparative approach to rhetorical theory. Although rhetoric may be the more difficult road to philosophy, the fact that it is being traversed by a group of authors largely from speech communication demonstrates important growth in this field. Ultimately, there is recognition that if different thinkers can have solid reasons to adhere to disparate philosophies, serious communication problems can be eliminated. Rhetoric and Philosophy will assist scholars in choosing from among the many philosophical starting places for rhetoric.

Rhetorical Theory Timothy Borchers, Heather Hundley, 2018-03-30. From the moment we begin to understand the meanings of words and symbols, we have used rhetoric. It is how we determine perceptions of who we are, those around us, and the social structure in which we operate. **Rhetorical Theory, Second Edition** introduces a broad selection of classical and contemporary theoretical approaches to understanding and using rhetoric. Historical context reveals why rhetorical theories were created, while present-day examples demonstrate how they relate to the world in which we live. Borchers and Hundley present conceptual topics in a succinct and approachable manner. The text is organized topically rather than chronologically, so similarities and differences are easily detected in central ideas. Each chapter is enhanced by the inclusion of theorist biographies, applications of theory to practice, and Internet exercises. The Second Edition expands coverage on mediated rhetoric, feminist rhetoric, alternative rhetorical theories, including

Afrocentricity and intersectionality cultural and critical rhetoric and postmodern implications of rhetoric **A Rhetoric of Doing** Stephen Paul Witte, Neil Nakadate, Roger Dennis Cherry, 1992 Concerned with both the nature and the practice of discourse the eighteen essays collected here treat rhetoric as a dynamic enterprise of inquiry exploration and application and in doing so reflect James L Kinneavy's firm belief in the vital relationship between theory and practice his commitment to a spirit of accommodation and assimilation that promotes the development of ever more powerful theories and ever more useful practices A thorough introduction provides the reader with clear summaries of the essays by leading edge theorists researchers and teachers of writing and rhetoric A field context for the ideas presented in this book is provided through the division of the various chapters into four major sections that focus on classical rhetoric and rhetorical theory in historical contexts on dimensions of discourse theory aspects of discourse communities and the sorts of knowledge people access and use in producing written texts on writing in school related contexts and on several dimensions of nonacademic writing A fifth section contains a bibliographic survey and an appreciation of James Kinneavy's work The exceptional range of these essays makes A Rhetoric of Doing an ecumenical examination of the current state of mind in rhetoric and written communication a survey and description of what discourse and those in the field of discourse are in fact doing **Dialog Theory for Critical Argumentation** Douglas N. Walton, 2007 Because of the need to devise systems for electronic communication on the internet multi agent computing is moving to a model of communication as a structured conversation between rational agents For example in multi agent systems an electronic agent searches around the internet and collects certain kinds of information by asking questions to other agents Such agents also reason with each other when they engage in negotiation and persuasion It is shown in this book that critical argumentation is best represented in this framework by the model of reasoned argument called a dialog in which two or more parties engage in a polite and orderly exchange with each other according to rules governed by conversation policies In such dialog argumentation the two parties reason together by taking turns asking questions offering replies and offering reasons to support a claim They try to settle their disagreements by an orderly conversational exchange that is partly adversarial and partly collaborative **A Theory of the Literary Text** Antonio García-Berrio, 2016-11-21 No detailed description available for A Theory of the Literary Text Markedness Theory Edna Andrews, 1990-05-09 Edna Andrews clarifies and extends the work of Roman Jakobson to develop a theory of invariants in language by distinguishing between general and contextual meaning in morphology and semantics Markedness theory as Jakobson conceived it is a qualitative theory of oppositional binary relations Andrews shows how markedness theory enables a linguist to precisely define the systemically given oppositions and hierarchies represented by linguistic categories In addition she redefines the relationship between Jakobsonian markedness theory and Peircean interpretants Though primarily theoretical the argument is illustrated with discussions about learning a second language the relationship of linguistics to mathematics particularly set theory algebra topology and statistics in their mutual pursuit of invariance and issues involving
