Radiological Findings In Skin Diseases And Related Conditions:

Neuroradiological Imaging of Skin Diseases and Related Conditions Daniel Thomas Ginat, 2018-11-30 This unique book written by acknowledged experts provides a comprehensive review of the wide spectrum of skin diseases that may affect the head and neck region and central nervous system The clearly written informative text is accompanied by abundant examples of radiological imaging and corresponding vivid clinical photographs Coverage includes congenital skin lesions neurocutaneous syndromes benign and malignant skin tumors vascular malformations and lesions trauma infectious and inflammatory processes and post treatment appearances The book will be an invaluable clinical resource for both neuroradiologists and dermatologists Patients with skin diseases often undergo neuroradiological imaging and it is therefore important for neuroradiologists to be familiar with the various types of dermatological conditions and their imaging appearances

Radiological Findings in Skin Diseases and Related Conditions Martti Kormano, Ilmari Lindgren, Inkeri Helander, 1999 Dermatologic syndromes are seldom mentioned in the traditional radiologic textbooks On the other hand in the traditional textbooks on dermatology potential radiological findings are often ignored About 20% of the patients in general practice have skin problems in about two hundred disorders and malignant diseases the first lesion often appears on the skin and radiological abnormalities appear at the same time The systematic treatment of skin diseases with concurrent radiological findings in this book provides additional important information for the diagnosis of the condition Summarizing the clinical features of the disorders and syndromes the book also serves as a short reference book
