Real Problems False Solutions:

Toward a New Socialism Anatole Anton, Richard Schmitt, 2007-01-01 *Toward a New Socialism* offers a critical analysis of capitalism's failings and the imminent need for socialism as an alternative form of government. This book demonstrates that capitalism is destructive and limiting to the many ongoing campaigns to increase freedom, equality, and security. Dr. Richard Schmitt joins with Dr. Anatole Anton to compile a volume of essays exploring the benefits and consequences of a socialist system as an avenue of increased human solidarity and ethical principle. The essays offer a new definition of socialism by investigating the theories and principles of socialism, its influence on social institutions, and its role in work dynamics. Raising important and unavoidable questions for contemporary society, *Toward a New Socialism* is a vital resource for scholars of political theory and the globalization movement, as well as a necessary read for every citizen under capitalism.

Hydropolitics in the Developing World Anthony Turton, Roland Henwood, 2002. Bringing contributions by a variety of authors together in one volume is part of an attempt to show that hydropolitics is a growing discipline in its own right. The prevailing definition of hydropolitics is widened to include the elements of scale and range. This is illustrated through a focus on theoretical and legal issues, case studies from Southern Africa, and a proposed research agenda. The book is an important addition to the literature on hydropolitics.

Representing Capital Fredric Jameson, 2014-01-07. *Representing Capital* Fredric Jameson's first book-length engagement with Marx's magnum opus is a unique work of scholarship that records the progression of Marx's thought as if it were a musical score. The textual landscape that emerges is the setting for paradoxes and contradictions that struggle toward resolution, giving rise to new antinomies and a new forward movement. These immense segments overlap each other to combine and develop on new levels in the same way that capital itself does, stumbling against obstacles that it overcomes by progressive expansions which are in themselves so many leaps into the unknown.

Climate Justice in the Majority World Neil J.W. Crawford, Kavya Michael, Michael Mikulewicz, 2023-07-31. This edited collection explores a diverse range of climate justice case studies from the Majority World, where most of humans and non-humans live. It is also the site of the most severe impacts of climate change and home to some of the key solutions for the climate crisis. The collection brings together 12 chapters featuring the work of over 30 authors from around the globe. The impacts of climate change are disproportionately affecting individuals, communities, and countries in the Majority World who historically have contributed little to rising global temperatures. The 12 chapters focus on a range of cross-cutting themes, demonstrating both individual and collective experiences of climate change and struggles for achieving climate justice from the Majority World. This includes activism, resistance, and social movement organizing in India and Brazil; lived experiences and understandings of frontline communities in Bangladesh and South Africa; consequences of and responses to disasters in Mozambique and Puerto Rico; and contested accounts, narratives, and futures in the Maldives and Pakistan, among other topics. By adopting a decolonial lens, this book provides rich empirical content, insightful comparisons, and novel conceptual
