Daniel B. Klein, 2016-07-27 The title of this book raises a provocative question that should make all economists think What is our raison d'être Only a few economists have specifically addressed the issue Several of the more challenging efforts are included here Do economists have much influence on government policy particularly over say five or ten years Is that because they don't try hard enough or is it because politicians care more about the next election than about the opinion of economists In this splendid collection some published as long ago as the 1930s nine great economists consider these questions The editor's illuminating introduction sorts out the area of agreement and disagreement between them The Challenges of Democratic Governance in Nigeria's Fourth Republic Stanley Naribo Ngoa, Farooq A. Kperogi, Eghosa E. Osaghae, 2024-10-14 This book is a collection of scholarly essays from some of Nigeria's most notable social science scholars on the character contours and peculiarities of democratic practices in Nigeria's fourth attempt at constitutional rule after years of brutally absolutist military regimes The Fourth Republic began in 1999 and continues to this day It is coterminous with the restoration of constitutional rule after 16 years of sustained military rule which represents the longest stretch of democratic self rule since Nigeria won independence from British colonialism in 1960 The chapters in this book contain scholarly insights into the pitfalls of governance institutional dysfunctions and foundational woes that continue to threaten the vitality of the Fourth Republic Contributors to the book offer critical theoretical lenses to gaze at the decline in democratic citizenship weakening of faith in the promises of democracy loss of critical media engagement with the state and deterioration of the socio-political fortunes of the state in Nigeria **Property Rights, Indigenous People and the Developing World** David Lea, 2008 This work offers an analysis of the Western formal system of private property and its moral justification and explains the relevance of the institution to particular current issues that face aboriginal peoples and the developing world The subjects under study include broadly aboriginal land claims third world development intellectual property rights and the relatively recent TRIPs agreement Trade related Aspects of Intellectual Property Rights Within these broad areas we highlight the following concerns the maintenance of cultural integrity group autonomy economic benefit access to health care biodiversity biopiracy and even the independence of the recently emerged third world nation states Despite certain apparent advantages from embracing the Western institution of private ownership the text explains that the Western institution of private property is undergoing a fundamental redefinition through the expansion *Media, Bureaucracies, and Foreign Aid* Douglas A. Van Belle, 2004-04-02 This is the first sustained comparative examination of the importance of media attention on the provision of economic assistance suggesting that the news media is an important medium for policy makers to gauge potential domestic political pressures and thus the need to be responsive and even anticipatory in addressing problems real or perceived Particular attention is paid to the responsiveness of bureaucracies long

held to be among the most insulated institutions of government Cross national in scope this book looks at the United States the United Kingdom Canada France and Japan facilitating a nuanced understanding of the interaction of international and domestic politics as mediated by the media

Rich World, Poor World Ali A. Allawi, 2024-04-23 A landmark history of the world economic order exploring how developing countries have fought to escape impoverishment Over the past two decades experiments in neoliberal economics have opened up a chasm of inequality between the Global South and the West Development advice from richer nations has led to social upheaval political unrest environmental degradation and even the creation of a new underclass Brutal extremes of wealth and poverty are now commonplace Ali A Allawi traces the evolution of the world economic order from the late imperial era to the present day Shedding light on continuing controversies Allawi shows how the process of development has been hindered at every turn from poor leadership and lost opportunities to widespread corruption In doing so he argues that the current neoliberal consensus is only the most recent of a series of failed policy imperatives Covering issues in the Global South as well as failures in the West this definitive account offers an impassioned and authoritative call for change

Emerging Markets in an Upside Down World Jerome Booth, 2014-06-03 The world is upside down The emerging market countries are more important than many investors realise They have been catching up with the West over the past few decades Greater market freedom has spread since the end of the Cold War and with it institutional changes which have further assisted emerging economies in becoming more productive flexible and resilient The Western financial crisis from 2008 has quickened the pace of the relative rise of emerging markets their relative economic power and with it political power but also their financial power as savers investors and creditors Emerging Markets in an Upside Down World Challenging Perceptions in Asset Allocation and Investment argues that finance theory has misunderstood risk and that this has led to poor investment decisions and that emerging markets constitute a good example of why traditional finance theory is faulty The book accurately describes the complex and changing global environment currently facing the investor and asset allocator It raises many questions often bypassed because of the use of simplifying assumptions and models The narrative builds towards a checklist of issues and questions for the asset allocator and investor and then to a discussion of a variety of regulatory and policy issues Aimed at institutional and retail investors as well as economics finance business and international relations students Emerging Markets in an Upside Down World covers many complex ideas but is written to be accessible to the non expert

The Rocky Road to Reform Lance Taylor, 1993 These case studies provide valuable insights into the difficulty of establishing answers to the fundamental question of why nations grow at different rates with inequitable patterns of wealth and income distribution

The Political Economy Of International Organizations Roland Vaubel, Thomas D Willett, 2019-10-16 The idea for this volume was conceived by Frederick Praeger founder of Westview Press who asked Roland Vaubel if he would put together a collection of chapters on the public choice approach to the study of international organizations Vaubel felt it would be useful to have a coeditor from

the United States and Thomas D Willett enthusiastically agreed to take on these duties **Cuba** Jorge Salazar-Carrillo, Andro Nodarse-Leon, 2015-10-08 This book is a study of Cuba's economic development under communism over the last fifty five years The authors find that Cuba's socioeconomic development has gone backward since the Cuban Revolution in 1959 The authors conclude that Fidel Castro's revolution has been an economic disaster for Cuba The book first outlines Cuba's economic position prior to the revolution It reviews Cuba's rankings with respect to Gross Domestic Product GDP per capita in the 1950s and examines the strength of pre Castro Cuba's foreign reserves and the health of its monetary system It also presents pre Castro Cuba's investments in health care and education and documents the island's development potential in the 1950s The last few chapters describe the precipitous decline in all of these areas of Cuba's economy under Castro Despite the socioeconomic catastrophe of the Castro years the authors envision a post Castro Cuba where this book can provide a benchmark to measure the developmental success that the Cuban work ethic and entrepreneurial spirit can generate in a free market system **Knowledge and Incentives in Policy** Stefanie Haeffele, 2018-06-04 The relative effectiveness of various institutions such as the market or government is based on the ability for individuals to access and use dispersed knowledge in society and the incentives that steer their actions Market process theory emphasizes the effectiveness of the price system to consolidate and transmit knowledge in the marketplace Together this framework provides new insights on the capability of individuals to cooperate and improve society and the limits to government interventions in society The original research in each chapter uses this economic way of thinking to analyze a variety of public policy issues examining the incentives responsible for and the factors that contribute to the creation and effectiveness of the policies These chapters authored by public policy practitioners and researchers tackle such pressing issues as public education the process for approving medical devices tax policy and land use regulation **Human Rights in a Divided World** David Hollenbach, 2024 This book would assemble a number of essays from the past several years that address the question of whether human rights remain valid as universal standards for action in a multicultural religiously pluralistic and economically unequal world It draws on the Roman Catholic tradition to help answer this question in a positive way and also suggests ways that today's global realities call for important developments in the Catholic tradition It applies the proposed understanding of human rights to several issues that are much debated today including religious freedom the rights of refugees and other forced migrants economic rights in the face of significant inequality and the rights of women It will be of use to those in the Catholic community who are working to advance human rights to those interested in why the Catholic church is engaged in human rights issues and to all who seek to advance human dignity on humanistic grounds It addresses both those considering human rights in academic settings and practitioners working to advance human rights in the field *The Politics of Global Debt* Stephen P. Riley, 2016-07-27 The Politics of Global Debt is a detailed political analysis of the origins and consequences of the global debt crisis which emerged in the early 1980s It assesses both

imperialist and New Right interpretations of the crisis and also presents a series of case studies of the effects of external debt upon Africa Latin America Eastern Europe and Asia The book focusses upon the sovereign debt of states and its management and examines the ways in which global economic structures inefficient policies weak institutions and corrupt political leaders contribute to a global debt crisis which has both international and domestic roots *The Battle for Asia* Mark T. Berger,2004-03-01 Asia has long been an ideological battleground between capitalism and communism between nationalism and Westernisation and between the nation state and globalization This book is a history of the Asian region from 1945 to the present day which delineates the various ideological battles over Asia s development Subjects covered include theories of development decolonization US political and economic intervention the effects of communism the end of the Cold War the rise of neo liberalism Asia after the crisis Asia in the era of globalisation Broad in sweep and rich in theory and empirical detail this is an essential account of the growth of Asian miracle and its turbulent position in the global economy of the twenty first century **The Road from Mont Pèlerin** Philip Mirowski,Dieter Plehwe,2009-06-19 What exactly is neoliberalism and where did it come from This volume attempts to answer these questions by exploring neoliberalism s origins and growth as a political and economic movement The Road from Mont P lerin presents the key debates and conflicts that occurred among neoliberal scholars and their political and corporate allies regarding trade unions development economics antitrust policies and the influence of philanthropy
