Reason in Revolt Alan Woods, Ted Grant, 2012-06 At the beginning of the 21st century science and philosophy are at the crossroads The achievements of science and technology in the previous century are unparalleled in history They provide the potential for the solution of all the problems faced by the planet and equally for its total destruction Allegedly scientific theories are being used to prove that criminality is caused not by social conditions but by a criminal gene Black people are alleged to be disadvantaged not because of discrimination but because of their genetic make up Similar arguments are used for poor people single mothers women and so on Of course such science is highly convenient for right wing politicians intent on ruthlessly cutting welfare In the field of theoretical physics and cosmology there is a growing tendency towards mysticism The Big Bang theory of the origin of the universe is being used to justify the existence of a Creator as in the book of Genesis For the first time in centuries science appears to lend credence to religious obscurantism Yet that is only one side of the story A growing number of scientists are becoming discontented with the old outlook The rapid rise of the theory of chaos and complexity is one of the most significant developments in science at the present time Many of the ideas expressed by this new trend are strikingly similar to the theories of dialectical materialism worked out by Marx and Engels over 160 years ago A significant part of this present work is devoted to an explanation of the relationship between Marxist philosophy and the new theories Will this encounter provide the basis for a new and exciting breakthrough in the methodology of science

Reason in Revolt Alan Woods, Ted Grant, 2002 Many people are discontented with their lives It is not just a question of material poverty although that exists in the United States as in all other countries It is also a question of spiritual poverty the emptiness of peoples lives the mind deadening routine of work that is just so many hours out of ones life the alienation that divides men and women from each other the absence of human relations and solidarity that is deliberately fostered in a society that proudly proclaims the laws of the jungle and the so called survival of the fittest read wealthiest the mind numbing banality of a commercialized culture In this kind of world the question we should be asking ourselves is not Is there a life after death but rather is there a life before death Although many people feel in their innermost being that something is going badly wrong they find no logical explanation for it That is not surprising The entire way in which they have been taught to think from their earliest years conditions them to reject any suggestion that there is something fundamentally wrong with the society in which they live They will close their eyes and try to avoid drawing uncomfortable conclusions for as long as

they can Reason in Revolt further develops the theory of Dialectical Materialism using the most important scientific discoveries of the 20th century as a tool First exposed by Marx and Engels Dialectical Materialism is a comprehensive methodology explaining the unity of the laws that govern nature science and society from evolution to chaos theory nuclear physics to childhood development First published in 1995 to coincide with Engels centenary Reason in Revolt has had a great success around the world It has been published in Spanish Italian Greek Turkish Urdu and is now being translated into German and Flemish The Spanish edition recently went into its second edition To date no one has found serious fault with the science of the book And every new discovery of science serves to confirm the statement of Engels that in the last analysis Nature works dialectically

Alain Badiou Jason Barker,2001-12-20 Alain Badiou is rapidly emerging as one of the most radical and influential philosophers of our time Badiou opposes the contemporary reduction of philosophy to nothing but a matter of language and premature announcements of the end of philosophy and thus sets himself against both analytic and continental modes of philosophy Setting the traditional platonic concerns of philosophy truth and being against the modern sophists of postmodernism Badiou has articulated a powerful systematic philosophy with profound ethical and political consequences

Reason in Revolt Ted Grant, **Spontaneous Combustion** Jason Del Gandio,AK Thompson,2017-08-28 From the events of May 1968 to the Arab Spring and Occupy we have seen social movements develop spontaneously around the globe propelling thousands and at times millions of people into the streets to demand an end to oppression In order to make sense of such events the authors draw on George Katsiaficas s conception of the eros effect which picks up and takes off from concepts developed by Herbert Marcuse This effect describes moments in which the instinctual human need for justice and freedom undergoes a massive spontaneous awakening Drawing on Marcuse the concept foregrounds the instinctual foundation of the desire for freedom in which a biologically based pleasure drive eros is given free play from the Foreword by Peter Marcuse However even as the eros effect provides a valuable framework for understanding spontaneous global uprisings Katsiaficas has acknowledged that the concept has remained underdeveloped Spontaneous Combustion provides an introduction to the eros effect along with a series of elaborations applications and critical rejoinders concerning its implications A truly interdisciplinary venture the book features contributions from cutting edge scholars and activists on the frontlines of today s struggles

Emil Brunner's Integration of Faith and Reason Dong In Baek,2024-05-06 In the philosophical purview of our intellectual endeavors Emil Brunner s sojourn through the theological corridors reveals a tapestry of rigorous mental exercises and paradigmatic shifts Commencing his exploration harmonized with the liberal theological currents Brunner found himself adrift embroiled in the tumultuous seas of Karl Barth s unequivocal No to the paradigms of natural theology etching an indelible ideological chasm Traversing three profound metamorphic epochs initiating within the precincts of consciousness theology an echo chamber of Schleiermacher s musings segueing into the gravitational pull of dialectical theological realms and reaching zenith in his unparalleled emphasis on the Truth as

Encounter Brunner's spiritual and intellectual topography is an odyssey of profound depths. This literary endeavor plumbs the profundities of Brunner's philosophical theological metamorphosis. A journey delineating his intricate dance with Bergson's intuitive paradigm, his symbolic lexicon of faith, and an eventual critique of dialectical theology's embrace culminates in an intricate interpretation of sin and the imago Dei. Of paramount significance is Brunner's theological bifurcation from Barth on the quintessential essence of human divine dynamics. While both theological maestros recognize sin's pervasive imprint on the human soul, Brunner postulates the tantalizing possibility of personal divine rendezvous. In this erudite exposition on Brunner's theology, we embark on an intellectual odyssey elucidating the subtle shades and profound resonances of his cognitive evolution. An evolution wherein juxtaposed against theological titans, he architects an idiosyncratic theological timbre echoing through the annals of time.

Eclipse of Reason Max Horkheimer, 2013-05-08 In his most important work, Max Horkheimer surveys and demonstrates the gradual ascendancy of Reason in Western philosophy, its eventual total application to all spheres of life, and what he considers its present reified domination. First published in 1947, Horkheimer here explores the ways in which Nazism, that most irrational of political movements, had co-opted ideas of rationality for its own ends. Ultimately, the book is a warning of the ways this might happen again, and as such, this is a book that has never appeared more timely.

Between Hell and Reason Albert Camus, 1991-08 From 1943 to 1947, Albert Camus was editor in chief of the famous underground and post-Liberation French newspaper *Combat*. Among his journalist writings during this period were eloquent essays that grappled with questions of revolution, violence, freedom, justice, ethics, and the emerging social order. The 41 pieces collected here, most never before published in English, tell the story of a sensitive man's odyssey from hell to reason at a time of tremendous upheaval, while also providing a missing link between Camus's pre-war and post-war works. Almost lyrical in their intensity of thought and language, these newspaper pieces show a Camus new to most American readers and are a unique testimony to an extraordinary period in history with parallels to current changes in Eastern Europe. At the time of Liberation in 1944, Camus called for a revolution in French society, including a violent purge of those who had sided with the Nazis. When this turned into a near civil war of personal vendettas and summary executions, he gradually became disillusioned with his hopes for a new society. His later pieces in *Combat* show him arriving at a more moderate theory of revolt, later echoed in such books as *The Plague* and *The Rebel*: the individual mattered above all human life; was greater than social goals. I have come to the conclusion, he wrote, that men who want to change the world today must choose one of the following: the charnel house, the impossible dream of stopping history, or the acceptance of a relative Utopia that still leaves man the choice to act freely.

The Rhyme and Reason of Politics in Early Modern Europe C.E. Harline, 2012-12-06 Herbert Rowen has always insisted that historians don't need biographers. Outside a

small circle of family friends and students what matters most is not the individual but his or her work Thus the main purpose of the present volume is to highlight Professor Rowen s contributions to the political history of early modern Europe Part I includes assessment of his work by others while Parts II V contain examples of his best articles papers and reviews some published here for the first time most previously hard to get These essays not only add substantively to our understanding of early modern politics but treat both implicitly and explicitly the historian s task per se Hence this is not biography much less innocuous laudation or hagiography which Herb would not forgive Yet it is only fitting that someone who lays so much stress on the human side of History should by way of introduction have something said about his person as well as his work
