Lax, L. Nirenberg, Renato Spigler, 1998 Lax and Nirenberg are two of the most distinguished mathematicians of our times Their work on partial differential equations PDEs over the last half century has dramatically

advanced the subject and has profoundly influenced the course of mathematics. A huge part of the development in PDEs during this period has either been through their work motivated by it or achieved by their postdocs and students. A large number of mathematicians honored these two exceptional scientists in a week long conference in Venice June 1996 on the occasion of their 70th birthdays. This volume contains the proceedings of the conference which focused on the modern theory of nonlinear PDEs and their applications. Among the topics treated are turbulence kinetic models of a rarefied gas vortex filaments dispersive waves singular limits and blow up solutions conservation laws Hamiltonian systems and others. The conference served as a forum for the dissemination of new scientific ideas and discoveries and enhanced scientific communication by bringing together such a large number of scientists working in related fields. The event allowed the international mathematics community to honor two of its outstanding members.

The p -Harmonic Equation and Recent Advances in Analysis Pietro Poggi-Corradini, 2005. Comprised of papers from the IIIrd Prairie Analysis Seminar held at Kansas State University this book reflects the many directions of current research in harmonic analysis and partial differential equations. Included is the work of the distinguished main speaker Tadeusz Iwaniec his invited guests John Lewis and Juan Manfredi and many other leading researchers. The main topic is the so called p harmonic equation which is a family of nonlinear partial differential equations generalizing the usual Laplace equation. This study of p harmonic equations touches upon many areas of analysis with deep relations to functional analysis potential theory and calculus of variations. The material is suitable for graduate students and research mathematicians interested in harmonic analysis and partial differential equations.
