Recent Advances In Nuclear Medicine Vol 3 Progress In Atomic Medicine:

Recent Advances in Nuclear Medicine John Hundale Lawrence, 1974 *Nuclear Techniques in Diagnostic Medicine* Peter P. van Rijk, 2012-12-06 This book was conceived by Professor K H Ephraim the former director of the Institute for Nuclear Medicine of the University Hospital of Utrecht Unfortunately due to a serious illness he was not able to finish the work he started He is however very pleased to know that the book is nevertheless being published In principle the volume consists of two parts The first is dedicated to basic science and technology in nuclear medicine It provides the data which are necessary to a clear understanding of the possibilities and limitations of investigations which make use of radioactive materials The second part of the book covers those disciplines in medicine in which nuclear medicine can be of help in solving certain clinical problems Each chapter can be read separately even without thorough knowledge of the first part of the book The contributors to this book come from both Europe and North America Each of them has written his chapter out of long standing personal interest in his particular field of nuclear medicine This book will be of value to a wide variety of professionals It is of interest not only to clinicians of various specialties but also to diagnostic professionals i e radiologists and nuclear medicine clinicians Last but not least it will be of use to physicians in training **Handbook of Radiation Doses in Nuclear Medicine and Diagnostic X-Ray** James G. Kereiakes, Marvin Rosenstein, 2019-06-13 Published in 1980 This book provides a convenient single source for practical information on doses from radiopharmaceuticals and from diagnostic X Rays **Catalog of Copyright Entries. Third Series** Library of Congress. Division of Research Grants,1970 **Blood cells in nuclear medicine, part II** Gerhard F. Fueger,2012-12-06 G F FUEGER Among the many processes in Physiology few appear more inviting to be studied by tracers and external imaging than the variety of the routes of migratory blood cells in health and disease Much emphasis has been placed lately on the methods of labelling of the white blood cells It is obviously quite important and necessary to refine the methods of leucocytic labelling particularly to search for ways to label selectively a specific group of white blood cells but there is also the need to review and keep abreast with the developing knowledge of the white blood cells themselves especially their behaviour under pathological conditions as seen by histology and scintigraphy their biological properties their immunological characteristics and the mechanisms of the control of leucocytic functions Similarly it appears desirable to analyze animal models of inflammation as well as to review the dosimetry and the biodistribution of labelled white blood cells in humans This book is the result of a cooperative effort to review certain highlights of the physiology of leucocytes labelled and unlabelled as a corollary to the effort concerning the labelling of white blood cells In preparing this book we aim for a better understanding and definition of the goals to be achieved by the successful labelling of the migratory cells of the body XI CONTRIBUTORS Becker H Medizinische Universitaetsklinik der Universitaet Graz Graz Landeskrankenhaus Austria Bjurman B Department of Radiation Physics General Hospital Malmoe Sweden Chiles C
