From the Watching of Shadows S. Webb, 2024-12-06 From the Watching of Shadows The Origins of Radiological Tomography presents the first complete history of body imaging by discrete sections from its earliest beginnings around 1920 to modern times Divided into two parts the book is highly illustrated with many original figures from patents and some previously unpublished pictures The first part covers classical tomography from 1920 to the 1960s including the origins of radiological tomography The second part takes a fresh look at computed transmission and emission tomography that includes recent developments by pioneering tomographers Tables in each chapter summarize key historical landmarks The book also includes an extensive glossary of technical terms and a comprehensive index It is ideal reading for diagnostic radiologists and radiographers interested in the origins of their techniques for practicing medical physicists and for historians of medicine and science Blood cells in nuclear medicine, part II Gerhard F. Fueger, 2012-12-06 G F FUEGER Among the many processes in Physiology few appear more inviting to be studied by tracers and external imaging than the variety of the routes of migratory blood cells in health and disease Much emphasis has been placed lately on the methods of labelling of the white blood cells It is obviously quite important and necessary to refine the methods of leucocytic labelling particularly to search for ways to label selectively a specific group of white blood cells but there is also the need to review and keep abreast with the developing knowledge of the white blood cells themselves especially their behaviour under pathological conditions as seen by histology and scintigraphy their biological properties their immunological characteristics and the mechanisms of the control of leucocytic functions Similarly it appears desirable to analyze animal models of inflammation as well as to review the dosimetry and the biodistribution of labelled white blood cells in humans This book is the result of a cooperative effort to review certain highlights of the physiology of leucocytes labelled and unlabelled as a corollary to the effort concerning the labelling of white blood cells In preparing this book we aim for a better understanding and definition of the

goals to be achieved by the successful labelling of the migratory cells of the body XI CONTRIBUTORS Becker H Medizinische Universitaetsklinik der Uni versitaet Graz Graz Landeskrankenhaus haus Austria Bjurman B Department of Radiation Physics General Hospital Malmoe Sweden Chiles C *Current Catalog* National Library of Medicine (U.S.),1979 Includes subject section name section and 1968 1970 technical reports **Nuclear Science Abstracts** ,1976 *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1971 First multi year cumulation covers six years 1965 70
