Recent Results in Peptide Hormone and Androgenic Steroid Research Ferenc A. László, 1979 **Systemic Hormones, Neurotransmitters and Brain Development** G. Dörner, S. M. McCann, L. Martini, 1986-10-21 Neurobiology of Oxytocin Detlev Ganten, Donald Pfaff, 2012-12-06 **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 Brain Plasticity, Learning, and Memory B. E. Will, 2013-03-13 This book is the result of the contributions presented at a conference held from August 30 to September 1, 1984 at the Université Louis Pasteur, Strasbourg, France. This meeting was organized under the joint auspices of the European Brain and Behaviour Society (EBBS) and the Société Française pour l'Étude du Comportement Animal (SFECA). The objective of this meeting was to bring together an international group of participants to evaluate and to report on recent research in three broad and overlapping fields within the general theme of the relationships between brain plasticity and learning and memory. These three fields are developmental plasticity, adaptive plasticity, and restorative plasticity. Although the boundaries between these fields are a matter of debate, see Introduction, they have been retained as the major sections of this volume, the arrangement of which roughly parallels that of the meeting. We believe and very much hope that the contents of this volume convey an internal consistency despite the diversity of the material presented. **Recent Progress in Hormone Research** Roy O. Greep, 2013-10-22 Recent Progress in Hormone Research, Volume 30, presents the proceedings of the 1973 Laurentian Hormone Conference held at Mont Tremblant, Province of Quebec, Canada, on August 26-31, 1973. The book presents papers on the regulation of the gonadotropins in primates, their neutralization by specific antibodies, and their role in oocyte maturation. The text also includes papers on the enzymatic interconversion of estrogens and on the concept of the mechanism of steroid hormone action. Papers on the thermogenic action of thyroid hormone related to active sodium transport are also considered. The book further tackles papers on the structure, heterogeneity, and activity of many of the lesser known hormones or hormone-like substances such as the somatomedins A, B, and C, the epidermal growth factor, the insect hormones, parathyroid hormone, 1,25-dihydroxycholecalciferol, and prostaglandins. Endocrinologists and physiologists will find the text invaluable. **Biomedical Significance of Peptide Research** Ferenc A. László, F.
