The book explores sites in Africa, the Americas, Europe, Asia, and Oceania. It then The Malay Peninsula Michel Jacq-Hergoualc'h, 2018-12-24 This book attempts to evaluate the role of the Malay Peninsula as a crossroads in the great wave of commercial relationships along the maritime Silk Road from the first centuries of the Christian era to the 14th century. Through these exchanges, representatives of all the civilizations of Asia entered into contact along its shores. They left in this place a part of themselves as can be seen in the great stylistic diversity of the religious and commercial artefacts which have been found in the area. These artefacts have been analysed and categorized afresh in the light of more precise information provided in Chinese texts concerning the nature of the political entities developing at the time: often dynamic city states or more modest chiefdoms. **Major Archaeological Discoveries Along the Chinese Silk Road** Xiao Li, 2023-09-11 The book explores largely overlooked areas of Silk Road studies by searching for multidisciplinary evidence on the connotations of Silk Road culture and by rewriting social complexities along the Silk Road in different historical periods. It investigates the impacts of conflicts and communication between Silk Road civilizations, presents the latest archaeological discoveries and research findings in the field of Silk Road studies, and develops a new Silk Road archaeological system. By doing so, it defines a new direction for Silk Road archaeological studies. The New Archeological Discoveries and Their Bearing Upon the New Testament and Upon the Life and Times of the Primitive Church Camden McCormack Cobern, 1917 **New Frontiers in the Neolithic Archaeology of Taiwan (5600-1800 BP)** Su-chiu Kuo, 2019-12-05 This book summarizes the systematic research on the Neolithic cultures of Taiwan based on the latest archaeological discoveries and focusing on the maritime interactions between mainland southeast China, Taiwan, and southeast Asia during 5600-1800 BP. The study demonstrates and sheds light on the distinctiveness of Taiwan's Neolithic cultures, their interactions with the external cultures of its surrounding regions, the maritime cultural diffusion, and early seafaring across sea regions like the Taiwan Strait, Bashi channel, and South China Sea. Drawing on the author's deep understanding of Taiwan and its surrounding regions, the book also incorporates recent archaeological findings by Taiwanese researchers. Further based on a new reconstruction of the spatiotemporal framework of Taiwanese prehistoric cultures, the chronologically arranged chapters discuss Neolithic cultures of the early, middle, late, and final stage of this island region, revealing the prehistoric cultural development, regional typology, and their maritime interactions with surrounding regions. The typological study of the native traits and external cultural influences of each stage of Neolithic culture shows the prehistoric and early history of this key stepping stone in the Asia Pacific region. **Ancient Echoes: A Journey Through North America's Archaeological**
