Creating Your Giant Self Robert Rose,2001-06-05 A critical reason this is well maybe not THE best a useful book is that YOU do the work The more you apply what you learn and understand the greater your growth This is not a quick fix book but one to assist you in a lifelong journey of self discovery It is difficult to understand what another person really thinks or feels because it is dangerous to your career your relationships and even your existence You can learn to know who you really are As you travel you will find things about yourself you dislike and like The more honest you are the more you will like yourself and amazingly enough like and be liked more easily by others By using the metaphors of Giant and diminished self you have a means to constantly evaluate what you are experiencing As you do this you are getting more in tune with what you re thinking and feeling Most people are not congruent that is what they think and what they feel are not in synch In psychology when this happens it is called inappropriate affect The face you show does not reflect what you feel or think Yet in many situations you cannot because the repercussions are too great express or even show what you re thinking and feeling so what you say does not reflect your internal experience As the years pass you move further away from congruency and often can no longer even recognize what you are feeling and thinking You believe that what you re supposed to feel or think in that setting is what you re actually feeling and thinking I will try to help you discover who you are or could have become or still could become In metaphor it is creating your GIANT SELF which is the realization of your inherent potentials plus hard work This self is a marked contrast to your diminished self This self is the brainwashed depressed frightened rigid self that those with greater power have made you believe is who you are Without even knowing you I can say that you can become a person who can look yourself in the mirror and honestly like who you see It means opening up to ideas and concepts that may be confusing unnerving and may mean that your world as you know it now will never be the same

Many of the ideas seem to be so simple and logical that you will say I knew that You may know it but have you had the courage to apply it I think one reason Dr Wilson believes in this book is that I send an honest searchlight into my mind body and soul Some of the things I discovered I did not like still do not like However I found that by challenging EVERYTHING I believed I was able to free myself from many of the errors of my past Besides my dark sides I found a rather decent intelligent person who was worthy of being loved and appreciated One thing I had to admit and face was the number and constancy of errors I made on a regular basis Humans are error making machines There are so many things that cause us to make mistakes that each of us could talk for hours about the stupid things we've done How many times have you pulled instead of pushed even though the sign on the door was very clear I know I have I shake my head and laugh most of the time Other times my inattention or stupidity creates errors of judgement that could have caused a serious accident I misjudge how far away a car is before I shoot out into the intersection Or I'm in a rush and I take a chance knowing full well that I'm acting like a fool Take our senses Each information bit that stimulates one of our sensory nerves is affected by our attention toward it its magnitude its intensity its uniqueness and the number and sensitivity of the nerve endings that receive it It then travels through that sensory system with countless chances for the message to be garbled or misinterpreted
