Love Power And Knowledge:

Love, Power and Knowledge Hilary Rose, 1994 In this book Hilary Rose develops new terms for thinking about science and feminism locating the feminist criticism of science as both integral to the feminist movement and to the radical science movement

Power, Knowledge and Feminist Scholarship Maria do Mar Pereira, 2017-02-10 Feminist scholarship is sometimes dismissed as not quite proper knowledge it's too political or subjective many argue But what are the boundaries of proper knowledge Who defines them and how are they changing How do feminists negotiate them And how does this boundary work affect women's and gender studies and its scholars and students' lives These are the questions tackled by this ground breaking ethnography of academia inspired by feminist epistemology Foucault and science and technology studies Drawing on data collected over a decade in Portugal and the UK US and Scandinavia this title explores different spaces of academic work and sociability considering both official discourse and corridor talk It links epistemic negotiations to the shifting political economy of academic labour and situates the smallest but fiercest departmental negotiations within global relations of unequal academic exchange Through these links this timely volume also raises urgent questions about the current state and status of gender studies and the mood of contemporary academia Indeed its sobering yet uplifting discussion of that mood offers fresh insight into what it means to produce feminist work within neoliberal cultures of academic performativity demanding increasing productivity As the first book to analyse how academics talk publicly or in off the record humour about feminist scholarship *Power Knowledge and Feminist Scholarship* is essential reading for scholars and students in gender studies LGBTQ studies post colonial studies STS sociology and education Winner of the FWSA 2018 Book Prize competition The Open Access version of this book available at <https://doi.org/10.4324/9781315692623> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Chaucer on Love, Knowledge, and Sight Norman Klassen, 1995 The author argues that Chaucer is unorthodox in exploiting the possibilities for using sight both to express emotional experience and to accentuate rationality at the same time The conventional opposition of love and knowledge in the phenomenon of love at first sight gives way in Chaucer's development of love knowledge and sight to a symbiosis in his love poetry

Browning Studies

(Routledge Revivals) Edward Berdoe, 2014-05-01 This title first published in 1909 presents a selection of the most important essays by members of the renowned Browning Society which existed to promulgate the works of and appreciation for perhaps the greatest English poet of the Victorian Age Browning's poetry deals with themes that are of perennial importance the nature of the human person human love and the source of the love God Browning Studies will appeal to Browning enthusiasts and the message his writing communicates A profound passionate living triumphant faith in Christ and in the immortality and ultimate redemption of every human soul in and through Christ Love's Knowledge Martha C. Nussbaum, 1990-11-15 This volume brings together Nussbaum's published papers on the relationship between literature and philosophy especially moral philosophy The papers many of them previously inaccessible to non specialist readers deal with such fundamental issues as the relationship between style and content in the exploration of ethical issues the nature of ethical attention and ethical knowledge and their relationship to written forms and styles and the role of the emotions in deliberation and self knowledge Nussbaum investigates and defends a conception of ethical understanding which involves emotional as well as intellectual activity and which gives a certain type of priority to the perception of particular people and situations rather than to abstract rules She argues that this ethical conception cannot be completely and appropriately stated without turning to forms of writing usually considered literary rather than philosophical It is consequently necessary to broaden our conception of moral philosophy in order to include these forms Featuring two new essays and revised versions of several previously published essays this collection attempts to articulate the relationship within such a broader ethical inquiry between literary and more abstractly theoretical elements **Unlearning God** Philip Gulley, 2018-09-25 America's favorite Quaker storyteller explores the terrain of faith and doubt as shaped by family church and young love finding his way to a less convenient but fully formed adult spirituality Most of us grow up taking in whole belief systems with our mother's milk only to discover later that what we received as being certain is actually nothing like it And then we're faced with a choice retreat to spiritual security and the community that comes with it or strike out into the unknown With his trademark humor and down home wisdom Philip Gulley serves as just the spiritual director a wayward pilgrim could warm to inviting readers into his own sometimes rollicking sometimes daunting journey of spiritual discovery He writes about being raised by a Catholic mother and a Baptist father across the street from a family of Jehovah's Witnesses all three camps convinced the others are doomed To nearly everyone's consternation Philip grows up to be a Quaker and a pastor In *Unlearning God* Gulley showcases his well loved gift as a storyteller and his acute sensibilities as a public theologian in conversations that will charm provoke encourage and inspire Time and Space, a metaphysical essay, etc Shadworth Hollway Hodgson, 1865 Time and Space Shadworth Hollway Hodgson, 1865 *Power, Knowledge and the Academy* V. Gillies, H. Lucey, 2007-08-24 This book takes a close up and critical look at both the elusive and blatant workings and consequences of power in a range of everyday sites in universities Chapters focus on specific locations in which power shapes personal and institutional

knowledge including student supervisor relationships research teams networking and literature reviews *Basic Trends of Our Times* Pitrim A. Women in Science Ruth Watts, 2013-05-13 The first book of its kind to provide a full and comprehensive historical grounding of the contemporary issues of gender and women in science *Women in Science* includes a detailed survey of the history behind the popular subject and engages the reader with a theoretical and informed understanding with significant issues like science and race gender and technology and masculinity It moves beyond the historical work on women and science by avoiding focusing on individual women scientists Collection - Laboratory - Theater Helmar Schramm, Ludger Schwarte, Jan Lazardzig, 2008-08-22 This volume launches a new eight volume series entitled *Theatrum Scientiarum* on the history of science and the media which has arisen from the work of the Berlin special research project on Performative Cultures under the aegis of the Theatre Studies Department of the Free University The volume examines the role of space in the constitution of knowledge in the early modern age Kunstkammern art and curiosities cabinets laboratories and stages arose in the 17th century as instruments of research and representation There is however still a lack of precise descriptions of the epistemic contribution made by material and immaterial space in the performance of knowledge Therefore the authors

present a novel view of the conditions surrounding the creation of these spatial forms Account is taken both of the institutional framework of these spaces and their placement within the history of ideas the architectural models and the modular differentiations and the scientific consequences of particular design decisions Manifold paths are followed between the location of the observer in the representational space of science and the organization in time and space of sight speech and action in the canon of European theatrical forms Not only is an account given of the mutual architectural and intellectual influence of the spaces of knowledge and the performance spaces of art they are also analyzed to ascertain what was possible in them and through them This volume is the English translation of *Kunstkammer Laboratorium* B hne de Gruyter Berlin 2003

Appreciating the magnificence of Jesus gift is difficult How can you appreciate the magnificence of something that you cannot understand Logic a few recent scientific discoveries and two faith choices tell us the purpose of our mortal bodies provide evidence for the existence of our souls and define the nature of our souls Our mortal bodies provide a critical experience that our souls cannot obtain in any other way The nature of the world in which our souls exist as well as the nature of time is then described as well as why mortals and souls experience time differently The two faith choices used in conjunction with these scientific discoveries are that God is love and that we are being created in the image of God When all these things are considered it then becomes possible to understand the necessity and magnificence of Jesus sacrifice
