*The Global Development Of Policy Regimes To Combat Climate Change* Alex Bowen, Nicholas Stern, John Whalley, 2014-04-01 The year 2015 will be a landmark year for international climate change negotiations Governments have

agreed to adopt a universal legal agreement on climate change at the 21st Conference of Parties COP21 to the United Nations Framework Convention on Climate Change UNFCCC in Paris in 2015 The agreement will come into force no later than 2020 This book focuses on the prospects for global agreement how to encourage compliance with any such agreement and perspectives of key players in the negotiations the United States India China and the EU It finds that there is strong commitment to the established UN institutions and processes within which the search for further agreed actions will occur There are already a myriad of local and regional policies that are helping to reduce greenhouse gas emissions and build mutual confidence However the chapters in the book also highlight potential areas of discord For instance varying interpretations of the common but differentiated responsibilities of developing countries agreed as part of the UNFCCC could be a major sticking point for negotiators When combined with other issues such as the choice of consumption or production as the basis for mitigation commitments the appropriate time frame and base date for their measurement and whether level or intensity commitments are to be negotiated the challenges that need to be overcome are considerable The authors bring to bear insights from economics public finance and game theory

#### **Governing the Climate Change Regime**

Tim Cadman, Rowena Maguire, Charles Sampford, 2016-12-01 This volume the second in a series of three examines the institutional architecture underpinning the global climate integrity system This system comprises an inter related set of institutions governance arrangements regulations norms and practices that aim to implement the United Nations Framework Convention on Climate Change UNFCCC Arguing that governance is a neutral term to describe the structures and processes that coordinate climate action the book presents a continuum of governance values from thick to thin to determine the regime's legitimacy and integrity The collection contains four parts with part one exploring the links between governance and integrity part two containing chapters which evaluate climate governance arrangements part three exploring avenues for improving climate governance and part four reflecting on the road to the UNFCCC's Paris Agreement The book provides new insights into understanding how systemic institutional and governance failures have occurred how they could occur again in the same or different form and how these failures impact on the integrity of the UNFCCC This work extends contemporary governance scholarship to explore the extent to which selected institutional case studies thematic areas and policy approaches contribute to the overall integrity of the regime

#### **Routledge Handbook of Climate Change and Society**

Constance Lever-Tracy, 2010-07-12 As the time scales of natural change accelerate and converge with those of society

Routledge Handbook of Climate Change and Society takes the reader into largely uncharted territory in its exploration of anthropogenic climate change. Current material is used to highlight the global impact of this issue and the necessity for multidisciplinary and global social science research and teaching to address the problem. The book is multidisciplinary and worldwide in scope with contributors spanning specialisms including agro forestry economics environmentalism ethics human geography international relations law politics psychology sociology and theology. Their global knowledge is reflected in the content of the text which encompasses chapters on American European and Chinese policies case studies of responses to disasters and of the new technological and lifestyle alternatives that are being adopted and the negotiations leading up to the Copenhagen conference alongside a preface assessing its outcomes. Starting with an initial analysis by a leading climatologist, key issues discussed in the text include recent findings of natural scientists social causation and vulnerability media and public recognition or scepticism and the merits and difficulties of actions seeking to mitigate and adapt. This accessible volume utilizes a wealth of case studies explains technical terms and minimises the use of acronyms associated with the subject making it an essential text for advanced undergraduates postgraduate students and researchers in the social sciences.

**Rethinking Authority in Global Climate Governance** Thomas Hickmann, 2015-10-16. In the past few years, numerous authors have highlighted the emergence of transnational climate initiatives such as city networks, private certification schemes and business self-regulation in the policy domain of climate change. While these transnational governance arrangements can surely contribute to solving the problem of climate change, their development by different types of sub and non-state actors does not imply a weakening of the intergovernmental level. On the contrary, many transnational climate initiatives use the international climate regime as a point of reference and have adopted various rules and procedures from international agreements. *Rethinking Authority in Global Climate Governance* puts forward this argument and expands upon it using case studies which suggest that the effective operation of transnational climate initiatives strongly relies on the existence of an international regulatory framework created by nation states. Thus, this book emphasizes the centrality of the intergovernmental process clustered around the United Nations Framework Convention on Climate Change (UNFCCC) and underscores that multilateral treaty-making continues to be more important than many scholars and policy makers suppose. This book will be of great interest to students and scholars of global environmental politics, climate change and sustainable development.

**Global Climate Governance** David Coen, Julia Kreienkamp, Tom Pegrām, 2020-12-17. Climate change is one of the most daunting global policy challenges facing the international community in the 21st century. This Element takes stock of the current state of the global climate change

regime illuminating scope for policymaking and mobilizing collective action through networked governance at all scales from the sub national to the highest global level of political assembly It provides an unusually comprehensive snapshot of policymaking within the regime created by the United Nations Framework Convention on Climate Change UNFCCC bolstered by the 2015 Paris Agreement as well as novel insight into how other formal and informal intergovernmental organizations relate to this regime including a sophisticated EU policymaking and delivery apparatus already dedicated to tackling climate change at the regional level It further locates a highly diverse and numerous non state actor constituency from market actors to NGOs to city governors all of whom have a crucial role to play *Environmental Challenges and Governance* Sacchidananda Mukherjee, Debashis Chakraborty, 2015-03-02 The economies located in East South and Southeast Asia have witnessed an interesting growth sustainability trade off over the last decades While growth considerations have paved ways for deepened ties with growing trade investment waves and increasing population pressure necessitated exploitation of hitherto unutilized natural resources focus on environmental sustainability has been a recent consideration The growth impetus still playing a key role in these economies it becomes imperative that the countries effectively address the key sustainability concerns e g air and water pollution land degradation loss of biodiversity climate change issues like CO2 emissions etc But how prepared is the governance mechanism of these countries covering not only the legislative and administrative framework but also involvement of the judiciary presence of spirited civil society and active engagement of stakeholders in policy framing dialogues to rise up to these challenges The book seeks an answer to this question through the environmental governance mechanism and natural resource conservation policies in three vibrant regions within Asia A holistic development dimension of sustainable development path emerges through discussion of policies adopted by developed Japan South Korea upper middle China Malaysia developing India Indonesia Philippines Sri Lanka Thailand and least developed countries Bangladesh Myanmar Nepal **Encyclopedia of Governance** Mark Bevir, 2007

**Environment, Politics and Society** Ram Alagan, Seela Aladuwaka, 2018-05-18 Human activities and decision making have enormous impacts on the environment This volume engages in critical conversations on these issues and how their inter connectedness and outcomes shape the natural environment and human activity **Greening the Globe** Ann Hironaka, 2014-09-15 Recent decades have seen a rapid expansion of environmental activity in the world including the signing of a growing number of environmental treaties and the formation of international organizations like the United Nations Environment Programme UNEP *Greening the Globe* employs world society theory aka world polity theory or sociological institutionalism to explore the origins and consequences of international efforts to address environmental problems Existing scholarship seems paradoxical case studies frequently criticize treaties and regulatory structures as weak and ineffective yet statistical studies find improvements in environmental conditions This book addresses this paradox by articulating a bee swarm model of social change International institutions rarely command the power or resources to directly

impose social change Nevertheless they have recourse via indirect mechanisms setting agendas empowering various pro environmental agents and propagating new cultural meanings and norms As a result world society generates social change even if formal institutional mechanisms and sanctions are weak **France on the World Stage** M.
