New Contractualism:

Contractualism Jussi Suikkanen, 2020-05-28 This Element begins by describing T M Scanlon's contractualism according to which an action is right when it is authorised by the moral principles no one could reasonably reject This view has argued to have implausible consequences with regards to how different sized groups non human animals and cognitively limited human beings should be treated It has also been accused of being theoretically redundant and unable to vindicate the so called deontic distinctions I then distinguish between the general contractualist framework and Scanlon's version of contractualism I explain how the general framework enables us to formulate many other versions of contractualism some of which can already be found in the literature Understanding contractualism in this new way enables us both to understand the structural similarities and differences between different versions of contractualism and also to see the different objections to contractualism as internal debates about which version of contractualism is correct **Human Security as Statecraft** Nik

Hynek, 2012-02-20 This book critically investigates the discourses and practices of human security and aims to delve below the stereotypical imageries representing them Drawing on Foucault and Deleuze the author approaches human security from a new perspective with the aim of ascertaining what has been behind and underneath a certain spatio temporal articulation of human security and with what political implications and consequences Each human security assemblage is composed of messy discourses and practices which are loosely related and sometimes even disconnected This book examines the Canadian and Japanese articulations of human security and establishes the kinds of structural terrains have enabled shaped or blocked the unfolding of these versions of human security The pivotal contention of the book is that Canadian and Japanese articulations of human security have been different because they have grown from completely different domestic economies of power governing the relationship between the state apparatus and the non profit and voluntary sector While the Canadian human security assemblage has been shaped by transformations in the country's advanced liberal model of government the Japanese has been shaped by the continuities of Japan's bureaucratic authoritarianism A novel approach is employed for the related process tracing a general series linking structural conditions with actual articulations of the human security projects and their further development including analysis of their unintended consequences This book will be of much interest to students of Critical Security Studies human security global governance foreign policy and IR Security studies **The Fifth Republic at Twenty** William G. Andrews, Stanley Hoffmann, 1980-06-30 The first twenty years of the Fifth

Republic encompass four presidential elections alternating political control of the National Assembly and years of rapid economic growth and contraction Thus a variety of events now allow an evaluation of the efficacy of the Fifth Republic The chapters of this book examine the governmental framework and various political groups that have vied for control of it industrial development and modernization education and culture and foreign policy Containing both favorable and critical assessments the book provides a comprehensive balance sheet on the Fifth Republic and the influence of Charles de Gaulle

Its 25 essays were written by such well known scholars as Crozier Gagnon Gour vitch Ross Suleiman and others as well as some of the younger generation of French specialists with concluding synthesis by Stanley Hoffmann The book features an essay of historical importance on the Constitution of the Fifth Republic by the Constitution s own father the former Prime Minister of France Michel Debr Looking into the areas of government politics economy society culture and foreign policy this volume gives the reader an understanding of the considerable impact of Charles de Gaulle s administration on contemporary France

Contracts as Reinvented Institutions in the Public Sector Carsten Greve, Niels Ejersbo, 2005-04-30

Contracting has become one of the tools that governments use to make their services more efficient and effective This work studies the positives and negatives involved with the multiple elements of contracting Contract culture is broken down into its many parts rules and regulations norms and values local governments and the private sector This allows the authors to examine the topic through a unique cross cultural lens and provide a fresh take on this expanding topic Sources such as survey data in depth case studies and analysis of advocacy coalitions are used to shed new light on contract governance Topics include Contracting on the Public Agenda Limits of the New Contractualism The hard and soft elements of contracts Local Governments Contracting as part of the New Public Management

Statecraft, Welfare and the Politics of Inclusion K. Jayasuriya, 2006-04-12 Jayasuriya explores the dynamics of a new social agenda conceived within the boundaries of neo liberalism The enhanced focus on issues such as poverty through strategies of inclusion frames new terms of engagement for social policy different from that which existed in the terrain of the post war welfare state

State-led Privatisation and the Demise of the Democratic State Mike Raco, 2016-04-01 For decades now we have been told that we are living through a governance revolution Gone are the days when government agencies and bureaucrats told us what to do and how to do it We are no longer clients of the state but empowered citizens who are able to take greater control over our own lives and the activities of those who govern in our name Across the world the prevailing narrative has become one of Good Governance devolution liberation and freedom of expression In policy fields as diverse as development planning healthcare and public transport a neo pluralist rhetoric has emerged based on the principles of co production and partnership working And yet at the same time a curious paradox is emerging Whilst the prevailing zeitgeist is one of openness and citizen empowerment this book will show that in reality new modes of governance are emerging in which state controls have actually been expanded into many spheres of life that were previously left unregulated For some a new political economy of regulatory capitalism has emerged and this in turn has ushered in unprecedented forms of state led privatisation under which democratically elected politicians have voluntarily handed over their powers responsibilities and resources to new corporate elites who promise to deliver services in more efficient and equitable ways As the discussion will show in reality the rhetoric of Good Governance has therefore been used to legitimate the wholesale transfer of welfare assets and services beyond the democratic control of state actors and the citizens that they represent Privatisation has become a new utopianism that involves a revolution in ways

of thinking about democracy governance and urban management the implications of which will be felt by current and future generations

Responsibility and Responsibilisation in Education Christine Halse, Catherine Hartung, Jan Wright, 2019-10-23 Concerns with the nature of and relationship between responsibility and responsibilisation pervade contemporary social political and moral life This book turns the analytical lens on the ways in which responsibility and responsibilisation operate in diverse educational settings and relationships and social policy and geographical contexts in the USA Europe the UK New Zealand and Australia Scholars have sought to explain the genealogy and the m range of rationalities technologies bio politics and modes of governmentality that bring responsibility and responsibilisation into being how they act on and are taken up by individuals groups and organisations and the risks and possibilities they create and delimit for individuals social collectives and their freedoms Contributors to this collection have diverse views and perspectives on responsibility and responsibilisation This disagreement is a strength It underlines the importance of unravelling both the differences and similarities across scholars and contexts It also issues a salutatory warning about assumptions that reduce the complex concepts of responsibility and responsibilisation to simplistic fixed categories or to generalising and universalising single cases or experiences to all areas of education This volume was originally published as a special issue of Discourse Studies in the Cultural Politics of Education

Security and Global Governmentality Miguel de Larrinaga, Marc G. Doucet, 2010-05-21 This book examines global governance through Foucaultian notions of governmentality and security as well as the complex intersections between the two The volume explores how Foucault s understanding of the general economy of power in modern society allows us to consider the connection of two broad possible dynamics the global governmentalization of security and the securitization of global governance If Foucault s work on governmentality and security has found resonance in IR scholarship in recent years it is in large part due to his understanding of how these forms of power must necessarily take into account the management of circulation that in seeking to maximize good versus bad circulatory flows brings into play and problematizes the inside outside upon which domestic and international spaces have been traditionally understood Indeed Foucault introduces a set of conceptual tools that can inform our analyses of globalization global governance and security in ways that have been left largely unexplored in the discipline of IR Miguel de Larrinaga is Assistant Professor at the University of Ottawa where he has been teaching since 2002 Marc G Doucet is an Associate Professor in the Department of Political Science at Saint Mary s University

Encyclopedia of Public Administration and Public Policy David Andrew Schultz, James A Beverly, Professor and Senior Fellow David Schultz, 2014-05-14 An alphabetical listing of administrative agencies and departments with details about the office and its role in government as well as terms and definitions **Governing Australia** Mitchell Dean, Barry Hindess, 1998-06-22 Inspired by Foucault's discussion of governmentality this book makes a major contribution to our understanding of government The book is interdisciplinary in approach and combines theoretical discussion with empirical focus It includes a substantial introduction by the editors and contains work critiquing the central notion of governmentality A range of topics are discussed including regulation of the unemployed and people with HIV AIDS sexual harassment in the military the corporatisation of education new contractualism and governing personality While their topics are varied the contributors explore a range of shared concerns including notions of problematisation expert knowledge rationality freedom and autonomy giving the volume focus and rigour This book will be essential reading in political science sociology law philosophy education and economics **ADMINISTRATIVE THEORIES AND MANAGEMENT THOUGHT** R. K. SAPRU, 2013-03-11 The Third Edition of this well received text encompasses the manifold administrative theories and management thought propounded and enunciated by administrative and management thinkers over the past several decades The text incorporates major additions and revisions to make it more up to date comprehensive and reader friendly What's New To This Edition Addition of five new chapters to enlarge the scope of the book A revised chapter on Public Choice Theory The text not only gives a complete and up to date analysis of administrative theories but also introduces the reader to new concepts approaches and techniques in public administration Undergraduate and postgraduate students of public administration and postgraduate students of political science and management should find this fully revised text to be of immense value **A Class Act** Susan Robertson, 2017-09-29 This book offers an original and challenging theoretical and empirical approach to mapping the changing nature of teachers work historically and in the contemporary period It is an attempt to understand how and in what ways teachers work has changed following the demise of the post war settlement and the imminent collapse of teachers project of professionalism secured through solidaristic strategies such as unionism Dr Robertson argues that in order to understand these issues a more rigorous set of conceptual tools around social class occupational power and worker control is needed The first two sections of the book set out to address that problem The final section elaborates on the changing contexts and conditions for contemporary teachers more generally and argues that structural and ideological changes within educational provision have led to differing capacities in the realization of class

assets *Voices at Work* Alan Bogg, Tonia Novitz, 2014-04-03 This edited collection is the culmination of a comparative project on Voices at Work funded by the Leverhulme Trust 2010 2013 The book aims to shed light on the problematic concept of worker voice by tracking its evolution and its complex interactions with various forms of law Contributors to the volume identify the scope for continuity of legal approaches to voice and the potential for change in a sample of industrialised English speaking common law countries namely Australia Canada New Zealand UK and USA These countries facing broadly similar regulatory dilemmas have often sought to borrow and adapt certain legal mechanisms from one another The variance in the outcomes of any attempts at borrowing seems to demonstrate that despite apparent membership of a common law family there are significant differences between industrial systems and constitutional traditions thereby casting doubt on the notion that there are definitive legal solutions which can be applied through transplantation Instead it seems worth studying the diverse possibilities for worker voice offered in divergent contexts not only through traditional forms of labour law but also such disciplines as competition law human rights law international law and public law In this way the comparative study highlights a rich multiplicity of institutions and locations of worker voice configured in a variety of ways across the English speaking common law world This book comprises contributions from many leading scholars of labour law politics and industrial relations drawn from across the jurisdictions and is therefore an exceedingly comprehensive comparative study It is addressed to academics policymakers legal practitioners legislative drafters trade unions and interest groups alike Additionally while offering a critique of existing laws this book proposes alternative legal tools to promote engagement with a multitude of voices at work and therefore foster the effective deployment of law in industrial relations *Activation and Labour Market Reforms in Europe* S. Betzelt, S. Bothfeld, 2011-06-14 This book analyzes in what way activation policies impact on given patterns of social citizenship that predominate in national contexts It argues that the liberal paradigm of activation introduced into labour market policies in all Western European states challenges the specific patterns of social citizenship in each country **Learning Transnational Learning** Åge Mariussen, Seija Virkkala, 2013-05-02 Systems of innovation that are conducted within national borders can preserve inefficient solutions and prevent development This has led to a feeling that transnational learning strategies are more and more desirable In practice the field of transnational learning has been dominated by various policy making institutions such as the OECD and European Union working through different types of policy instruments and programs such as structural funds open methods of coordination as well as international research institutions and networks set up by cooperating national governments working on comparative analysis benchmarking and indicators This book lays out a set of methods which can further enhance the experience of transnational learning starting from the sociological ideas promoted by Charles Sabel of learning through monitoring and by Marie Laure Djelic and others of the translation of experiences between different countries Case studies and examples are collected from three fields industrial development tourism and local government **Westminster Legacies** Haig

Patapan, John Wanna, Patrick Moray Weller, 2005 Examines the ways in which the Westminster system has influenced the shaping of responsible government and democracy across Asia Australasia and the Pacific It also examines the ways the Westminster system has been adapted in these different countries in the light of local practices and traditions *Rethinking Australian Citizenship* Wayne Hudson, John Kane, 2000-06 The notion of citizenship is now being taken up internationally as a way to rethink questions of social cohesion and social justice In Europe the concept of national identity is under close scrutiny while the pressures of globalizing markets and the power of transnational corporations everywhere raise questions about the true place and meaning of citizenship in civil society In Australia a traditional view of citizens belonging to a single nation made up of one people with a special relationship to one land has been thrown open to challenge by a range of differing perspectives *Rethinking Australian Citizenship* considers the major debates Some chapters look at contemporary theoretical debates while others reinvent Australian citizenship from a particular perspective on civil life The result is a rich and coherent volume that shows the diverse ways in which Australian citizenship can be rethought

Organization and Newness Michael A. Peters, Susanne Maria Weber, 2019-01-14 *Organization and Newness Discourses and Ecologies of Innovation in the Creative University* offers a view from a perspective of organizational education on the new which analyzes the production of the new within organizations in relation to the inherent learning processes Fundamental for this perspective is the question about the changeability of organizations especially when these are not viewed only as instrumentally established regulatory structures but rather as social constructs The contributions of this volume contour the complexity of newness in organization and form a bridge from critical analysis of imperative discourse of newness to programmatic pleas of an organizational pedagogy which is normative in nature for a reconfiguration of organizational and societal relationships The issue at hand shows how tightly the question about newness is constitutively woven into the self conception of organizational education and pedagogy

Land Of Plenty Mark Davis, 2008-09-01 There is an Australian dream that is collective It goes to the roots of what it means to be Australian since it s imprinted in Australia s history the collective acts of its peoples their attitudes their gestures what and how they eat how they spend their leisure time and the way such things reflect upon and derive from who they are In *The Land of Plenty* Mark Davis argues that this dream has been forsaken Over the past few decades Australians have felt the ground shift beneath their feet Many people are asking why Australia is no longer the egalitarian place it once was While the airwaves sing and newspaper front pages burst with news of how prosperous Australians are many people wonder why they are working harder and longer for so little while important social agendas have fallen by the wayside *The Land of Plenty* is at once a devastating record of the changes that have taken place in Australian society since the 1980s and a goldmine of ideas for change Insightful provocative and thoroughly original *The Land of Plenty* is a manifesto for our times
