Occasions For Philosophy:

Philosophical Occasions, 1912-1951 Ludwig Wittgenstein, 1993 Fifteen selections that span the development of Wittgenstein's thought his wide range of interests and his methods of philosophical investigation offer subtle insights into the character and personality of their author *Occasions for Philosophy* James C. Edwards, Douglas M.

MacDonald, 1979-01-01 *Process-Philosophical Perspectives on Biology* Spyridon A. Koutroufinis, Arthur Araujo, 2023-06-28

Many life scientists implicitly assume a materialistic metaphysics that is based on the worldview of the 19th century This sort of reductionistic metaphysics does not do justice to the complexity of biological phenomena leaving many features of living processes unexplained The authors of this book explore the viability of process metaphysics to advance our understanding of fundamental biological concepts such as organism ontogeny agency teleology environment and normativity Based on the metaphysics of Alfred North Whitehead and other process thinkers the authors ascribe subjective interiority to all living beings from unicellular organisms to the most complex animals This book highlights the uniqueness and intrinsic value of living beings It presents a new approach to essential dimensions of the phenomenon of life with the aim of opening up new horizons in the thinking of philosophers philosophers of biology life scientists and environmentalists **The Epochal**

Nature of Process in Whitehead's Metaphysics F. Bradford Wallack, 1980-06-30 While my book attempts to reflect the full range of scholarly debate I have also attempted to make it useful to anyone interested in Whitehead To this end I have introduced the Whiteheadian terms one by one explaining each in the light of my interpretation and I have used examples wherever possible I try to show that Whitehead intended his philosophy have a place in our lives by reshaping our common conceptions and that he did not intend it to be relegated to purely abstract or esoteric application F Bradford Wallack The twentieth century has seen the greatest innovations in philosophical cosmology since Newton and Descartes and Alfred North Whitehead was the first and greatest of the philosophers to work out these innovations in systematic ways In a book that will be controversial in the philosophical community F Bradford Wallack argues that interpretations widely accepted by Whiteheadians need revaluation because these interpretations are based on materialist and substantialist assumptions that Whitehead sought to replace Specifically she proposes a thorough revision of accepted interpretations of Whitehead's concept of the actual entity Wallack then elucidates Whitehead's ideas in order of their increasing dependence upon other basic Whiteheadian terms to complete the study of Whiteheadian time and to clarify its purpose within the cosmology of Process and Reality Whitehead's philosophy then emerges as more intelligible and cohesive than is generally believed

Whitehead's Radically Different Postmodern Philosophy David Ray Griffin, 2012-02-01 Postmodern philosophy is often dismissed as unintelligible self contradictory and as a passing fad with no contribution to make to the problems faced by philosophers in our time While this characterization may be true of the type of philosophy labeled postmodern in the 1980s and 1990s David Ray Griffin argues that Alfred North Whitehead had formulated a radically different type of

postmodern philosophy to which these criticisms do not apply Griffin shows the power of Whitehead's philosophy in dealing with a range of contemporary issues the mind/body relation ecological ethics truth as correspondence the relation of time in physics to the irreversible time of our lives and the reality of moral norms He also defends a distinctive dimension of Whitehead's postmodernism his theism against various criticisms including the charge that it is incompatible with relativity theory

Minding Creation Joanna Leidenhag, 2020-12-10 Are humans the only creatures that can appreciate God's creation What if consciousness is spread more widely across all things This volume examines panpsychism through the lens of Christian doctrine Minding Creation is the first substantial examination of what a panpsychist theory of consciousness implies for key theological debates concerning God's presence and action evolution and the origin of the soul human uniqueness and the environmental crisis Joanna Leidenhag develops a theological panpsychism that is based on an exceptionally wide range of scholarship Minding Creation draws on the theologies of historical figures such as Augustine of Hippo Gottfried von Leibniz and others in order to create a critical and constructive conversation with contemporary analytic philosophers of mind such as Thomas Nagel Galen Strawson and David J Chalmers Leidenhag also discusses key concepts and issues such as emergence theory divine action and ecology She concludes that God created a universe from nothing which is filled with indwelling powers sacramental value and intrinsic experience This is a creation in which the Holy Spirit is internally present at every point a creation that worships God and a creation that human beings must protect and lead in praise
