Packed Column Sfc Chromatography Monographs:

Packed Column SFC T A Berger, 2007-10-31 Packed Column SFC is the third title to be published in this series and has been produced as a result of the dramatic re emergence in the last three years of packed column instrumentation This has led to a redefinition of the technique and an urgent need for a practical guide that deals with its subtleties This book fulfils that need and deals exclusively with packed column SFC It places the emphasis on understanding the underlying chemistry in order to perform rapid systematic optimizations and provides many practical tips to help the new user avoid problems unique to SFC It also proposes a detailed scheme for method development and provides lists of prioritized guidelines The book clears up some of the confusion that surrounds the analytical use of supercritical fluids and assists the user in understanding the power and utility of this technique Detailed chapters cover the most promising new application areas for packed column SFC which are often overlooked in the mainstream chromatography literature Like the other books in this popular series Packed Column SFC will prove an invaluable guide and is essential reading for graduates postgraduates and researchers with interests in pharmaceuticals agricultural chemistry small polar drug molecules chiral analysis environmental chemistry and chromatography instrumentation

Supercritical Fluid Chromatography Colin F.

Poole, 2017-02-16 Supercritical fluid chromatography SFC is a rapidly developing laboratory technique for the separation and identification of compounds in mixtures Significant improvements in instrumentation have rekindled interest in SFC in recent years and enhanced its standing in the scientific community Many scientists are familiar with column liquid chromatography and its strengths and weaknesses but the possibilities brought to the table by SFC are less well known and are underappreciated Supercritical Fluid Chromatography is a thorough and encompassing reference that defines the concept of contemporary practice in SFC and how it should be implemented in laboratory science Given the changes that have taken place in SFC this book presents contemporary aspects and applications of the technique and introduces SFC as a natural solution in the larger field of separation science The focus on state of the art instrumental SFC distinguishes this work as the go to reference work for those interested in implementing the technique at an advanced level Edited and authored by world leading chromatography experts Provides comprehensive coverage of SFC in a single source Extensive referencing facilitates identification of key research developments More than 200 figures and tables aid in the retention of key concepts

Supercritical Fluid Chromatography with Packed Columns Klaus Anton, Claire Berger, 1997-09-19 From the analytical to industrial preparative scale this work provides a praxis oriented overview of packed column supercritical fluid chromatography It discusses and evaluates established applications and techniques up to date and promising developments and commercial instrumentation devices for use in industry The book also reveals possibilities for problem solving and future innovations

Practical Supercritical Fluid Chromatography and Extraction Thomas Caudell, 1999-03-08 This book explores the fundamental and practical aspects of supercritical fluid chromatography SFC and extraction It discusses packed columns

in SFC detection in SFC supercritical fluid chromatography mass spectroscopy and evaporative light scattering detection in SFC Supercritical Fluid Chromatography Gregory K. Webster, 2014-02-04 Analytical chemists in the pharmaceutical industry are always looking for more efficient techniques to meet the analytical challenges of today's pharmaceutical industry. One technique that has made steady advances in pharmaceutical analysis is supercritical fluid chromatography SFC. SFC is meeting the chromatography needs of the industry by providing Supercritical Fluid Chromatography Roger Malcolm Smith, 1988 An examination of supercritical fluid chromatography SFC with reference to its theory and more practical applications. Topics covered include the roles of packed and capillary columns and the coupling of SFC to mass spectrometry.

Supercritical Fluid Chromatography Gérard Rossé, 2018-12-17 Supercritical Fluid Chromatography SFC provides a timely overview of SFC application areas which were unimaginable just a decade ago. This two volume series opens with an overview of the history and expectant future of SFC and continues with recent applications in the pharmaceutical industry and other fascinating areas of science. SFC has found its place in the pharmaceutical industry with an increasing body of applications for chiral and achiral molecules in both the research and development phases of the drug discovery process. As illustrated in this two volume series, the current interest in SFC extends well beyond the pharmaceutical industry. Chapters encompassing applications for polar and non polar mixtures of importance are covering widely disparate areas in substance abuse, natural products including cannabinoids, bioactive lipids, flavor and fragrance. With its broad balance and coverage, this two volume book constitutes a unique educational platform to students and scientists for many years to come. The major objective of this book edition is to inspire and stimulate readers to continue exploring the possibilities of exploiting supercritical fluids as a particular media for analysis, purifications and synthesis. Modern Supercritical Fluid Chromatography Larry M. Miller, J. David Pinkston, Larry T. Taylor, 2019-11-06 Explains why modern supercritical fluid chromatography SFC is the leading green analytical and purification separations technology. Modern supercritical fluid chromatography SFC is the leading method used to analyze and purify chiral and achiral chemical compounds, many of which are pharmaceuticals, pharmaceutical candidates and natural products including cannabis related compounds. This book covers current SFC instrumentation as it relates to greater robustness, better reproducibility and increased analytical sensitivity. Modern Supercritical Fluid Chromatography: Carbon Dioxide Containing Mobile Phases covers the history, instrumentation, method development and applications of SFC. The authors provided readers with an overview of analytical and preparative SFC equipment, stationary phases and mobile phase choices. Topics covered include Milestones of Supercritical Fluid Chromatography, Physical Properties of Supercritical Fluids, Instrumentation for SFC, Detection in SFC, Achiral SFC, Method Development, Chiral SFC, Method Development and Preparative Scale SFC. The book also includes highlights of modern applications of SFC in the final chapters, namely pharmaceuticals, consumer products, foods, polymers, petroleum related mixtures and cannabis, and discusses the future of SFC. Provides a clear explanation of the physical and

chemical properties of supercritical fluids which gives the reader a better understanding of the basis for improved performance in SFC compared to HPLC and GC Describes the advantages of SFC as a green alternative to HPLC and GC for the analysis of both polar water soluble and non polar analytes Details both achiral and chiral SFC method development including modifiers additives the impact of temperature and pressure and stationary phase choices Details why SFC is the premier modern preparative chromatographic technique used to purify components of mixtures for subsequent uses both from performance and economic perspectives Covers numerous detectors with an emphasis on SFC MS SFC UV and SFC ELSD evaporative light scattering detection Describes the application of SFC to numerous high value application areas Modern Supercritical Fluid Chromatography Carbon Dioxide Containing Mobile Phases will be of great interest to professionals students and professors involved in analytical bioanalytical separations science medicinal petroleum and environmental chemistries It will also appeal to pharmaceutical scientists natural product scientists food and consumer products scientists chemical engineers and managers in these areas
