**Understanding the Cultures of Fishing Communities** James R. McGoodwin,Food and Agriculture Organization of the United Nations,2001-01-01 Small scale fishing accounts for almost 95% of the world s fishing and it has been estimated that small scale fishing activities support the livelihoods of more than 200 million people worldwide The purpose of this document is to help fisheries officials gain a clearer understanding of the cultures of small scale fishing communities It is hoped this will

enable the development of more successful management policies and practices and empower people in such communities to improve their livelihoods The document highlights the importance of sustaining the rights of access to resources and the integration of cultural considerations into fisheries management policies It includes six case studies from distinct cultural regions of the world *The American Fisheries Directory and Reference Book* ,1981 Fisheries Technologies for Developing Countries National Research Council,Policy and Global Affairs,Board on Science and Technology for International Development,1988-02-01 In developing countries traditional fishermen are important food contributors yet technological information and development assistance to third world nations often focuses on agriculture and industrial fishing without addressing the needs of independent small scale fishermen This book explores technological considerations of small scale primitive fishing technologies and describes innovative relatively inexpensive methods and tools that have already been successfully applied in developing countries It offers practical information about all aspects of small scale fishing including boat design and construction fishing methods and gear artificial reef construction and fish aggregating devices techniques for coastal mariculture and simple methods for processing and preserving fish once they are caught Fisheries Technologies for Developing Countries is illustrated throughout with photographs of the devices and construction methods described in the text **The Last Fish Swimming** Gohar A. Petrossian,2019-05-17 This book examines the global local and specific environmental factors that facilitate illegal fishing and proposes effective ways to reduce the opportunities and incentives that threaten the existence of the world s fish Humans are deeply dependent on fishing globally fish comprise 15 percent of the protein intake for approximately 3 billion people and 8 percent of the global population depends on the fishing industry as their livelihood The global fishing industry is plagued by illegal fishing however and many highly commercial species such as cod tuna orange roughy and swordfish are extremely vulnerable Through criminological analysis The Last Fish Swimming emphasizes the importance of looking at specific environmental factors that make illegal fishing possible It examines such factors as proximity to known ports where illegally caught fish can be landed without inspection i e ports of convenience fisheries monitoring control and surveillance efforts formal surveillance and resource attractiveness in 53 countries that altogether represent 96 percent of the world s fish catch The book calls upon the global community to address the illegal depletion of the world s fish stock and other similar threats to the world s food supply and natural environment in order to ensure the sustainability of the planet s fish and continuation of the legal fishing industry for generations to come
