timely topics *Essential Human Virology* Jennifer Louten, 2016-03-29 *Essential Human Virology* is written for the undergraduate level with case studies integrated into each chapter. The structure and classification of viruses will be covered as well as virus transmission and virus replication strategies based upon type of viral nucleic acid. Several chapters will focus on notable and recognizable viruses and the diseases caused by them including influenza, HIV, hepatitis viruses, poliovirus, herpesviruses, and emerging and dangerous viruses. Additionally, how viruses cause disease or pathogenesis will be highlighted during the discussion of each virus family, and a chapter on the immune response to viruses will be included. Further research, laboratory assays, and viral diagnosis assays will be discussed, as will vaccines, anti-viral drugs, gene therapy, and the beneficial uses of viruses. By focusing on general virology principles, current and future technologies, familiar human viruses, and the effects of these viruses on humans, this textbook will provide a solid foundation in virology while keeping the interest of undergraduate students. Focuses on the human diseases and cellular pathology that viruses cause. Highlights current and cutting edge technology and associated issues. Presents real case studies and current news highlights in each chapter. Features dynamic illustrations, chapter assessment questions, key terms, and summary of concepts, as well as an instructor website with lecture slides, test bank, and recommended activities. **Neuropathic Pain**, 2024-11-23 *Neuropathic Pain*, Volume 179 of the latest release in the *International Review of Neurobiology* series, highlights new advances in the field with this new volume presenting interesting chapters. Each chapter is written by an international board of authors, providing the authority and expertise of leading contributors from an international board of authors. Presents the latest release in *International Review on Neurobiology* series. Updated release includes the latest information on Neuropathic Pain.

Handbook of Pain and Palliative Care Rhonda J. Moore, 2019-06-12 This comprehensive revision of the invaluable reference presents a rigorous survey of pain and palliative care phenomena across the lifespan and across disciplines. Grounded in the biopsychosocial viewpoint of its predecessor, it offers up-to-date understanding of assessments and interventions for pain, the communication of pain, common pain conditions, and their mechanisms, and research and policy issues. In keeping with the current public attention to painkiller use and misuse, contributors discuss a full range of pharmacological and non-pharmacological approaches to pain relief and management. And palliative care is given expanded coverage with chapters on interventional, ethical, and spiritual concerns. Pain, intercultural communication, and narrative medicine. Assessment of pain, tools, challenges, and special populations. Persistent pain in the older adult. Practical considerations for evaluation and management. Acute to chronic pain transition in the post-surgical patient. Evidence-based pharmacotherapy of chronic pain. Complementary and integrative health in chronic pain and palliative care. The patient's perspective of chronic pain. Disparities in pain and pain care. This mix of evolving and emerging topics makes the Second Edition of the *Handbook of Pain and Palliative Care* a necessity for health practitioners specializing in pain management or palliative care: clinical and health psychologists, public health professionals, and clinicians and administrators in long-term

care and hospice Epigenetic Aspects of Chronic Diseases Helmtrud I. Roach, Felix Bronner, Richard O.C.
