The Politics of Repression Under Authoritarian Rule Dag Tanneberg, 2020-01-03 Does authoritarian rule benefit from political repression This book claims that it does if restrictions and violence two fundamentally different forms of repression complement each other Based on an in depth quantitative analysis of the post Second World War period the author draws three central conclusions Firstly restrictions and violence offer different advantages suffer from different drawbacks and matter differently for identical problems of authoritarian rule Secondly empirical data supports complementarity only as long as political repression preempts political opposition Lastly despite its conceptual centrality political repression has little influence on the outcomes of authoritarian politics The book also offers new insights into questions such as whether repression hinders successful political campaigns or whether it is more likely to trigger coups d tat

State Repression in Post-Disaster Societies Clair Apodaca, 2017-01-20 A natural hazard is a physical event but a disaster is a social and political phenomenon Natural hazards are for the most part unavoidable and apolitical However they carry with them serious political economic and social consequences Disasters also have adverse consequences on human rights standards An understanding of the relationship between disasters and human rights outcomes requires knowledge of how disasters increase grievance and frustration and impact the probability of contentious political behavior To date there has been little empirical or theoretical research on the specific circumstances under which disasters impact antigovernment political behavior and even less is known of the causal chain between a natural disaster protest activity and human rights violations In this book Clair Apodaca maps a comprehensive causal model of the complex interactions between disasters and human rights violations She claims that pre existing inequalities and societal grievances turn a natural hazard into a disaster A grievance based theory of protests suggests that the underlying structural causes are social and economic

group disparities political exclusion along with population pressures To turn these all too common conditions into active political behavior requires a triggering event When a damage loss is the primary consequence of a disaster the government and international community can compensate victims by providing rebuilding and reconstruction aid However when the disaster results in high numbers of fatalities the government and international community cannot adequately compensate survivors for their losses Grievances cannot be easily or effectively eliminated and survivors and their supporters mobilize for change even if they are likely to face state repression Clair Apodaca offers a unique contribution to our understanding of human rights violations She effectively shows that there is a causal process between hazard events protest activities and government repression a finding that is key to scholars practitioners and policy makers working in this field Repression and Mobilization Christian Davenport, Hank Johnston, Carol McClurg Mueller, 2005-01-01 In was the summer of 2001 when political scientists and sociologists gathered at the University of Virginia to present new information and assess the status of study about political mobilization and political repression The 10 papers presented and printed here focus on interactions between protesters and police case studies come from Germany the *Understanding Human Rights Violations* Steven C. Poe, 2019-06-04 Originally published in 2004 This excellent volume presents a systematic analysis of various human rights violations around the globe focusing on security and subsistence rights The book collects important contributions to the theoretical development of the human rights phenomenon covering a wide range of human rights issues and research approaches The research presented combines a variety of qualitative and quantitative approaches and brings together both theoretical and empirical work It places particular emphasis on making the advanced statistical methods that are used to test the arguments accessible to a wider readership *Understanding Human Rights Violations* will prove a useful tool for all in the fields of international human rights peace studies political violence and international law and offers a valuable introduction into the literature on human rights violations

Secessionism and Separatism in Europe and Asia Jean-Pierre Cabestan, Aleksandar Pavković, 2013 The boundaries between secessionism and separatism are often blurred and in many cases study of secessionism encompasses that of separatism and vice versa Recognising this inherent relationship this book provides a comparative survey of recent attempts at secession and separatist movements from across Europe and Asia and assesses the responses of the respective host governments The essays address two main questions which arise from the relationship between state governments and secessionist movements first how secessionist or separatist movements gather support and mobilize their target populations and second how central political authorities respond to the challenges that secessionist or separatist movements pose to their capacity to control the country With political analysis of recent cases ranging from the Balkans the USSR the UK and the Basque Country to Sri Lanka Burma China Tibet and Taiwan the authors identify both similarities and differences in the processes and outcomes of secessionist and separatist movements across the two distinct regions This volume will be an invaluable resource for those who wish to understand the dynamics of

secessionist movements and as such will appeal to students and scholars of Asian and European politics comparative politics international relations and conflict studies It will also be helpful to practitioners and policy makers who wish to understand and contribute to the resolution of such conflicts

Media Bias, Perspective, and State Repression Christian Davenport, 2010 This book examines information reported within the media regarding the interaction between the Black Panther Party and government agents in the Bay Area of California 1967-1973 Christian Davenport argues that the geographic locale and political orientation of the newspaper influences how specific details are reported including who starts and ends the conflict who the Black Panthers target government or non government actors and which part of the government responds the police or court Specifically proximate and government oriented sources provide one assessment of events whereas proximate and dissident oriented sources have another both converge on specific aspects of the conflict The methodological implications of the study are clear Davenport's findings prove that in order to understand contentious events it is crucial to understand who collects or distributes the information in order to comprehend who reportedly does what to whom as well as why

Collective Violence, Contentious Politics, and Social Change Ernesto Castañeda, Cathy Schneider, 2017-05-08 Charles Tilly is among the most influential American sociologists of the last century For the first time his pathbreaking work on a wide array of topics is available in one comprehensive reader This manageable and readable volume brings together many highlights of Tilly's large and important oeuvre covering his contribution to the following areas revolutions and social change war state making and organized crime democratization durable inequality political violence migration race and ethnicity narratives and explanations The book connects Tilly's work on large scale social processes such as nation building and war to his work on micro processes such as racial and gender discrimination It includes selections from some of Tilly's earliest influential and out of print writings including *The Vendue* *Coercion Capital* and *European States* the classic *War Making* and *State Making as Organized Crime* and his more recent and lesser known work including that on durable inequality democracy poverty economic development and migration Together the collection reveals Tilly's complex compelling and distinctive vision and helps place the contentious politics approach Tilly pioneered with Sidney Tarrow and Doug McAdam into broader context The editors abridge key texts and in their introductory essay situate them within Tilly's larger opus and contemporary intellectual debates The chapters serve as guideposts for those who wish to study his work in greater depth or use his methodology to examine the pressing issues of our time Read together they provide a road map of Tilly's work and his contribution to the fields of sociology political science history and international studies This book belongs in the classroom and in the library of social scientists political analysts cultural critics and activists

Conflict and Compliance Sonia Cardenas, 2011-03-18 International human rights pressure has been applied to numerous states with varying results In *Conflict and Compliance* Sonia Cardenas examines responses to such pressure and challenges conventional views of the reasons states do or do not comply with international law Data from disparate bodies of research suggest that

more pressure to comply with human rights standards is not necessarily more effective and that international policies are more efficient when they target the root causes of state oppression Cardenas surveys a broad array of evidence to support these conclusions including Latin American cases that incorporate recent important declassified materials a statistical analysis of all the countries in the world and a set of secondary cases from Eastern Europe South Africa China and Cuba The views of human rights skeptics and optimists are surveyed to illustrate how state rhetoric and behavior can be interpreted differently depending on one's perspective Theoretically and methodologically sophisticated Conflict and Compliance paints a new picture of the complex dynamics at work when states face competing pressures to comply with and violate international human rights norms
