Paths To Peace Richard Smoke, Willis W Harman, 2019-06-26 A primer on thinking about peace in a nuclear age this book describes the kinds of peace efforts that have been tried and those that might be tried from the highest echelons of government policymaking to the grassroots level of individual endeavour Its primary goal is to enable the reader to understand ways of eliminating the threat of nuclear war and to be empowered to take action The book describes and compares nine basic methods people have used to achieve peace ranging from such conventional approaches as the theories of deterrence and balance of power to more unconventional strategies such as nonviolent resistance Essentially all significant ideas for achieving and maintaining international peace fall into one of these nine categories or combine features from several Many have been tried but all clearly have been found wanting Yet the authors tone is one of optimism as they explore some of the major changes of the past quarter century They contend that these changes alter the balance of advantages and disadvantages among the various paths to peace so that what seemed partially workable in the past may not be appropriate to the present and what seemed totally impractical in the past might have a chance of working today The book concludes with a scenario that may make a stable peace possible in the foreseeable future Pathways to Peace James F.

World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US \$5 billion and US \$70 billion per year which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion from access to power, natural resources, security and justice for example that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts when risks are high or building up. Inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform and redistributive policies are required. Inclusion is key and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision-making is fundamental to sustaining peace as well as long-term policies to address the aspirations of women and young people.
