The Pathway to Publishing: A Guide to Quantitative Writing in the Health Sciences Stephen Luby, Dorothy L. Southern, 2022-05-30 Writing manuscripts is central to the advance of scientific knowledge For an early career aspiring scientist writing first author manuscripts is an opportunity to develop critical skills and to credential their expertise Writing manuscripts however is difficult doubly so for scientists who use English as a second language Many science students intentionally avoid a writing intensive curriculum Careful thorough reviews of draft manuscripts are difficult to secure and experienced scientific supervisors face more demands on their time than they have time available Weak draft manuscripts discourage supervising scientists investing the time to coach revisions It is easier for experienced scientists to ignore the request or to simply rewrite the article Early career scientists are motivated to address these barriers but specific advice is difficult to find and much of this advice is behind a pay wall This essential open access text presents writing lessons organized as common errors providing students and early career researchers with an efficient way to learn and mentors with a quick reference guide to reviewing Error descriptions include specific examples drawn from

real world experiences of other early career writers and suggestions for how to successfully address and avoid these in the future Versions of this book have been used by Stanford University UC Davis Johns Hopkins and numerous international institutions and organizations for over a decade
