Patient Centered Medicine Transforming The Clinical Method:

Patient-centered Medicine Moira Stewart, 2003 Divided into four parts this volume comprehensively covers the evolution of patient centered care the six interactive components of the patient centered clinical method teaching and learning and research including findings and reviews It explains the basis and development of the clinical method *Patient-Centered Medicine* Moira Stewart, Judith Belle Brown, Wayne Weston, Ian R. McWhinney, Carol L. McWilliam, Thomas Freeman, 2013-12-28 This long awaited Third Edition fully illuminates the patient centered model of medicine continuing to provide the foundation for the Patient Centered Care series It redefines the principles underpinning the patient centered method using four major components clarifying its evolution and consequent development to bring the reader fully up to

Patient-Centered Medicine Moira Stewart, Judith Belle Brown, W. Wayne Weston, Thomas Freeman, Bridget L. Ryan, Carol L. McWilliam, Ian R. McWhinney, 2024-03-06 The Patient Centered Clinical Method PCCM has been a core tenet of the practice and teaching of medicine since the first edition of *Patient Centered Medicine Transforming the Clinical Method* was published in 1995 This timely fourth edition continues to define the principles underpinning the patient centered clinical method using four major components clarifying its evolution and consequent development and it brings the reader fully up to date It reinforces the relevance of the method in the current much changed realities of health care in a world where virtual care will remain common dependence on technology is rising and societal changes away from compassion equity and relationships toward confrontation inequity and self absorption Fully revised by its highly experienced author team ensuring wide interest and written for those practising now and for the practitioners of the future this new edition will be welcomed by a wide international audience comprising all health professionals from medicine nursing social work occupational therapy physical therapy pharmacy veterinary medicine and other fields **Patient-centered Medicine** Moira Stewart, 2014 It describes and explains the patient centered model examining and evaluating qualitative and quantitative research It comprehensively covers the evolution and the six interactive components of the patient centered clinical method taking the reader through the relationships between the patient and doctor and the patient and clinician All the editors are professors in the Department of Family Medicine at the University of Western Ontario London Canada **Patient Centered Medicine** Omur Sayligil, 2017-04-12 Patient centered medicine is not an illness centered a physician centered or a hospital centered medicine approach In this book it is aimed at presenting an approach to patient centered medicine from the beginning of life to the end of life As indicated by W Osler It is much more important to know what sort of a patient has a disease than what sort of a disease a patient has In our day if the physicians and healthcare professionals could consider more than the diseased organ and provide healthcare by comforting the patients by respecting their values beliefs needs and preferences informing them and their relatives at every stage and comforting the patients physically by controlling the pain and relieving their worries and fears patients obeying the rules of physicians would become patients with high adaptation and participation

to the treatment **Person Centered Medicine** Juan E. Mezzich, W. James Appleyard, Paul Glare, Jon Snaedal, C. Ruth Wilson, 2023-04-13 The 21st is being recognized as the Century of the Person particularly in Medicine and Health Person Centered Medicine as a concept and global programmatic movement developed in collaboration with the World Medical Association World Health Organization International Council of Nurses and 30 other institutions over a decade of annual Geneva Conferences places the whole person as the center of health and as the goal and protagonist of health actions Seeking the person at the center of medicine has meant a medicine of the person for the person by the person and with the person Articulating science and humanism it strives for a medicine informed by evidence experience and values and aimed at the restoration and promotion of health for all The textbook on Person Centered Medicine reviews this perspective as it has evolved to date and its resulting knowledge base The book structure encompasses an Introduction to the field and four sections on Principles Methods Specific Health Fields and Empowerment Perspectives Its 42 chapters are authored by 105 clinician scholars from 25 different countries across world regions North America Latin America Europe Africa the Middle East Asia and Oceania Its vision and goals involve total health for a total person Ongoing work and upcoming publications would focus on redesigning health systems fit to purpose and integrating ancestral knowledge and wisdom community members self and mutual care advances in medical science and the contributions of health relevant social sectors

Patient-Centered Prescribing Jon Dowell, Brian Williams, David Snadden, 2007 Half of all prescribed medicines are used in a sub optimal manner and clinicians struggle to find ways of improving the situation This book offers real life case studies to demonstrate the way the patient centered model combined with other behavioural models can result in a logical approach to prescribing for difficult clients *Global Healing* Karen Laura Thornber, 2020-03-02 Read an interview with Karen Thornber In Global Healing Literature Advocacy Care Karen Laura Thornber analyzes how narratives from diverse communities globally engage with a broad variety of diseases and other serious health conditions and advocate for empathic compassionate and respectful care that facilitates healing and enables wellbeing The three parts of this book discuss writings from Africa the Americas Asia Europe the Middle East and Oceania that implore societies to shatter the devastating social stigmas which prevent billions from accessing effective care to increase the availability of quality person focused healthcare and to prioritize partnerships that facilitate healing and enable wellbeing for both patients and loved ones Thornber's Global Healing remaps the contours of comparative literature world literature the medical humanities and the health humanities Watch a video interview with Thornber by the Mahindra Humanities Center part of their conversations on Covid 19 Read an interview with Thornber on Brill's Humanities Matter blog Communicating (with) Care Sarah Bigi, 2016-08-15 At the start of studies on health communication scholars were primarily concerned with showing the ethical implications of a new approach to care and with collecting evidence to demonstrate its greater effectiveness as opposed to the paternalistic and mechanistic paradigms Well into the second decade of the 21st century different issues need to be addressed Aging

populations and the spread of chronic diseases are challenging the sustainability of health care systems worldwide increased awareness of health issues among the population and greater citizen participation seem to threaten clinicians authority In this new scenario it is acknowledged that the quality of verbal communication plays a crucial role but it is still not clear how it impacts on the outcomes of care which are its constitutive components and how it interacts with the institutional cultural and social context of interactions This book suggests that the time is ripe for a fresh start in health communication studies As Debra Roter points out in her foreword this proposal is ambitious in attempting to integrate perspectives derived from pragmatics and argumentation theory with those derived from quantitative methods of medical interaction analysis and its prediction of outcomes On the other hand as Giovanni Gobber explains in his foreword health communication can profit from an application of a performance oriented linguistic analysis that pays attention to the role of the various relevant context factors in speech events related to specific activity types In this way the open questions regarding communication in medical encounters are considered under a new light The answers provided open up novel lines of research and provide an original perspective to face the new challenges in medical care

Palliative Care Geoff Mitchell, 2018-05-08 Series Editors Moira Stewart Judith Belle Brown and Thomas R Freeman As the population in western cultures ages more people suffer chronic ultimately life limiting diseases and medical professionals need to be equipped to cope with the ever growing pressure of palliative care This book gives guidance on how to approach patients with life limiting illness While the problems most people present to the doctor appear relatively straightforward a whole person approach to understanding the complex interaction between the person their illness and their environment should lead to a more complete consideration of the illness and better health outcomes For issues of palliative care such an approach is essential to identify and meet the many needs of desperately ill people Palliative Care offers a fresh look at the management of patients With international evidence based contributions the book suggests practical and challenging ways to care for the dying It is ideal for all healthcare professionals working in palliative care General Practitioners and medicine and healthcare students
