

Basic composition settings

- **Start Timecode or Start Frame**

- Timecode or frame number assigned to the first frame of the composition. This value does not affect rendering; it merely specifies where to start counting from.

- **Background Color**

- Use the color swatch or eyedropper to pick a composition background color.

- note: When you add one composition to another (nesting), the background color of the containing composition is preserved, and the background of the nested composition becomes transparent. To preserve the background color of the nested composition, create a solid-color layer to use as a background layer in the nested composition*
