Patterns Of Democracy:

Patterns of Democracy Arend Lijphart, Professor of Political Science Arend Lijphart, 1999-01-01 Trata sobre a atuação e formas de governo em 36 páginas Handbook of Comparative Political Institutions Adrian Vatter, Rahel Freiburghaus, 2024-10-03 This comprehensive Handbook presents a broad range of theoretical methodological and empirical perspectives on the comparative study of political institutions Exploring cutting edge developments in the field it provides new insight into the significant diversity and impact of political institutions across space and time This title contains one or more Open Access chapters **Origin and Performance of Democracy Profiles** Oliver Schlenkrich, 2021-08-03 This study has two central research questions Do democracy profiles affect policy performance And what causes democracy profiles Oliver Schlenkrich conceptualizes and measures different democracy profiles e.g. libertarian majoritarian or egalitarian majoritarian democracies based on trade offs between the central democracy dimensions of political freedom political equality and political and legal control In addition the study conceptually and empirically develops a typology of political performance Regarding the first research question the empirical analyses of about 80 democracies from 1974 to 2017 indicate that there is not an overall better performing democracy profile Thereby the democracy profiles do not have an immediate effect instead their effects require a longer period of time to manifest With respect to the second research question the empirical findings show that several structural and cultural factors are relevant e.g. British heritage or a competitive culture This work is mainly based on Bayesian statistics to cope with the complexity of the data and models About the author Oliver Schlenkrich works currently on the DFG research project Causes of Transformation and Democracy Profiles Empirical Findings of the Democracy Matrix located at the Institute of Political Science and Sociology University of Würzburg Germany His research interests concern democracy political culture political participation quality of statehood and quantitative methods China's Authoritarian Path to Development Liang Tang, 2017-06-14 This book examines the various stages of China's development in the economic social and political fields relating theories and models of development to what is actually occurring in China and discussing how China's development is likely to progress going forward It argues that China's modernization hitherto can be characterized as authoritarian development a fusion of mixed economic institutions of varying types of ownership with social stability and political cohesiveness and that the present phase where more emphasis is being given to social issues is likely to lead on to a new phase where a more mature civil society and a more extensive middle class are likely to look for greater democratization It presents an in depth analysis of China's changing social structure and civil society explores the forces for and processes of democratization and assesses the prospects for further democratization in the light of changing social structures Consociationalism and Power-Sharing in Europe Michaelina Jakala, Durukan Kuzu, Matt Qvortrup, 2017-12-19 This book examines the theoretical and practical relevance and challenges of the consociationalist model of democracy Since the publication of the Politics of Accommodation

1968 and Democracy in Plural Societies 1977 Professor Lijphart's theories and practical implementations have played a key role in establishing enduring peace settlements In this edited volume scholars and Professor Lijphart himself critically examine the history of consociationalism and its application in areas including Northern Ireland Bosnia Herzegovina and Colombia The book will be essential reading for undergraduate and graduate students of political science comparative politics transitional justice and peace studies It will also be of use to practitioners ranging from diplomats to NGOs who are interested in the practical application of tested models of political accommodation **Criminal Disenfranchisement in an International Perspective** Alec C. Jürgenmeyer, Michael H. Nelson, Patrick Ziegenhain, 2005 This study of the national parliaments of India Indonesia the Philippines South Korea and Thailand is inspired by four major theoretical discourses neo institutionalism parliamentarianism versus presidentialism majoritarian versus consensus democracy and transition theory The book examines the specific role of parliaments in political decision making regime change democratization and consolidation of democracy in a comparative perspective It argues that parliaments play a greater part in the political decision making than is often asserted and that there is no cogent causal relationship between parliamentary performance and system of government

Globalization George Yungchih Wang, 2019-10-23 Globalization is a process of interaction and integration among people businesses institutions and governments of different countries in many aspects surrounding human lives It is not a threat to sovereignty or a form of Westernization This book discusses international economics and globalization explores global business strategies deliberates business ethics and corporate social responsibility and examines other related aspects from a global perspective **The Oxford Handbook of Political Representation in Liberal Democracies** Robert

Rohrschneider, Jacques Thomassen, 2020-07-28 The Handbook of Political Representation in Liberal Democracies offers a state of the art assessment of the functioning of political representation in liberal democracies In 34 chapters the world's leading scholars on the various aspects of political representation address eight broad themes The concept and theories of political representation its history and the main requisites for its development elite orientations and behavior descriptive representation party government and representation non electoral forms of political participation and how they relate to political representation the challenges to representative democracy originating from the growing importance of non majoritarian institutions and social media the rise of populism and its consequences for the functioning of representative democracy the challenge caused by economic and political globalization what does it mean for the functioning of political

representation at the national level and is it possible to develop institutions of representative democracy at a level above the state that meet the normative criteria of representative democracy and are supported by the people. The various chapters offer a comprehensive review of the literature on the various aspects of political representation. The main organizing principle of the Handbook is the chain of political representation, the chain connecting the interests and policy preferences of the people to public policy via political parties, parliament, and government. Most of the chapters assessing the functioning of the chain of political representation and its various links are based on original comparative political research. Comparative research on political representation and its various subfields has developed dramatically over the last decades so that even ten years ago a Handbook like this would have looked totally different.

[Beyond Presidentialism and Parliamentarism](#) Steffen Ganghof, 2021. This book elaborates a theory of semi-parliamentary government, an often neglected form of government that instantiates the principle of the separation of powers by demonstrating how it reconciles important benefits of both presidential and parliamentary systems.

Routledge Handbook of African Political Philosophy Uchenna Okeja, 2023-08-25. The Routledge Handbook of African Political Philosophy showcases and develops the arguments propounded by African philosophers on political problems, bringing together experts from around the world to chart current and future research trends. Africa's recent history has been shaped by the experiences of colonization, anti-colonial struggle, and postcolonial self-rule, so it is perhaps not surprising that political questions are also central to African philosophy. This exciting new handbook provides insights into the foundations, virtues, vices, controversies, and key topics to be found within African political philosophy, concluding by considering how it connects with other traditions of political philosophy. In doing so, this book provides important fresh perspectives that help us to gain a richer understanding of the challenges of coexistence in society and governance, not just in Africa but around the world. This book will be an important resource for researchers and students across the fields of Political Philosophy, Political Science, International Relations, and African Studies.

[Research Handbook on the Sociology of Law](#) Jiří Přibáň, 2020-12-25. This unique Research Handbook maps the historical, theoretical, and methodological concepts in sociology of law, exploring the rich and complex nature of this area of research. It argues that sociology of law flourishes due to its strong capacity for interdisciplinary engagement and links to other scientific concepts, methodologies, and research fields.

Transnational Repression in the Age of Globalisation Saipira Furstenberg, Dana Moss, 2024-04-30. Bringing together leading scholars, this volume is the first of its kind to address the growing global phenomenon of transnational repression in a comparative perspective. Authoritarian regimes in places like China, Russia, and Saudi Arabia are infamous for cracking down on domestic opposition movements and democracy activists at home. And in our age of globalisation, migration, and technological development, dictators are increasingly able to extend their authoritarian power over their critics abroad. Using tactics that include surveillance, coercion, harassment, and physical violence, transnational repression threatens the lives of democracy defenders, the basic rights of diaspora members, and the rule of law.

in host states Passion, Craft, and Method in Comparative Politics Gerardo L. Munck, Richard Snyder, 2007-07-02 In the first collection of interviews with the most prominent scholars in comparative politics since World War II Gerardo L. Munck and Richard Snyder trace key developments in the field during the twentieth century. Organized around a broad set of themes: intellectual formation and training; major works and ideas; the craft and tools of research; colleagues, collaborators, and students; and the past and future of comparative politics, these in-depth interviews offer unique and candid reflections that bring the research process to life and shed light on the human dimension of scholarship. Giving voice to scholars who practice their craft in different ways yet share a passion for knowledge about global politics, *Passion, Craft, and Method in Comparative Politics* offers a wealth of insights into contemporary debates about the state of knowledge in comparative politics and the future of the field.
