Gwyther, 2007-05-08 Help all learners transition successfully from beginning to intermediate literacy levels with these classroom-tested instructional strategies and specialized assessment tools for word study, reading, and writing. **Design**

Patterns Explained Alan Shalloway, James Trott, 2002 This book introduces the programmer to patterns, how to understand them, how to use them, and then how to implement them into their programs. This book focuses on teaching design patterns instead of giving more specialized patterns to the relatively few. **Bridges to Reading, 3-6** Suzanne I.

Barchers, 1999-04-15 Now you can use quality children's literature to teach traditional reading skills. Providing a balance between traditional and literature-based instruction, these books include stimulating and instructive lessons based on approximately 150 skills commonly found in basal readers. These lessons utilize a variety of strategies that can be applied to teaching myriad skills from alphabet and alphabetization to word recognition skills. Each featured book includes a variety of activities and a list of related books. Semantic feature analysis, attribute charts, writing activities, problem solving, genre analysis, wordplay, and phonetic analysis are just some of the strategies covered. Wonderful tools for enlivening reading instruction, these resources reconcile the need to teach basic skills with the desire to use children's literature. **Bridges**

and Barriers Eddie Williams, 2014-06-03 Recent decades have seen sub-Saharan Africa decline in both economic and human terms. The rich North has responded with a barrage of well-publicized initiatives, from pop concerts to international commitments on debt relief, aid, trade, and good governance. Among the complex of factors necessary to sustain economic and human development, education receives little media coverage, although it is crucial. However, education must be effective. This

book argues that in Anglophone Africa education is not effective because of the use of English rather than children's first languages both as the medium of instruction and also as the language in which children are first taught to read. Research is presented from Malawi and Zambia countries with contrasting language policies using evidence from tests in English and African languages, small group discussions and classroom observation. The findings show that English medium policies in Africa do not give students any advantage in English over first language policies while the use of English discriminates against girls and rural children. The book concludes that much education in Africa is a barrier rather than a bridge to learning because of the prevailing language ideology which has resulted in massive over-estimation of the value of English. While appropriate language policies alone will not solve education and development difficulties in Africa, they do have a positive contribution to make. The evidence presented here suggests they are failing to make that contribution.
