Posing and Solving Problems with Story Boxes Donna Burk, Allyn Snider, 1994 *Problem Posing and Problem Solving in Mathematics Education* Tin Lam Toh, Manuel Santos-Trigo, Puay Huat Chua, Nor Azura Abdullah, Dan Zhang, 2024-01-01 This book presents both theoretical and empirical contributions from a global perspective on problem solving and posing PS PP and their application in relation to the teaching and learning of mathematics in schools The chapters are derived from selected presentations in the PS PP Topical Study Group in ICME14 Although mathematical problem posing is a much younger field of inquiry in mathematics education this topic has grown rapidly The mathematics curriculum frameworks in many parts of the world have incorporated problem posing as an instructional focus building on problem solving as its foundation The juxtaposition of problem solving and problem posing in mathematics presented in this book addresses the needs of the mathematics education research and practice communities at the present day In particular this book aims to address the three key points to present an overview of research and development regarding students mathematical problem solving and posing to discuss new trends and developments in research and practice on these topics and to provide insight into the future trends of mathematical problem solving and posing *Bowker's Complete Video Directory* ,2000

Teaching Mathematics Through Story Caroline McGrath, 2014-06-27 This book explores the exciting ways in which story can be used as a flexible resource to facilitate children s mathematical thinking It looks at the potential relationship between story and mathematics and practically demonstrates how they can be combined to help children connect understand and express mathematical ideas using story language This book draws on practical work with children educators parents professional storytellers and trainee practitioners who bring theoretical ideas to life and offer insight into their mathematical story experiences It is a must have for all those who want to make mathematics relevant accessible and imaginative for young children *Words and Worlds* ,2009-01-01 In this book the reader is invited to enter a strange world in which you can tell the age of the captain by counting the animals on his ship where runners do not get tired and where water gets hotter when you add it to other water It is the world of a curious genre known as word problems or story problems It originated in the ancient civilizations of Egypt China and India and is the subject of daily rituals among students and teachers in mathematics classrooms all around the world An international group of scholars with a shared interest in this phenomenon explore multiple aspects of this world from multiple perspectives These discussions take us deep into philosophical issues of the relationships between words mathematical systems and the physical and social worlds we all inhabit Empirical investigations are reported that throw light on how students and their teachers experience and interpret this activity raising profound questions about the nature and purposes of mathematics teaching learning in general and how it could be improved

Mathematical Problem Posing Florence Mihaela Singer, Nerida F. Ellerton, Jinfa Cai, 2015-06-12 The mathematics education community continues to contribute research based ideas for developing and improving problem posing as an

inquiry based instructional strategy for enhancing students learning A large number of studies have been conducted which have covered many research topics and methodological aspects of teaching and learning mathematics through problem posing The Authors groundwork has shown that many of these studies predict positive outcomes from implementing problem posing on student knowledge problem solving and posing skills creativity and disposition toward mathematics This book examines in depth the contribution of a problem posing approach to teaching mathematics and discusses the impact of adopting this approach on the development of theoretical frameworks teaching practices and research on mathematical problem posing over the last 50 years

Teaching With Author Web Sites, K-8 Rose Reissman, Mark Gura, 2010 Drawing on extensive classroom experience the authors demonstrate how shy students reluctant readers English language learners and students who may be less active during class discussion become energized when they explore rich Web sites available from popular respected children s authors This book illustrates how this easy no risk technology available at a keystroke offers wide ranging benefits including Inviting students into a literacy community of readers and writers Fostering the development of discrete test mandated skills Capitalizing on and deepening students familiarity with the digital world in ways that enhance their literacy growth

Making Problems, Creating Solutions Jill Ostrow, 1999 In Making Problems Creating Solutions Jill Ostrow rethinks the teaching of mathematics and shows teachers how to build challenging learning environments in elementary classrooms She introduces the notion of workshop learning in mathematics and demonstrates ways in which teachers can readily integrate math into all curricular areas Traditional mathematics instruction consists of statements of rules followed by examples which define those rules the tell show and do model Under this model math concepts are fed to students in a sequence determined by the teacher rather than the intellectual readiness of the child Alternatively Jill takes a process approach to mathematics acquisition that is based upon understanding challenge independence confidence and choice Such an approach makes it easier for kids to apply their knowledge to new problems and to other areas of their lives Making Problems Creating Solutions gives educators a chance to see the NCTM Standards as well as many other mathematics curricula put into authentic practice provides examples of solutions and thinking strategies of students ages 6 to 12 describes a new and innovative approach to teaching calendar contains a large section on assessment features an extensive appendix of problems with each problem annotated to show which standard is being addressed This book shows teachers how to encourage kids to create problem solving strategies and then to share and discuss those strategies with peers It is an appropriate text for both preservice and inservice programs as well as math inservice workshops In Making Problems Creating Solutions Jill places meaning and purpose at the heart of her mathematics program and in turn gives teachers ideas and techniques that will inspire critical thinking in young mathematicians
