Adjustment, Structural Change, and Economic Efficiency Jozef M. van Brabant, 1987-12-25 This 1988 book examines the indirect instruments and the related institutions that help to coordinate key economic decisions within and among the economies belonging to the Council for Mutual Economic Assistance CMEA The chief purpose is two fold to assess thier adequacy in light of the forced economic adjustments of the early 1980s and to formulate feasible changes for both in order to avert a recurrence of such developmental obstacles Jozef van Brabant argues that these instruments and institutions are inadequate He proposes that a resumption of rapid growth depends largely upon bolstering factor productivity growth which can only be achieved through positive structural changes and a root and branch reform of the individual and groupwide economic mechanisms Positive Adjustment Policies Organisation for Economic Co-operation and Development, 1983

Positive Adjustment Policies Organisation for Economic Co-operation and Development, 1982 **Operation of the Trade Agreements Program** ,1982 Operation of the Trade Agreements Program United States International Trade Commission, 1983 *Economic Adjustment And Conversion Of Defense Industries* John E. Lynch, 2019-04-08 Defense plant cutbacks and military base closures have affected hundreds of U S communities during the past twenty five years Tracing the recovery of four communities after large defense plant cutbacks and of one hundred communities after military base closures the contributors analyze the transition from the production of military to civilian goods The contributors examine the market potential of reusing defense industrial plants to produce civilian products within the one to two year period called for by economic conversion proponents showing that the complex process needed to develop test and market an entirely new product requires a minimum of five years They also review the wide range of economic development techniques available at the state and local level conversion approaches in Western Europe programs for displaced workers and reasons why the economic conversion approach has failed to attract public support in the United States The case studies are used to formulate an integrated composite approach for coping with plant closures and major employment dislocations Stressing the in portance of community based economic adjustment activities this book will be valuable to all concerned with mitigating the effects of military and civilian plant closures The Logic of International Restructuring Winfried Ruigrok, Rob van Tulder, 1995 There is within the corporate world an evolving international restructuring race between industrial complexes that is set to intensify over the coming years An industrial complex consists of suppliers distributors governments financiers and trade unions It is the reorganisation of the relationship between the core firm and the above components that is set to change before very long In this book Winfried Ruigrok and Rob van Tulder address many current debates on topics such as

Post Fordism globalisation and lean production They also identify a number of rival internationalisation strategies that have been adopted by different companies Moreover they present an abundance of new as well as historical data on the world's one hundred largest core companies This data shows that none of the largest core firms is truly global or borderless and that virtually all of them in their history have benefited decisively from Governmental trade or industrial policies The authors offer a highly interdisciplinary effort to link three previously isolated debates on industrial restructuring globalisation and international trade policies The Logic of International Restructuring is aimed at a wide academic post graduate and professional audience working in the areas of business economics organisational studies and international relations

USITC Publication ,1983 Economic Globalization and the Citizens' Welfare State Hiroto Tsukada,2017-10-05 This title was first published in 2001 Examining the future of the welfare state in four globalizing economies Sweden UK Japan and US this book presents a detailed analysis of the ways in which social and economic aspects of these welfare states have altered under growing market first ideology and economic globalization The book will be essential reading for all those interested in the present and future of the welfare state both through its theoretical perspectives and because of the thorough attention paid to the health of society today **Unequal Exchange and the Evolution of the World System** Kunibert Raffer,1987-06-18 Employment and Human Rights Richard L. Siegel,1994 Intellectual history is placed in the broadest possible contexts of economic political and social contexts **Technology and International Relations** Otto Hieronymi,2015-12-30 Routledge Library Editions: The History of Economic Thought Various Authors,2022-07-30 The volumes in this set originally published between 1925 and 1990 draw together research by leading academics in the area of the history of economic thought The volumes encompass many different schools of economic thought with a focus on individual economic thinkers such as Friedrich Hayek Adam Smith and Piero Sraffa This set will be of interest to students of economics particularly students of the history of economic thought **The Political Economy of Germany Under Chancellors Kohl and Schröder** Jeremy Leaman,2009 While unification has undoubtedly had major effects on Germany's political economy the pattern of current policy making preferences was established at an earlier stage in particular at the beginning of the Kohl era in 1982 This essentially neo liberal pattern can be seen to have dominated the modalities chosen to guide Germany through the process of unification and was mirrored in developments in other OECD countries and in particular within the EU This book demonstrates that the three policy imperatives neo liberal structural reform European monetary integration and unification produced a policy mix which together with other structural economic and demographic factors has had disappointing results in all three areas and hampered Germany's overall economic development
