positive for HIV in 1989 **Birth in the Age of AIDS** Cecilia Van Hollen, 2013-04-03 Birth in the Age of AIDS is a vivid and poignant portrayal of the experiences of HIV positive women in India during pregnancy birth and motherhood at the beginning of the 21st century The government of India together with global health organizations established an important public health initiative to prevent HIV transmission from mother to child While this program which targets poor women attending public maternity hospitals has improved health outcomes for infants it has resulted in sometimes devastatingly negative consequences for poor young mothers because these women are being tested for HIV in far greater numbers than their male spouses and are often blamed for bringing this highly stigmatized disease into the family Based on research conducted by the author in India this book chronicles the experiences of women from the point of their decisions about whether to accept HIV testing through their decisions about whether or not to continue with the birth if they test HIV positive their birthing experiences in hospitals decisions and practices surrounding breast feeding vs bottle feeding and their hopes and fears for the future of their children **Breaking the Conspiracy of Silence** Donald E. Messer, 2004-01-01 A

passionate and well articulated call to mission Messer charts steps for individuals congregations denominations and ecumenical agencies in a faithful response to the HIV AIDS **Teaching AIDS** Dilip K. Das, 2019-02-18 This book approaches the subject of AIDS pedagogy by analysing the complex links between representation or discourse ideology power relations and practices of self understood from the perspective of embodiment While there is a fairly large amount of literature available on the social economic psychological and policy dimensions of the epidemic there is virtually nothing on its cultural politics As a critique of the national AIDS pedagogy this book attempts to fill the gap It addresses important issues in cultural studies body studies medical humanities disease control policy and behaviour change communication strategies This book will be of interest to researchers and students of culture studies and social sciences especially social

anthropology community health health management and gender studies *Seminar*, 2002 Asian Medicine and Globalization Joseph S. Alter, 2013-03-26 Medical systems function in specific cultural contexts It is common to speak of the medicine of China Japan India and other nation states Yet almost all formalized medical systems claim universal applicability and thus are ready to cross the cultural boundaries that contain them There is a critical tension in theory and practice in the ways regional medical systems are conceptualized as nationalistic or inherently transnational This volume is concerned with questions and problems created by the friction between nationalism and transnationalism at a time when globalization has greatly complicated the notion of cultural political and economic boundedness Offering a range of perspectives the contributors address questions such as How do states concern themselves with the modernization of traditional medicine How does the global hegemony of science enable the nationalist articulation of alternative medicine How do global discourses of science and new age spirituality facilitate the transnationalization of Asian medicine As more and more Asian medical practices cross boundaries into Western culture through the popularity of yoga and herbalism and as Western medicine finds its way east these systems of meaning become inextricably interrelated These essays consider the larger implications of transmissions between cultures Reproduction, Globalization, and the State Carole H. Browner, Carolyn F. Sargent, 2011-03-25 Collection uses ethnographies of globalization to explore the consequences of interactions between global processes and national structures on human reproduction and reproductive health in a range of contexts
