Positive Parenthood Solving Parent Child Conflicts Through Behavior Modification:

Positive Parenthood Paul S. Graubard, 1977-01-01 *International Handbook of Behavior Modification and Therapy* Alan S. Bellack, Michel Hersen, Alan E. Kazdin, 2012-12-06 *Parents as Educators* Keith J. Topping, 2025-08-05

Modern practice in the 1980s was to involve parents increasingly in the education of their children and was supported by legislation. Particularly when children had special needs parents required structured training and support to ensure they affectively sustained their vital role as educators at home. Many large scale programmes to provide this had been developed throughout the world at the time for example Home Start Portage Home Visiting Projects and Paired Reading Projects. However not all of these had been thoroughly evaluated and the existing literature was scattered and difficult to access. Some projects demonstrated spectacular results and high cost effectiveness while others proved more disappointing. Originally published in 1986 this book critically analyses over 600 international English language research reports on the effectiveness of parent training programmes. In addition a detailed guide to the practicalities of planning projects is provided together with a comprehensive directory of useful resource materials. After an introductory overview the evidence on the effects on child progress of parental involvement in school activities is reviewed as is research on the impact of schemes of regular structured communication between home and school. Programmes designed to train parents to accelerate the development of their children at home are considered in the subsequent chapters starting with ordinary children. Much of the book reviews projects targeted on children with some sort of special educational need from children whose special needs stem from a widespread difficulty such as poverty or second language learning systematically through to children whose needs stem from rarer and more severe issues. Each chapter has its own summary for ease of reader use while an overall summary chapter points out best buys and directions for future developments. This volume will be of major interest to teachers psychologists social workers community health personnel community educationalists researchers many others working with parents and children and to some parents themselves. This book is a re issue originally published in 1986. The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this re publication.

Shrinking Violets and Caspar Milquetoasts Patricia McDaniel, 2003-11

Since World War II Americans attitudes towards shyness have changed. The women s movement and the sexual revolution raised questions about communication self expression intimacy and personality leading to new concerns about shyness. At the same time the growth of psychotherapy and the mental health industry brought shyness to the attention of professionals who began to regard it as an illness in need of a cure. But what is shyness? How is it related to gender race and class identities? And what does its stigmatization say about our culture? In *Shrinking Violets and Caspar Milquetoasts* Patricia McDaniel tells the story of shyness. Using popular self help books and magazine articles she shows how prevailing attitudes toward shyness frequently work to disempower women. She draws on evidence as diverse as 1950s views of shyness as a womanly virtue to contemporary views of shyness as a barrier to intimacy.

to highlight how cultural standards governing shyness reproduce and maintain power differences between and among women and men Re-educating Troubled Youth Larry K. Brendtro, Arlin E.
